Third Party Evaluation of Projects CAMPA, Odisha | Financial Years 2022-23

Submitted: January 15, 2025

#### **ACKNOWLEDGEMENT**

The Third-Party Evaluation assignment of the Project Undertaken under Compensatory Afforestation Fund Management and Planning Authority (CAMPA) in the State of Odisha for APO 2022-23 was awarded to AFC India Ltd.

At the very outset, we extend our gratitude to the Principal Chief Conservator of Forests and Head of Forest Force (PCCF & HoFF), Odisha for giving us the opportunity to undertake the assignment and his guidance from time to time in bringing out this report. We would also like to thank CEO, CAMPA for his continuous support and confidence for undertaking this assignment.

We would like to thank Chief Conservator of Forests (PP&A), Odisha for coordinating with circle and divisional level officials for the study.

We are extremely grateful to the DFOs of the respective Divisions for their support and cooperation at field level without which the task could not have been accomplished.

We extend our heartfelt thanks to the Range Officers and their frontline staff including Foresters and Forest Guards for their support and co-operation in sharing data/information and facilitating community interactions in the project areas. In addition, we express our heartfelt thanks to all other Staff members for their inputs and support during the study.

We also convey our special thanks to the entire team who were directly or indirectly associated during field assessment and data collection for their excellent support.

Last but not the least, we express our thanks to all the VSSs/EDCs Secretaries, Presidents, Governing Body Members, and men and women in the villages who took their time off from their work for discussions. The cooperation of the respondents for providing us with the requisite insights and information is gratefully acknowledged.

Dr. Narendra Baduni, AFC India Ltd.

#### **Executive Summary**

The state CAMPA formulates Annual Plans of Operation (APOs) every year to carry out its operations in the forestry sector as per the approved APO. The core activities of CAMPA include working plan prescription and plantations, forest protection, wildlife management, Ama Jangala Yojana, and SMC activities while non-core activities comprise of research, development and capacity building, infrastructure development, Forest IT and working plan exercise. The activities planned in the APO out of the CAF are undertaken by different wings of the Forest, Environment and Climate Change Department, Government of Odisha (GOO). The current assignment is being carried out by AFC India Ltd., an agency selected through competitive bidding process to carry out Third-party monitoring of the CAMPA works for the APO of FY 2022-23.

The CAMPA State Authority of the Odisha Forest Department (OFD) has prepared APO for estimated cost of around Rs. 973.61 cr. to be implemented during the financial year 2022-23. As per the APO FY 2022-23, fund allocation for 'forest management' activities are around 77%, whereas for the 'wildlife management' allocation for the planned activities is 23%. As reported by State CAMPA, the total expenditure is around Rs. 929.93 cr (around 96%). Under 'Forest Management' 100% of the allocated funds were utilized, whereas under the 'Wildlife Management' 80% of the allocated funds could be utilized.

The entire assignment was carried out in three distinct phases, viz., Inception phase, Field Survey phase, and Report Preparation phase. The report has been organized circle-wise with observations on each of the divisions based on the activity observed, that was randomly chosen from the list of activities included in the APO supported with tables, graphs, and photographs.

As per the mandate, the study team covered all 51 forest divisions falling in 8 Circles to observe the activities planned in the APO implemented during the FY 2022-23. In all 37 territorial forest divisions, and 14 wildlife divisions were covered. Other functional divisions that also received the funds under the APO, and were reviewed are – Silva BBSR, Silva Rayagada, FRC, Angul, G.Udayagiri, Dy Champua, Nadankanan, and FTS Ghatikia.

The following are a set of observations based on the inputs obtained from the selected field samples:

- The saplings raised in the forest nurseries were of good quality. At the time of field visits plantation works were in progress - saplings planted were of good quality.
- 2. Departmental norms and protocols followed in raising plantations. Field observations at some sites the Artificial Regeneration (AR) model have been implemented whereas the sites were planned for some other plantation model mostly ANR. e.g. Berhampur, Baliguda, Parlakhemundi and Boudh Divisions.
- 3. At most sites, the spacing was appropriate. Field observation at some sites non-conformity with the norms especially reduced spacing to comply with the numbers to be planted.
- 4. At few sites sapling have been planted under the shade of existing trees for achieving the model plant numbers. e.g. Raygada division.
- 5. The construction of infrastructure such as watch towers, staff quarters office buildings etc. has been done according to a standardised norm, and are of good quality. These structures were measured on sample basis for their dimensions and these were checked with the measurement books. The record was generally found to be accurate and as per the work done.

Submitted: January 15, 2025

- Roads, culverts, causeways etc. have been built as per the requirements of the sites and the dimensions have been recorded in the measurement books. This was verified by spot checking of the sampled sites.
- 7. The SMC works have been done in a site-appropriate manner. The quality of the SMC works are good.
- 8. In some divisions the allocated physical targets were not fully achieved. The gaps in achieving the targets could be identified with the respective divisions, and could be addressed in subsequent years.
- 9. Budgetary procedures have been followed and record maintenance is good.
- 10. E-green watch is mostly updated. Barring Balasore WL, Baripada, Karanjia, Keonjhar.
- 11. The labour and staff engaged though the CAMPA funds were used for the designated purpose.
- 12. The AJY model has been successfully integrated in the field works by way of social mobilization. (e.g. Angul, Balliguda, Parlakhemundi, Bolangir).
- 13. Protection fencing using varies material like angle-iron, cross-wire, green fence, wooden poles etc., have been installed around the plantation sites. The protective fencing was found damaged at some places.
- 14. The protected area network, a sector that usually faces a resource crunch, has been supported in several key areas such as protection by the creation of physical barriers, support to anti depredation squads, quick payment of compensatory sums of money for losses resulting from human-animal conflict etc.
- 15. The development of grassland in the farms of relocated villages and the consequent use of the site by wild ungulates is indeed an encouraging sign of effective use of financial allocations.
- 16. The use of CAMPA funds for rejuvenation of coastal shelterbelts is a good example of funds well used. e.g. Chilika Wildlife Division.
- 17. The Subsidiary Silvicultural Operations done in bamboo areas has generally benefitted the crop.
- 18. The upkeep of records such as plantation journals, nursery records, measurement books etc. has been generally found to be of good quality. The documents were usually available during the field inspections and found to be regularly updated.
- 19. The field staff was found to be conversant with the work and they were able to share their knowledge and provide useful inputs during the field survey.

#### 1. Background to CAMPA

In India, forest land can be diverted for non-forest purposes such as construction of dams, mining, and other developmental non-forestry activities only if the government permits. Since this diversion of forest land results in loss of biodiversity which in turn affects wildlife as well as geographical parameters such as climate and terrain, compensatory afforestation is also mandated in the law. In other words, to compensate for the losses incurred, the government made compensatory afforestation mandatory.

Whenever forest land is diverted for non-forest purposes, it is mandatory under the Forest (Conservation) Act, 1980 that an equivalent area of non-forest land must be taken up for compensatory afforestation. In addition to this, funds for raising the forest are also to be imposed on whomsoever is undertaking the diversion. The land chosen for afforestation, if viable, must be in proximity of reserved or protected forest for ease of management by forest department.

In 2002, the Hon'ble Supreme Court (SC) ordered that a Compensatory Afforestation Fund had to be created in which all the contributions towards compensatory afforestation and net present value of land had to be deposited.

In April 2004, Ministry of Environment and Forests constituted Compensatory Afforestation Fund Management and Planning Authority (CAMPA) to overlook and manage the Compensatory Afforestation Fund (CAF) as directed by the SC. The authority was termed as the 'custodian' of the fund. Further in 2009, the government ordered that State CAMPAs had to be set up to boost compensatory afforestation at state level and manage Green India Fund.

Compensatory Afforestation Fund Act, 2016 came into force from 30 September 2018. The Act established a National Compensatory Afforestation Fund under the Public Account of India and State Compensatory Afforestation Fund under the Public Account of each state. The payments made for compensatory afforestation, net present value and others related to the project will be deposited in the fund. The State Funds will receive 90% of the payments while National Fund will receive remaining 10%. These funds will be regulated by State and National CAMPA. The Compensatory Afforestation Fund Rules were notified in August 2018.

Compensatory Afforestation Fund Management and Planning Authority (CAMPA) are meant to promote afforestation and regeneration activities as a way of compensating for forest land diverted to non-forest uses.

National CAMPA Advisory Council has been established as per orders of The Hon'ble Supreme Court with the following mandate:

- Lay down broad guidelines for State CAMPA;
- Facilitate scientific, technological, and other assistance that may be required by State CAMPA;
- Make recommendations to State CAMPA based on a review of their plans and programmes;
- Provide a mechanism to State CAMPA to resolve issues of an inter-state or Centre-State character.

In April 2019, the Ministry of Environment notified that states which have a forest land of more than 75% of their geographical area need not provide non-forest land for compensatory afforestation. Instead, land can be taken up in states with lesser forest cover. Further, it was also notified that the minimum area of compensatory land should be five hectares if the land is not contiguous to a forest.

The Ministry also stressed that the fund had to be used for important needs such as Compensatory Afforestation, Catchment Area Treatment, Wildlife Management, Assisted Natural Regeneration, Forest Fire Prevention and Control Operations, Soil and Moisture Conservation Works in the forest, Improvement of Wildlife Habitat, Management of Biological Diversity and Biological Resources, Research in Forestry and Monitoring of CAMPA works and others.

#### **Odisha Context**

The Forest, Environment & Climate Change Department in the State operates through several departmental formations and autonomous bodies. The field formations under the Forest set up are organized under the Forest, Wildlife and Kendu Leaf Wings. The Odisha Forest Development Corporation (OFDC) Ltd. acts as the commercial wing of the Department and discharges the function of disposing various forest produce like Kendu Leaf, salvaged timber, bamboo etc.

The State has 8 Forest Circles & 37 Forest Divisions under the Principal Chief Conservator of Forests & Head of Forest Forces and 14 Wildlife Divisions with territorial jurisdiction and Nandankanan Zoological Park under the Principal Chief Conservator of Forests (Wildlife) and Chief Wildlife Warden. Besides, there are 3 Circles and 19 Kendu Leaf Divisions under the PCCF (KL) which look after the collection and processing of Kendu Leaf. Further there are 8 working plan Divisions, one Forest Resources Survey Division, one State Silviculturist at Bhubaneswar and one Silviculturist Division at Rayagada under the administrative control of PCCF and HoFF, Odisha.

The State has a recorded Forest area of 61204.17 sq. km. which is about 39.30% of its geographical area. This includes 26873.66 sq. km. of Reserve Forest, 9175.15 sq. km of Proposed Reserve Forest, 1085.22 sq. km of Protected Forest, 287.51 sq. km. of Village Forest, 4179.59 sq. km. of Demarcated Protected Forest, 4272.91 sq. km. of Un- Demarcated Protected Forest, 15117.30 sq. km of Revenue Forests, 22.06 sq. km. of Un-Classified Forests and 190.77 sq. km of Private Forests.

As per ISFR, 2021, the forest cover of Odisha is 52,156 sq. km (33.50%) comprising 7,213 sq. km as Very Dense Forest, 20,995 sq. km as Moderately Dense Forest and 23,948 sq. km under Open Forest and the tree cover is 5004 sq. km. The State has gained 537 sq. km of forest cover and 356 sq. km of tree cover in the State over the assessment made by FSI in 2019.

The Compensatory Afforestation Fund Management and Planning Authority (CAMPA) Odisha was constituted vide Notification No. 13995/F&E dated 14.08.2009 with an objective for Conservation, Protection, Regeneration and Management of existing natural forests, Wildlife and their habitat and raising Site Specific compensatory Afforestation, Penal compensatory Afforestation etc.

The state CAMPA formulates Annual Plans of Operation (APOs) every year to carry out its operations in the forestry sector as per the approved APO. The core activities of CAMPA include working plan prescription and plantations, forest protection, wildlife management, Ama Jangala Yojana, and SMC activities while non-core activities comprise of research, development and capacity building, infrastructure development, Forest IT and working plan exercise. The activities planned in the APO out of the CAF are undertaken by different wings of the Forest, Environment and Climate Change Department, Government of Odisha (GOO).

#### 2. M&E of CAF Activity

The CAMPA guidelines envisage engagement of independent concurrent monitoring and evaluation agency to oversee and evaluate activities on annual basis on state specific parameters as per the

requirements/ terms of reference. The current assignment is being carried out by AFC India Ltd., an agency selected through competitive bidding process to carry out Third-party monitoring of the CAMPA works for the APO of FY 2022-23.

To this endeavour key objectives of the present evaluation study, as indicated in the Request for Proposal/ MOU are as follows:

- Evaluation of CAMPA Annual Plan of Operations (APO) for the year 2022-23, and submission of reports;
- Evaluation includes AR, ANR, Bald Hill, Avenue Plantations in Compensatory Afforestation
  works along with AR, ANR, Bald Hill, Bamboo, Miyawaki, Fruit & Fodder, Conservation of RET
  Species, and other models of plantations under NPV component raised in APO year and
  previous plantations maintained in APO year;
- Site Specific WL Conservation Measures under Integrated WL management;
- Evaluation of Subsidiary Silvicultural Operations of Bamboo;
- Evaluation of Soil and Moisture Conservation Measures;
- Evaluation of Forest Protection and Forest Fire Protection activities;
- Ama Jangal Yojana (AJY) works;
- Wildlife Management activities;
- Infrastructure Development works;
- Research, Capacity Building and Forest IT;
- Raising and maintenance of 18-month-old seedlings;
- Digitization of Forest Blocks boundary; and
- Any other works taken up which are not specified above.

As per the information shared by the CAMPA State Authority, summary of the APO 2022-23 is presented below.

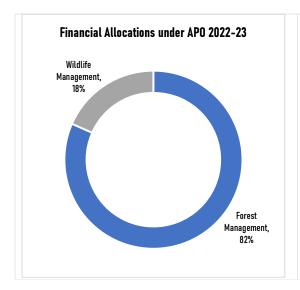

The CAMPA Annual Plan of Operation 2022-23 was implemented from April 2022 with financial outlay of Rs.1241.34 Crore which was approved by the State Level Steering Committee against which Rs. 1155.91 Crore was kept in State Budget. However, the National Authority approved the APO for Rs.1191.31 Crore. Total Treasury Challan amount for the FY 2022-23 was Rs.1026.17 Cr., of which expenditure of Rs.929.93 Cr. has been reported, overall utilizing 91% of the allocated funds. As per the APO FY 2022-23, fund allocation for 'forest management' activities are around 82%, whereas for the 'wildlife management' allocation for the planned activities is 18%.

The table 2.1 below provides Outlay, Allocations and Expenditure for the forest management as well as wildlife management under the APO FY 2022-23.

Table 2.1: Financial allocations and Expenditure under the APO for FY 2022-23

Amount	ın	Rs.	Lakh

Particulars	Outlay	Allocated	Expenditure	% Utilized	Allocation
[1]	[2]	[3]	[4]	[5]=[4]x100/[3]	[6]
Forest Management	96,979.00	83,744.18	75,208.91	90%	82%
Wildlife Management	22,152.00	18,873.16	17,783.64	94%	18%
Total APO 2022-23	1,19,131.00	1,02,617.34	92,992.56	91%	

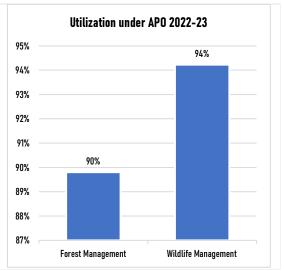

Figure 2.1: Financial allocations and Expenditure under the APO for FY 2022-23

As per the APO, activities were proposed in 13 key categories (A thru M) under 'Forest Management', whereas under 'Wildlife Management' the activities were proposed in 3 key categories (A thru C). Category-wise allocations of works for 'Forest Management' is presented in Table 2.2, whereas allocations for 'Wildlife Management' is presented in Table 2.3.

Table 2.2: Category-wise allocation under Forest Management

SI	Particulars	Physical	Financial
No		(Area in ha)	(Rs. in Lakh)
Α	Compensatory Afforestation, Penal Compensatory Afforestation,		
1	P.O for Block Plantation 2023-24	94.82	59.68
2	P.O for ANR Plantation 2023-24	1335.10	142.83

	Total B + C	6,264.00	6,264.00	4,708.91	75%
	Total A + B + C	22,152.00	22,152.00	17,788.64	80%

Under the Wildlife Management the activities planned under category A the achievement is 82% whereas for the activities under category B and C the achievement is 45% and 85% respectively. Overall, 80% of the allocated funds have been utilized.

#### 3. Key Processes and Limitation of the Study

After the award of the contract in late November 28, 2023, the draft Inception Report was presented on January 16, 2024 before the Evaluation Committee chaired by PCCF (HoFF). Some clarification and more details were desired. Accordingly, based on the feedback and suggestions second presentation was made before the Evaluation Committee chaired by PCCF (HoFF) on January 22, 2024. Thereafter, after seeking 'go-ahead' remarks, the Inception Report was revised and submitted.

After submission of the Inception Report, the first field survey was undertaken during one week of February, 2024 in forest divisions/ ranges of the Bhubaneshwar Circle. Based on initial field visits by the key experts, detailed guidelines and data collection forms were designed and validated in the field. Subsequently, after the first field visit, a small in-house training was conducted with all the field teams to ensure uniformity in data collection as well as quality. A follow-up training was conducted online on February 14, 2024 to adjust the forms based on the feedback. Thereafter, the field survey was rolled-out on full scale.

The survey work was planned in a manner that it gets completed by mid-April, but the entire survey schedule got impacted by series of other factors, viz., closing of financial year, parliamentary as well as state assembly elections in Odisha, heatwave spells followed by excessive rains due to which the rhythm of the survey kept on stretching.

There were follow-up letters from the CEO, CAMPA, and was communicated on September 19, 2024 informing about the completion of the survey work, and the data tabulation and analysis. Summary of the assignment stages is depicted in following table 3.1 below.

**Table 3.1: Assignment Chronology** 

Assignment Stages	Key Dates	Remarks
Award and Signing of Contract	November 28, 2023	
Inception Report Presentation	January 16 and January 22, 2024	
Field Survey and Training	First week of February 2024	Initiated after go-ahead
Follow-up Training on Data Collection	February 14, 2024	Online mode
Field Survey Completion	September 19, 2024	The survey work got impacted due to several factors viz., financial year closing, State and Parliament Elections, Heat-wave followed by rains etc.
Draft Report Submission	October 15, 2024	
Draft Report Presentation	December 24, 2024	The minutes were issued on January 9, 2025, and final report submission is kept as January 15, 2025

Now, the final report is being submitted after incorporating the suggestions and feedbacks in compliance of the completion of the assignment.

The report has been organized circle-wise with observations on each of the divisions based on the activity observed, that was randomly chosen from the list of activities included in the APO supported with tables, graphs, and photographs.

#### 4. Methodology

Under the CAF Rules and Guidelines, it is mandatory to undertake independent monitoring of the CAMPA activities including CAT Plan activities. Since, this exercise is undertaken in subsequent year of Annual Plan of Operation (APO) implementation, the method of the exercise is more like objective assessment of accomplishment of planned activities including quality and quantities of works.

The approach of undertaking the assessment of CAMPA works was to measure effectiveness of the treatments/ interventions undertaken, identification of implementation gaps and limitations, and provide objective suggestions etc. The entire assignment was carried out in three distinct phases, viz., Inception phase, Field Survey phase, and Report Preparation phase. The total duration of the assignment was to be around 6 months, or little more depending on the survey duration which had been estimated for 12 weeks, as well as available working days. Figure 1 describes in brief the three phases of the assignment.

#### 1. Evaluation of Plantation Works

(Form 1 and Form 1A were used; refer Annex 1)

#### Sampling method and Sampling Percentage

- Range-wise list of plantation sites were collected from the divisions
- Two Ranges from each division where maximum areas covered under the afforestation activities were selected
- In each selected Forest Range serial numbers were given to all the sites
- 10% of the total sites provided as per the list were randomly selected utilizing Random Number Table
- 2% of the area was enumerated for each sampled site by laying plots of size 33m x 33m (approx. 0.1 ha.)
- The plots were laid randomly on the diagonal starting from one corner of the treatment/ plantation site
- Photographs along with GPS location (using mobile app) were taken to have a visual record.

#### **DATA COLLECTION**

- Suitability of location of plantation
- Year of plantation
- Area of the plantation
- Suitability of planted species per agro-climatic conditions
- Name & Number of species planted
- Spacing of plantation
- Type of planting: AR/Block/ANR/Avenue/Fruit & fodder/ Miyawaki/ RET/ Bamboo/ Bald Hill/ River bank/ Canal-side/Others
- Number of plants planted/ Spacing
- Average height of plants
- · Average collar girth
- Silvicultural operation such as weeding, fencing, fertilizer application etc. and Protection measures etc.
- Maintenance of Plantation Journal/clump register & Nurseries

#### Criteria for Evaluation (based on count in 0.1 ha sample plot)

- Survival percentage
- Average plant height (in cm)
- Average DBH/ Collar Girth (in cm)
- · Average number of seedlings planted
- Status of natural regeneration/coppicing status of stump, if any

**Note:** Score obtained based on the "Scoring of Plantation" based on the criteria like plantation journal & its updation, treatment map, SMC measures, survival percentage, Height & growth etc.

#### 2. Evaluation of SMC Works

(Form 3 was used; refer Annex 1)

#### Sampling method and Sampling %

- Range-wise list of SMC sites were collected from the divisions
- Two Ranges from each division where maximum set of SMC activities undertaken were selected
- In each selected Forest Range serial numbers were given to all the sites
- 10% of the total sites provided as per the list were randomly selected utilizing Random Number Table
- Photograph along with GPS location (using mobile app) were taken.

#### **Data Collection**

- DPR prepared / Sanction letter
- Types of structure
- No. /volume
- Treatment Map available in Register of SMC
- Numbers per ha
- Extent of Siltation
- Efficacy of the Structures
- Extent of stabilization of gullies
- Comparative enhancement of ground water table
- Comparative assessment of the Vegetation cover in the area
- Status of regeneration
- Record maintenance like MB, GPS location

#### Criteria for Evaluation (based on sample site)

- Quality/suitability of SMC structures
- · Staggered trench, Percolation Pit, Contour bund, graded bund, Gully Plugging, WHS, etc.
- Design and number of structures as per Norms/ Specification
- Effectiveness of structures (siltation check and stabilization of erosion/ gullies, improvement
  in soil moisture regime and regeneration) observation based supported by photograph to
  be rated in two categories a) Satisfactory, b) Not satisfactory
- Gaps, if any observed, will share with field as well as senior team for taking corrective measures

#### 3. Evaluation of Infrastructure Works

#### (Form 4 was used; refer Annex 1)

#### Sampling method and Sampling %

- · Range-wise list of sites were collected from the divisions
- 10% of the total sites provided as per the list were randomly selected utilizing Random Number Table
- Photograph along with GPS location (using mobile app) were taken

#### **Data Collection**

- DPR/ Estimates for the structure
- Types of structure
- Work Order and Estimated Cost
- Completion status/ Commissioning of structure
- Specification/ norms followed for construction of structure
- Deviations/ cost over-run
- Utilization and maintenance of structure

#### Criteria for Evaluation (based on sample site)

- Completion of structure as per Work Order/ specification
- Any deviation from plan and estimate
- · Usability and utility
- Construction quality (observation based supported by photograph to be rated in two categories – a) Satisfactory, b) Not satisfactory)

#### 4. Evaluation of Wildlife Management Works

#### Sampling method and Sampling Percentage

- Range-wise list of different wildlife management activities were collected from the divisions
- Two Ranges from each division where maximum activities taken up were selected, if any
  activities will be missing in two sampled ranges, alternate range(s) were selected to cover the
  activities
- In each selected Forest Range serial numbers were given to all the sites
- 10% of the total sites provided as per the list were randomly selected utilizing Random Number Table

#### **Data Collection**

- Protection and Anti-Depredation Activities
- Forest Fire Prevention and Control Operations
- · Improvement of Wildlife Habitat
- Augmentation of food and water resources
- Monitoring assessment and protection of wildlife habitat
- Habitat Management

Third Party Evaluation of Projects
CAMPA, Odisha | Financial Years 2022-23

Submitted: January 15, 2025

- Corridor Management
- Management of Special Habitats
- Contingency & Overhead Expenditure
- Establishment, operation and maintenance of animal rescue centre and veterinary treatment facilities for wild animals
- Management of biological diversity and biological resources
- Voluntary Relocation of Villages from Protected Areas and Tiger Reserve
- Strengthening of Communication facilities for Protection of Wildlife
- Construction & Maintenance of Infrastructure for Protection of Wildlife
- Research Activities
- Publicity & Awareness Programmes

#### Criteria for Evaluation (based on sample site)

- Completion of interventions
- Any deviation from plan and estimate in case of anti-poaching barrack/watch tower/animal rescue center/anti-poaching check gate
- Usability and utility
- · Present conditions and utility
- Construction quality (observation based supported by photograph to be rated in two categories – a) Satisfactory, b) Not satisfactory)

#### 5. Evaluation of Other Works

#### Sampling method and Sampling %

- Range-wise list of other activities carried out were collected from the divisions
- Two Ranges from each division where maximum activities taken up were selected, if any
  activities will be missing in two sampled ranges, alternate range(s) were selected to cover the
  activities
- 10% of the total activities provided as per the list were randomly selected utilizing Random Number Table

#### **Criteria for Evaluation** (based on sample site)

Activity wise suitable criteria will be applied.

#### 4.1 Team Composition and Roles & Responsibilities

As suggested in the TOR a multidisciplinary team of experts was deployed for carrying out the assignment, as proposed in the Inception Report as well. The choice of the experts has been made in a manner – having sufficient experience, knowledge, expertise and required qualifications, and has ability to deliver quality report within the stipulated timeframe. A team of experts was mobilized in the month of December 2023 to carry out the requisite study under the supervision of Team Leader/ Project Coordinator, and under guidance of Technical Advisor. The team was further supported by 8 Field Investigators who were engaged locally.

AFC India Ltd./ Advisor/WL Expert Evaluation Expert-cum-Team Leader Management DR RUPAK DE DR N P BADUNI Project Coordinator/ Economist JAYANT CHAKRABORTY Study Team/ Consultants Monitoring & Evaluation Environment/Soil Forest Management./ GIS Expert Expert/Co-Team Leader **Environment Expert Conservation Expert** DR. Figure 4.1: Study Team

#### 4.2 Key Deliverables and Timeline

As per the TOR, there are four deliverables for the assignment, and are listed in table below:

Table 4.1: Key Deliverables and Timelines

SI. No.	Outputs/ Deliverables	Timeline	Remarks
1	Inception Report	Original: January 10, 2024 Revised: January 16 and January 22, 2024	Within one month of signing of MOU; the MOU was signed on November 28, 2023 *Presentation made on January 16, 2024, and follow-on presentation on January 22, 2024
2	Draft Final Report	Original: June 5, 2024 Revised: October 15, 2024	Efforts will be made to submit the draft report as per schedule. Presentation will be made on the draft report, and subsequently finalized report will be submitted by due date.  *Presentation made on December 24, 2024.
3	Final Report	Original: July 9, 2024 Revised: January 15, 2025	After incorporating the feedback/ comments from State CAMPA/ OFD *Comments expected from State CAMPA received on January 9, 2025; Final report submission is based on the comments communicated by the Client.

#### 5. Study Coverage

As per the mandate, the study team covered all 51 forest divisions falling in 8 Circles to observe the activities planned in the APO implemented during the FY 2022-23. In all 37 territorial forest divisions, and 14 wildlife divisions were covered.

Table 5.1: Study Coverage by Circles

Circle	Territorial	Wildlife	Total
Angul	5	2	7
Baripada	3	4	7
Berhampur	7	0	7
Bhawanipatna	5	1	6
Bhubaneswar	3	5	8
Koraput	5	0	5
Rourkela	5	0	5
Sambalpur	4	2	6
Total	37	14	51

Other functional divisions that also received the funds under the APO, and were reviewed are – Silva BBSR, Silva Rayagada, FRC, Angul, G.Udayagiri, Dy Champua, Nadankanan, and FTS Ghatikia.

Following table indicates the number of sites visited in the territorial and wildlife forest divisions. The table illustrates total number of sites [3], Sites to be covered as per the sampling requirements [4], and total number of sites covered under the assignment [5]. In all 156% sites were visited as against the targeted sites whereas the study team covered around 16% sites as per the total listed sites.

Table 5.2: Number of sites visited under the Study by Circles

Circle	Division	Sites	Target for Coverage	Sites covered	% of site	% covered against target
[1]	[2]	[3]	[4]	[5]	[6]	[7]
Angul	Angul	167	17	27	16%	159%
	Athagarh	97	10	13	13%	130%
	Athamallik	56	6	12	21%	200%

#### 6. Assessment Findings

#### **6.1 Overall Assessment**

The role of the third-party evaluator is to take a scientifically sampled view of the exercise done by the primary players, evaluate the same and present an unbiased view of the activities along with a set of observation and suggestions for future follow up actions and improvements.

The following are a set of observations based on the inputs obtained from the selected field samples:

- 1. The saplings raised in the forest nurseries are of good quality. At the time of the field visits the plantation works were in progress, and the saplings planted are of sufficiently good quality.
- 2. Departmental norms and protocols have been followed for raising the new plantations. The field teams have observed that at some sites the Artificial Regeneration models have been implemented whereas the sites were planned for some other plantation model mostly ANR.
- 3. In most of the sites observed, the spacing of plantation were appropriately executed, however at some sites issues of spacing have been noticed generally related to non-conformity with the norms especially reduced spacing to comply with the numbers to be planted.
- 4. At few sites sapling have been planted under the shade of existing planted trees.
- 5. The construction of infrastructure such as watch towers, staff quarters office buildings etc. has been done according to a standardised plan and are apparently of a sufficiently good quality. These structures were measured on sample basis for their dimensions and these were checked with the measurement books. The record was generally found to be accurate and as per the work done.
- 6. Roads, culverts, causeways etc. have been built as per the requirements of the sites and the dimensions have been recorded in the measurement books. This was verified by spot checking of the sampled sites. One of the causeways observed was found damaged.
- 7. The SMC works have been done in a site-specific manner and the sites are appropriate. The quality of the SMC works is also satisfactory.
- 8. In some divisions the allocated physical and financial targets were not fully achieved. The gaps in achieving the targets could be identified with the respective divisions, so that realistic planning could be done in subsequent years.
- 9. Budgetary procedures have generally been followed and record maintenance is good.
- 10. Barring of few cases, information of E-green watch is regularly been updated at the division level.
- 11. The labour and staff engaged though the CAMPA funds were used for the designated purpose.
- 12. The AJY model has been deployed successful to implement the field works by gathering strength from social mobilization. The support of the local community has benefited the forestry and wildlife conservation efforts.
- 13. Protection fencing using varies material like angle-iron, cross-wire, green fence, wooden poles etc, have been installed around the plantation sites observed. The protective fencing was found damaged at some places.

- 14. The protected area network, a sector that usually faces a resource crunch, has been supported in several key areas such as protection by the creation of physical barriers, support to anti depredation squads, quick payment of compensatory sums of money for losses resulting from human-animal conflict etc. The development of grassland in the farms of relocated villages and the consequent use of the site by wild ungulates is indeed an encouraging sign of effective use of financial allocations.
- 15. The use of CAMPA funds for rejuvenation of coastal shelterbelts is a good example of funds well used.
- 16. The Subsidiary Silvicultural Operations done in bamboo areas are generally benefitted the crop.
- 17. The upkeep of records such as plantation journals, nursery records, measurement books etc. has been generally found to be of good quality. The documents were usually available during the field inspections and found to be regularly updated.
- 18. The field staff was found to be conversant with the work and they were able to share their knowledge and provide useful inputs during the field survey.

#### **6.2 Findings on CAMPA Activities (Qualitative and Quantitative)**

#### **6.1.1 Overall Physical and Financial Progress analysis**

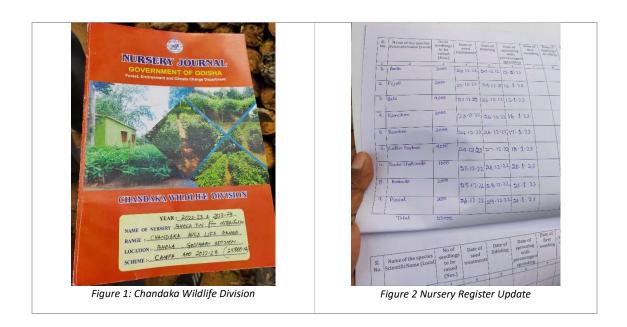

The APO physical as well as the financial targets have been met completed. The table 6.2.1 indicates the circle-wise expenditures incurred by the forestry wing and the wildlife wing of the forest department.

Table 6.1: Circle-wise expenditure under forestry and wildlife management

Name of Circle	Forestry Activities (General) (Rs. In lakh)	Wildlife Management (Rs. In lakh)	Total Expenditure Incurred (Rs. In lakh)

#### 6.1.1 (a) Nursery Management

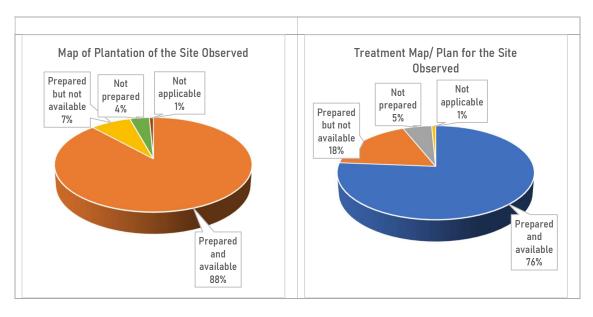

Forest nurseries are well managed and maintained, and saplings are well kept. Sorting and grading of plants was observed at the time of visit by the study team at few nurseries. Nursery Journals and Specie-wise records are well maintained. System of maintaining Pit Registers along with the Nursery Journal is also introduced, and being updated at site level.

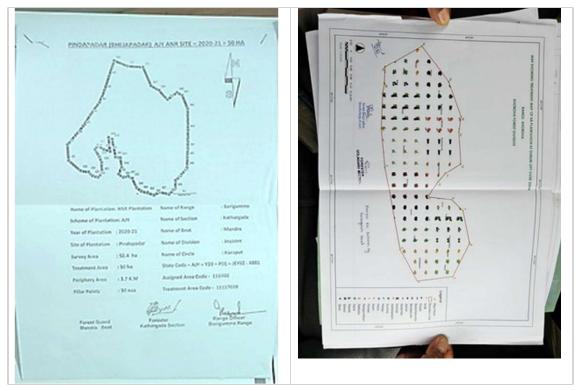

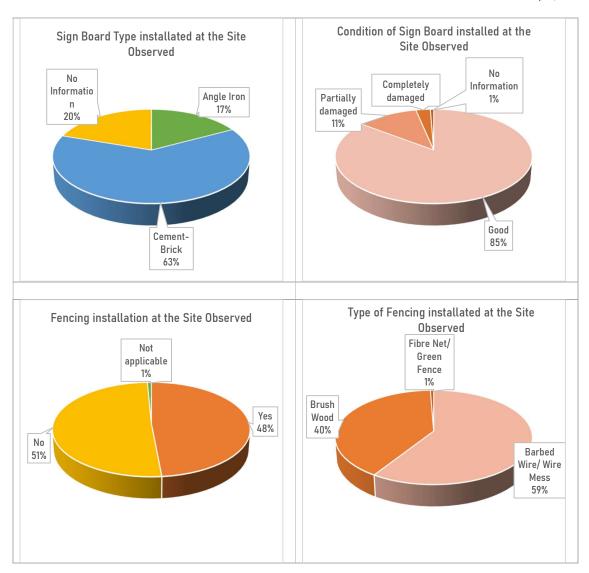

## 6.1.1 (b): Status of update of Plantation Journal, Site Map and Treatment Plan/ Map, installation of Sign Board and Fencing

The figures below depict the overall status of the Plantation Journal availability at site level, and its update frequency, Map of Plantation and its Treatment Plan/ Map, Sign Board installation, and its present condition, Fencing at Site including type of fencing, and its condition. However, variation has been observed across the divisions. Subsequent Table 6.2.2 provides Circle-wise and Division-wise status of sample sites on these factors.

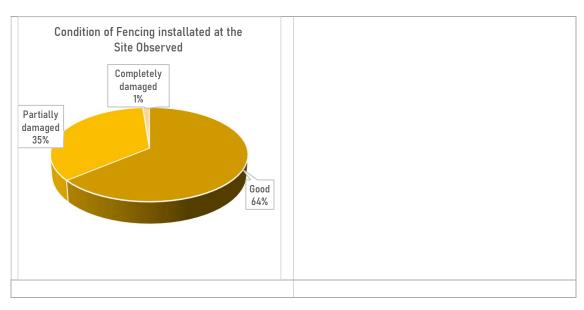

Table 6.2: Circle-wise and Division-wise status of Plantation Journal, Map of Plantation, Treatment Plan/Map, Sign Board and Fencing at Sample Sites

## 6.1.1 (c): Status of Survival under different Plantation Models under Compensatory Afforestation (CA) / Penal CA Journal, Additional CA and NPV

The overall survival percentage is 88% across the age of plantation which is quite good, minimum being 83% and maximum being 91%. The table 6.2.3 depicts overall survival % of the plantation along with average height and collar size by creation year wise.

Table 6.3: Survival % of plantation by Creation Year

Creation Year	Total Plants	Live Plants	Age of Plantation in year 2024-25	Survival %	Average Height (cm)	Average Collar (cm)
Creation						
2022-23	53,94,578	48,52,269	2	90%	181	9
Maintenance						
2021-22 (2 <sup>nd</sup> Yr.)	23,26,586	20,19,120	3	87%	231	11

### 6.1.1 (d): Status of Soil Moisture Conservation (SMC) and its impact

Overall SMC works have been effective, and as a result in improved soil moisture regime is found supporting in germination of forest floor seeds including medicinal plant regeneration e.g. *Andrographis paniculata*, *Hemidesmus indicus*, Brahmi.

Water table recharge in the forest fringe village — wells and ponds; e.g. a) Berhampur, Digaphandi Range 50 ha. Percolation pit developed that remains full of water round the year, b) Ghumsur South, Aska Range, Bhanjnagar — dry borewells recharged and villagers have restarted vegetable cultivation contributing to their incomes.

#### 6.1.1 (e): Status of Wildlife Management

#### A) Activities for Wildlife Management under CAMPA APO: 2022-23 (80% Components of NPV)

#### A.1) Protection and Anti-Depredation Activities

The activities are:

- a) Anti-depredation equipment's/Tracking devices: Trap Camera -101 nos, Search light- 664 nos, LED Torch light-908 nos, Metal Detector-9 nos, Kit Bag- 238 nos, Warning system-5 nos, Canon Gun- 5 nos, equipment-66 nos, & training to villages for Gaja Sathi-299 nos.
- b) Mobility: for 71 nos Boats for patrolling/anti-depredation/anti-smuggling activities
- c) 80 nos Rescue & release operation of wild animals,
- d) Solar Fencing-53 Kms,
- e) Trench Fencing-25.96 Kms and Pre casted RCC Structure- 50 Nos.,
- f) Wages of attendant and DEO engaged in Wildlife Crime Cell 15 nos.,
- g) Maintenance of Boundary-929.98 RKM and Pillar-729 Nos,

For this the total expenditure incurred is Rs. 853.46 lakh.

### A.2) Forest Fire Prevention and Control Operations

The following activities were undertaken:

- a) Under Forest Fire Prevention 48 nos. Firefighting Squads engaged with vehicle & it fuel @ 1500/- per day, 101 nos.;
- b) Firefighting equipment's purchases including Blowers along with fuel, 48 nos.;
- c) Logistics support for the firefighting squads,
- d) 6,771 Kms Fire line creation & maintenance done,
- e) Wages of attendant and DEO engaged in Wildlife Crime Cell,
- f) Construction of Watch Tower 20 nos.

For this the expenditure incurred is Rs. 1047.73 lakh.

#### A.3) Improvement of Wildlife Habitat

The activities included are:

- a) Plantation of 500 nos of plant of Fruit Bearing and Fodder species around water bodies and maintenance thereof.;
- b) Second year maintenance of 350 nos. plantation of Fruit & Fodder species around water bodies,
- c) Third year maintenance of 250 nos plantation of Fruit & Fodder species around the water bodies, 63 nos
- d) Creation and maintenance of salt licks.
- e) Monitoring assessment and protection of wildlife habitat,
- f) 367 nos of cattle vaccination/ awareness and animal health camp,
- g) Invasive weed eradication 871 Ha,
- h) Creation and maintenance of meadows covering 543.46 ha. area,
- i) Habitat restoration post natural disaster in ex-situ and in-situ conservation in 425 ha areas.

- j) Oth and 1st year operation of plantation under Rejuvenation of wildlife Corridor (for 1000 nos. plant per ha. using 18 months old seedling,
- k) Wages of 12 nos. Squads for Black Buck Conservation,
- I) Wages of 4 nos. of Squads for Conservation and wet land management of migratory bird congregation areas outside PA's,
- m) Establishment, operation and maintenance of animal rescue centre and veterinary treatment facilities for wild animals,
- n) Management of biological diversity and biological resources
- Wages of 32 nos. of Squads for Monitoring, surveillance, and protection of meta population
  of important wildlife species including RET species outside protected areas through local
  communities.,
- p) Relocation of 2 numbers villages.

Overall expenditure incurred under **80% Components of NPV** Rs. 11902.63 lakh against allocation of Rs. 14456.00 lakh. Thus, the achievement is 82% against allotment.

### B) Activities for Wildlife Management under CAMPA APO: 2022-23 (20% Components of NPV)

Strengthening of Communication facilities for Protection of Wildlife

- a) 75 nos VHF base station installed and expenditure incurred for maintenance thereof including satellite tracking,
- b) Equipment for monitoring of wild animals and the protection activities are Trap Camera-335 nos., Binocular-3 nos., Drone-1 no., Solar light-4 nos., Metal Detector-3nos., GPS Tracking system-21 nos., Gun-1 no., Mega Phone-20 nos., Compass- 24 nos., and other equipments-37 nos. supplied. 28 nos. of computer purchases and its accessories, wages of DEO/Driver/Support Staff/Consultant etc.
- c) Construction & Maintenance of Infrastructure for Protection of Wildlife: 1,281 Rkm Forest Road/ Inspection path have been maintained.
- d) 18 nos Anti-poaching Barrack, 1 no Floating Jetty, 2 nos Spill Over Work created.
- e) Under Publicity & Awareness, Training programme for Gaja Sathi- 865 nos. of villages, Training programme for veterinarian on Wildlife Health and disease control, Diploma course fee for ACF and WII.

Overall expenditure incurred under **20% Components of NPV** Rs. 1177.10 lakh against allocation of Rs. 1432.00 lakh. Achievement is 82% against allotment.

### C) Regional Wildlife Management Plan

While sending proposals for diversion of forest land for mining purpose, State Government stipulate for realization of cost towards implementation of Regional Wildlife Management Plans across the state as per the norm fixed by the State Government. A Financial Outlay of Rs 15 crore has been provisioned in APO 2022-23 for implementing the region-specific components of Regional Wildlife Management Plans as per requirement.

The state has wildlife wealth of various animal life and iconic species of wild animals such as Elephant, Tiger, Leopard, Dolphin, Hyena, Wolf, Fishing Cat, Leopard Cat, Jungle Cat, Gaur, Sambar, Blackbuck, Spotted Deer, Wild pig, Giant squirrel, Pea Fowl, Hill Myna, Salt water Crocodile, Marsh Crocodile, Gharial, King Cobra, various Sea turtles, Monitor lizard etc. Although the state has extensive Protected

Area network for wildlife conservation and protection, it still faces several challenges. These include habitat degradation, fragmentation, and shrinkage due to various reasons, increased man-animal conflicts, proliferation of invasive species, poaching, and impacts of climate change. There is an explicit need for ensuring better protection of wildlife outside the protected areas and initiating recovery programs to save threatened species and their habitats. The major three identified key threats are Habitat fragmentation and deterioration, Human-wildlife conflict, and loss of wildlife.

The Regional Wildlife Management Fund approved 1500.00 lakh and out of that fund utilised Rs. 668.23 lakh which is 45% of the fund allocation. Activities taken are:

- a) Barrack-3 nos, Watch Tower-2 nos, Turtle nesting beach-2 nos, Maintenance of one Watch Tower with 2 nos. barrack, Wages of Rapid Action Team-15 nos, Wildlife Training Centre, Wages of Rapid response units-14 nos, Establishing Training Centre, rescue and orphan animal care-3 nos, Purchase of equipment, Laboratory consumables like reagents kits, plastic wares etc.
- b) The expenditure incurred in Dhenkanal Division Rs. 51.21 lakh, Athagarh Division Rs. 43.01 lakh, Cuttack Division Rs. 4.25 lakh, Athmallik Division Rs. 14.64 lakh, Balasore WL Division Rs. 27.64 lakh, Rairangpur Division Rs. 8.61 lakh, Karanjia Division Rs. 4.58 lakh, Baripada Division Rs. 8.61 lakh, Keonjhar (WL) Division Rs. 4.03 lakh, Berhampur Division Rs. 38.61 lakh, Ghumsur (S) Division Rs. 23.65 lakh, Parlakhemundi Division Rs. 23.01 lakh, Subarnapur Division Rs. 8.61 lakh, Bolangir Division Rs. 4.58 lakh, Mangrove WL (Rajnagar) Division Rs. 30.00 lakh, Chandaka WL Division Rs. 10.45 lakh, Malkangiri Division Rs. 24.00 lakh and others divisions Rs. 338.76 lakh. Overall sampling the activities and verified. The works are executed properly and were found to be generally satisfactory.

#### D) Site specific Wildlife Conservation Plan

In case of establishing any industry/ developmental/mining project requiring diversion of forest land involved and in need of environmental clearance under Environmental Protection Act, 1986, certain conditions are imposed by Government of Odisha/ Government of India towards conservation of flora and fauna likely to be affected within the project area as well as in the impact area of up to 10 km radius around the project. This involves preparation of Wildlife Conservation Plan for each site where these projects are being established.

The proposal was to implement 30 new Site-Specific Plans in addition to 99 running Site-Specific Plans of previous years covering 31 Divisions in this plan. Thus, necessary provisions for 129 projects at a cost of Rs. 47.642 crores were made under APO 2022-23.

The data revels that as per Site specific Wildlife Conservation Plan 30 new projects and 99 old projects are implemented covering 31 divisions and expenditure incurred Rs. 40.407 crores where the achievement is 85% against the target.

Various activities are taken like Infrastructure Development, Creation of Water Body, Bio-diversity Park & Renovation, Urban Plantation, Bald Hill Plantation, AR Plantation, ANR Plantation, Anti-depredation Squad, Immunisation of livestock, Photo voltaic power fencing along Railway track, Expenditure incurred for maintenance of vehicles, Cost of Fuel, Wear & Tear for vehicle, Research activity, Awareness Campaign, Bio-diversity Monitoring, Solar Street Light installation, Monitoring, Supervision & Evaluation etc.

Table 6.5 Site specific Wildlife Conservation Plan and Achievement

SL. No.	Name of the Division	Total No. of Projects	No. of Projects		Amount Funds (as per APO) Utilised		Percentage of Achievement

# 6.1.1 (f): Status of Silvicultural Operations on Bamboo

The silvicultural operations on bamboo plantation have been effectively undertaken across the forest divisions. Under the activities removal of all dead and dry clump, high stumps and hanging branches and clean up to arm's reach was done. Removal of climber's damaging the clumps including general tidying up of the clumps and soil mounding in the clumps for better regeneration of the clumps was also done, whereas stone mounding in downhill side of bamboo clumps keeping distance upto 50 cm. and above. Removal of all malformed, twisted, insect attacked, and top broken bamboos has also been accomplished. Table 6.5 depicts area treated against the target.

Table 6.7: Area Treated under SSO by Circle

Circle	Total Area	Treated			Amount
	(ha)	Area (ha)	Clumps	Sanctioned	Expenditure
				(Rs. in Lakh)	(Rs. in Lakh)
Angul	800	730	22,800	20.16	20.16
Baripada	-	-	-	-	-
Berhampur	28,676	13,400	3,82,683	324.86	324.86

Total Circle	52,626	20,755	6,59,735	681.56	681.56

## 6.1.1 (g): Status of Ama Jangala Yojna (AJY)

The physical targets were successfully completed in the Ama Jangala Yojana (AJY). IGA support extended to the VSS beneficiaries that supported wage employment generation; e.g. Jeypore, Kalahandi North, Angul, Navrangpur.

## 6.1.1 (h): Status of Publicity and Training

Trainings were conducted on topics like forest fire control and prevention, protection of wildlife, elephants/ Gaja Sathi etc. Awareness campaigns and rallies were also conducted on these topics.

Cattle Vaccination camps were organized, and SHGs members / women were given trainings on various topics around the forest fire prevention and wildlife conflicts.

# **6.1.2 Findings on activities under Compensatory Afforestation**

The AR, ANR, Bald Hill, Avenue Plantations in Compensatory Afforestation were found to be of good quality and were undertaken as per requirements of the site, and therefore the growth and survival of the saplings is generally good. Most of the older patches have started to look like forested areas albeit artificially regenerated.

#### 6.1.3 Findings on activities under Catchment Area Treatment Plan (CAT)

The treatments have been done largely inside the plantation areas and at selected sites in the forests. The works include LBCD, concrete check-dams, wire mesh structures, contour trenches etc. The activities are well planned and appropriately located.

#### 6.1.4 Findings on the activities under Integrated Wildlife Management

The funds have been used to address a multitude of issues related to the sector and generally the efforts are effective. Mitigation measures have been undertaken to address the issues related to HWLC, and the management and protection of the habitats have been prioritised. At places where grasslands have been developed the benefit accruing to the wild animals is visible. The watch towers are well located and are beneficial for undertaking monitoring and watch on the wild animals and on interlopers.

## 6.1.5 Findings on the activities under NPV Fund (A) and NPV Fund (B)

The funds allocated under this category have been utilized for the maintenance of plantations, and at some places to develop mangrove plantations. The AR or/ and ANR plantations raised are doing well. The funds have generally been used for the allocated purpose.

#### 6.1.6 Update on e-Green Watch Portal

Barring a few exceptions, the updation of information on the e-Green Watch portal was found to be complete.

#### 6.1.7 Other Observations

The works under infrastructure development include diverse structures such as staff quarters, field offices, compound wall, seizure yards, watch towers are largely of good quality and are being used for the purpose for which they have been built.

#### 6.1.8 Field Survey Images

The images gathered during the field survey are huge in number and some selected images are presented in the document to provide snapshot views of the works done in the field. In all 2027 images were captured by the field teams during the field survey. Table 6.6 depicts the number of images captured by Circle. Some of the selected photographs have been utilized on the cover page as well as to substantiate the field work in various sections of the report.

In the subsequent sections division wise observations are documented for each of the Circle under 8 key sub-sections, viz., 1) Overall Physical and Financial Progress analysis, 2) Findings on activities under Compensatory Afforestation, 3) Findings on activities under Catchment Area Treatment Plan (CAT), 4) Findings on the activities under Integrated Wildlife Management, 5) Findings on the activities under NPV Fund (A) and NPV Fund (B), 6) Update on e-Green Watch Portal, 7) Other Observations, and 8) Field Survey Images. For each of the divisions this structure has been followed, and divisions are arranged under each of the Circles.

# 6.2 (C1) CIRCLE ANGUL

There are 7 forest divisions in Angul Circle, of which 5 are territorial divisions (Angul, Athagarh, Athamallik, Cuttack and Dhenkanal), and 2 are wildlife divisions, viz., Mahanadi WL, and Satkosia WL.

Subsequent 5 tables provide information for the Circle, followed by division-wise observations organized under 8 sub-sections. In Angul Circle total expenditure incurred is around Rs. 167.45 Cr. of which Rs. 78 Cr. has been spent by the forest wing, and around Rs. 89.42 Cr. has been spent by the wildlife wing of the forest department.

Table C1.6.1.1: Financial Achievements in Angul Circle as per the APO (Rs. In lakh)

Name of Division	Forestry Activities (General)	Wildlife Management	Total Expenditure Incurred
Angul	1,486.38	280.65	1,767.02
Athagarh	1,316.65	218.57	1,535.22

Total	421.94	421.94	418.15	99%

In subsequent subsections division-wise observations are presented. The data has been collected from field level and specific to the activities being observed. Thus, this may not add-up to the circle totals.

### **C1.1** Angul Division

## 6.2.1 (C1.1) Over all Physical and Financial Progress Analysis

The allocation was Rs. 1486.38 lakh under forestry sector and all was utilized. For forest protection and fire protection/control operation Rs. 164.49 lakh expenditure was incurred. For Wildlife management there was an allocation of Rs. 322.80 lakh but expenditure was Rs. 280.65 lakh, thus only 87% of the fund was utilized.

The physical targets of new plantation, maintenance other activities were completed 100% including Ama Jangala Yojana (AJY).

However, in case of SMC only 357 ha. completed against target of 1000 ha. and regeneration of degraded bamboo forests (SSO Bamboo) 641.997 ha area completed against target of 870 ha. Thus, the achievement is 37.5% and 74% respectively.

Soil and moisture conservation (SMC) activities like RCC check dam, loose boulders check dam (LBCD), staggered trenches, wire mesh LBCD were undertaken in the plantation area as well as in assigned forest area. 2 sites out of 7 sites were visited and it was observed that soil and moisture conservation measures undertaken were effective and were able to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest (excess) water.

## 6.2.2 (C1.1) Finding on activities under Compensatory Afforestation

Under Compensatory Afforestation (CA) or Penal Compensatory Afforestation (PCA), 9 ha. new plantation was taken up. Also, 2<sup>nd</sup> year maintenance of 700 ha., 3<sup>rd</sup> Year Tall Tree plantation, 4<sup>th</sup> year maintenance of 937 ha., 5<sup>th</sup> year maintenance of 33 ha., 6<sup>th</sup> year maintenance of 149 ha., 7<sup>th</sup> year maintenance of 55 ha. and 8<sup>th</sup> year maintenance of 622 ha. plantation area was done. On average, the health of the plantations is good. Casualty replacement has also been done.

#### 6.2.3 (C1.1) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C1.1) Finding on the activities under Integrated Wildlife Management

Under wild life management the major assets created mainly SMC, water body, wildlife protection squad, tracker engagement, Supply of anti-depredation equipment on use basis to primary response team of VSS under Gaja Sathi Scheme, publicity, and awareness programme - training to primary response team of VSS (Gaja Sathi), transportation and fixing charges of elephant depredation, cost of vehicle/POL /maintenance, solar fencing maintenance, engagement of fire watchers, habit improvement etc.

#### 6.2.5 (C1.1) Finding on the activities under NPV fund (A) and NPV fund (B)

NPV new creation and maintenance works done. Under ANR Plantation 1714 ha. area developed through plantation of medicinal species and other indigenous miscellaneous species plantation. The 2<sup>nd</sup> year maintenance covered 620 ha., 3<sup>rd</sup> year maintenance covered 630 ha. and 500 ha. area was covered in 4th year maintenance. The health of the plants is, on average, good. Casualty replacement has been done.

The villagers are very much aware that their day-by-day requirements are met from the forest produces. So, the protection efforts of the villagers are very good in most of the verified site.

In nursery management, at 16 nurseries about 14 lakh seedlings were raised. For raising and maintenance of seedling expenditure of Rs. 345.38 lakh was incurred including AJY. Currently most of the 18-month seedling have been planted.

#### 6.2.6 (C1.1) Update on e-green portal

Details of all activities under CAMPA APO 22-23 have been uploaded in the portal.

#### 6.2.7 (C1.1) **Other Observations**

Infrastructure development: The constructed forester quarter, forest guard quarter, culverts, causeways, and maintenance of forest road are good and utilized properly.

#### 6.2.8 (C1.1) **Images Field Survey Images**

Fodder and Fruit Plantation 50 ha. (2022-23), Kuio

# C1.2 Athagarh Division

# 6.2.1 (C1.2) Over all Physical and Financial Progress Analysis

No.	Sector	Allocation	Expenditure	Percentage
		(Rs. In lakh)	(Rs. In lakh)	
1	Forestry	1316.65	1316.65	100
2	Wildlife	279.91	218.57	78
	Total	1596.56	1535.22	89

For forest protection and fire protection/control operation Rs. 136.89 lakh expenditure was incurred.

All physical targets of new plantation, maintenance, SMC and other activities have been fully achieved. Some soil and moisture conservation activities like RCC check dam, loose boulders check dam (LBCD), staggered trenches, wire mesh LBCD were undertaken in the plantation area as well as assigned the forest area.

Three site out of 24 sites were physically verified and it was observed that soil and moisture conservation measures undertaken were found effective and functional to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest (excess) water.

### 6.2.2 (C1.2) Finding on activities under Compensatory Afforestation

No activity has been observed under this category in the division.

## 6.2.3 (C1.2) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

## 6.2.4 (C1.2) Finding on the activities under Integrated Wildlife Management

For wild life management the major assets created include SMC, water body management, plantation maintenance. Several other activities like wildlife protection squad, maintenance of boundary of protected area, monitoring of assessment and protection wildlife habitat, improvement of wildlife habitat tracker engagement, publicity & awareness programme, training to primary response team of VSS (Gaja Sathi), cost of vehicle/POL/maintenance, solar fencing and its maintenance, engagement of fire watchers, habit improvement etc. were done.

### 6.2.5 (C1.2) Finding on the activities under NPV fund (A) and NPV fund (B)

New creation and maintenance works have been undertaken from these funds. Under AR Plantation 50 ha. area developed through Bald hill plantation & Other Indigenous Misc. Species plantation. 420 ha. area has been developed through ANR plantation models Other Indigenous Misc. Species plantation.

2<sup>nd</sup> year maintenance covered 45 ha. area, 3<sup>rd</sup> year maintenance covered 1040 ha. area and 500 ha. area covered in 4<sup>th</sup> year maintenance.

The nursery management funds were used at 6 nurseries to raise about 5.52 lakh seedling. On this Rs. 176.90 lakh was spent.

# 6.2.6 (C1.2) Update on e-green portal

Portal is updated.

#### 6.2.7 (C1.2) Other Observations

Funds have been used for construction of forester quarter, forest guard quarter, causeway and for the maintenance of forest road. The assets developed are being used properly.

## 6.2.8 (C1.2) Field Survey Images

Bald Hill Plantation 10 ha. (2022-23), Khuntuni

40 Ha. ANR Plantation (2022-23), Khuntuni sadar

SMC works at Bald Hill Plantation 10 ha.(2022-23), Khuntuni

#### C1.3 Athamalik Division

### 6.2.1 (C1.3) Over all Physical and Financial Progress Analysis

In CAMPA APO 2022-23, the Division was allocated Rs. 590.58 lakh under forestry sector. The expenditure was 100%. For forest protection and fire protection/control operation Rs. 148.11 lakh was spent. For Wildlife management from the allocated Rs. 148.2725 lakh the expenditure was Rs. 129.4511 - 87% of the target. The raising of new plantation, maintenance other activities was fully completed against target. However, in case of SMC, only 550 ha completed against target of 1000 ha. The achievement is only 55%. The department has executed some soil & moisture conservation activities like RCC check dam, loose boulders check dam (LBCD), staggered trenches, wire mesh LBCD in the plantation area as well as in other forest areas. One site out of 2 sites was visited and it was observed that soil and moisture conservation measures undertaken were effective and functional to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest (excess) water.

#### 6.2.2 (C1.3) Finding on activities under Compensatory Afforestation

In Compensatory Afforestation (CA) or Penal Compensatory Afforestation (PCA) 48 ha. new plantation was taken up. 2<sup>nd</sup> year maintenance of 254 ha. and 7<sup>th</sup> year maintenance of 710 ha. plantation area was also done. The plantations are on an average good. The casualties have also been replaced.

#### 6.2.3 (C1.3) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

# 6.2.4 (C1.3) Finding on the activities under Integrated Wildlife Management

Under wild life management the major assets created include anti-poaching barrack, water body. The other activities include engagement of wildlife protection squads, maintenance of boundary of protected area, monitoring of assessment and protection wildlife habitat, improvement of wildlife habitat tracker engagement, supply of anti-depredation equipment on use basis to primary response team of VSS under Gaja Sathi Scheme, publicity and awareness programme, training to primary response team of VSS (Gaja Sathi), transportation and fixing charges of elephant depredation, cost of vehicle/POL / maintenance, solar fencing its maintenance, engagement of fire watchers, habit improvement etc.

### 6.2.5 (C1.3) Finding on the activities under NPV fund (A) and NPV fund (B)

NPV new creation and maintenance works done. Under ANR plantation 310 ha. area developed through plantation like Vanya silk & Other Indigenous Misc. Species plantation. Additionally, 2<sup>nd</sup> year

maintenance covered 50 ha., 3<sup>rd</sup> year maintenance covered 180 ha. and 50 ha. was covered in 4<sup>th</sup> year maintenance. The health of the plants is on an average good. The casualties have been replaced.

Regarding protection measures villagers are very much aware that their day-by-day requirements are met from the forest produces. So, the protection efforts of the villagers are very good in most of the verified site.

Under nursery management 10 numbers of nurseries raised about 6.5 lakh seedling. For raising and maintenance of seedling Rs. 32.10 lakh expenditure has been incurred. At present most of the 18-month seedling have been planted.

#### 6.2.6 (C1.3) Update on e-green portal

All activities under CAMPA during 22-23 have been uploaded in the portal.

#### 6.2.7 (C1.3) Other observation

Infrastructure development that included the construction of forester quarter, forest guard quarter, culvert, causeway, and maintenance of forest road has been done variously in the Division. The constructions are of good quality and are being utilized properly.

#### 6.2.5 (C1.3) Field Survey Images

#### **C1.4 Cuttack Division**

#### 6.1.1 (C1.4) Over all Physical and Financial Progress Analysis

In CAMPA APO 2022-23 there was an allocation of Rs. 1664.21 lakh under forestry sector. Of this the expenditure incurred was Rs. 1650.87 lakh or 99%. In case of forest protection and fire protection/control operation Rs. 167.53 lakh expenditure was incurred. From Wildlife management funds the allocation was Rs. 476.28 lakh from which the expenditure was Rs. 450.46 – an achievement of 94.5%. The physical targets of new plantation, maintenance and SMC activities etc. were fully achieved. The department has executed some soil and moisture conservation activities like Graded Bund, Guided Bund Small, Diaphragm within the plantation area as well as in designated places in other forest areas. Two such sites were visited and it was observed that soil and moisture conservation measures undertaken were effective and functional in the control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest (excess) water.

#### 6.2.2 (C1.4) Finding on activities under Compensatory Afforestation

In Compensatory Afforestation (CA) or Penal Compensatory Afforestation (PCA) there was P.O. for 2023-24 of 9 ha., creation of new plantation 202 ha., 2<sup>nd</sup> year maintenance of 5 ha., 3<sup>rd</sup> year maintenance of 131 ha., 4<sup>th</sup> year maintenance of 131 ha., 5<sup>th</sup> year maintenance of 3ha., 6<sup>th</sup> year maintenance of 61ha. and 7<sup>th</sup> year maintenance of 5ha. All targets were fulfilled. Overall, the plantations are good. Casualty replacement has also been done.

#### 6.2.3 (C1.4) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C1.4) Finding on the activities under Integrated Wildlife Management

Under wild life management the major assets created include SMC, water body, plantation maintenance and other like wildlife protection squad, maintenance of boundary of protected area, monitoring of assessment and protection wildlife habitat, improvement of wildlife habitat tracker engagement, Supply of Anti-depredation equipment on use basis to primary response team of VSS under Gaja Sathi Scheme, publicity and awareness programme, training to primary response team of VSS (Gaja Sathi), transportation and fixing charges of elephant depredation, cost of vehicle/POL /maintenance, solar fencing and its maintenance, engagement of fire watchers, habit improvement etc.

## 6.2.5 (C1.4) Finding on the activities under NPV fund (A) and NPV fund (B)

NPV new creation and maintenance works done. Under AR plantation 175 ha. area developed through River Rejuvenation Plantation and Other Indigenous Misc. Species plantation, 1550 ha. developed through ANR plantation like Vanya silk, Fodder and Fruits and Other Indigenous Misc. Species plantation. Also, 2<sup>nd</sup> year maintenance covered 1440 ha., 3<sup>rd</sup> year maintenance covered 505 ha. area and 646 ha. was covered in 4<sup>th</sup> year maintenance.

In the management of nurseries about 12.86 lakh were raised in 17 of nurseries. Rs. 345.77 lakh expenditure was incurred on this work. Most of the 18-month seedlings have been planted in the field. The infrastructure such as forest guard quarter, seizure yard, causeway, culverts, and maintenance of forest road that has been developed or created with the funds are all in good use.

#### 6.2.6 (C1.4) Update on e-green portal

All requisite details of CAMPA during 22-23 have been uploaded in the portal.

## 6.2.7 (C1.4) Other Observations

There are no observations for this section.

#### 6.2.8 (C1.4) Field Survey Images

#### **C1.5** Dhenkanal Division

## 6.2.1 (C1.5) Over all Physical and Financial Progress Analysis

There was an allocation of Rs. 2369.94 lakh under forestry sector and the entire amount was spent on works. For forest protection and fire protection/control operation Rs. 223.91 lakh expenditure has been incurred. In Wildlife management of the allocated Rs. 1191.568 lakh the expenditure is Rs. 880. 024 lakh or 74% of the allocation. All physical targets of new plantation, maintenance, SSO Bamboo and SMC activities have been fully achieved. The department has executed some soil and moisture conservation activities like RCC check dam, LBCD, Staggered Trench inside plantation areas as well as

at selected spots in the forest area. Two out of 9 sites were visited and it was observed that soil and moisture conservation measures undertaken were found effective and functional to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest (excess) water.

#### 6.2.2 (C1.5) Finding on activities under Compensatory Afforestation

During the referred period with the provisions under Compensatory Afforestation (CA) or Penal Compensatory Afforestation (PCA) there was P.O for 2023-24 of 49 ha., creation of new plantation 1177 ha., 3<sup>rd</sup> year maintenance of 7 ha., 4<sup>th</sup> year maintenance of 674 ha., 5<sup>th</sup> year maintenance of 371 ha., 6<sup>th</sup> year maintenance of 530 ha., 7<sup>th</sup> year maintenance of 32 ha and 8<sup>th</sup> year maintenance of 171 ha. plantation. The health of the plants is on an average good. The casualty's replacement has also been done.

#### 6.2.3 (C1.5) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C1.5) Finding on the activities under Integrated Wildlife Management

Under wildlife management the major assets created include watch tower, SMC, water body, plantation maintenance and other activities mainly like wildlife protection squad, maintenance of boundary of protected area, monitoring of assessment and protection wildlife habitat, improvement of wildlife habitat etc.

Also, tracker engagement, supply of anti-depredation equipment on-use basis to primary response team of VSS under Gaja Sathi Scheme, publicity and awareness programme, training of primary response team of VSS (Gaja Sathi), transportation and fixing charges of elephant depredation, cost of vehicle/POL/maintenance, solar fencing its maintenance, engagement of fire watchers, habit improvement etc. was also done.

#### 6.2.5 (C1.5) Finding on the activities under NPV fund (A) and NPV fund (B)

From the allocation from NPV, new creation and maintenance works done. AR Plantation of 140 ha. area have been developed through Fodder and Fruits Plantation and Other Indigenous Misc. Species.

Around, 514 ha. area developed through ANR plantation like Vanya silk, Fodder and Fruits and Other Indigenous Misc. species plantation. Also, 2<sup>nd</sup> year maintenance covered 524 ha., 3<sup>rd</sup> year maintenance covered 1031 ha. and 600 ha. was covered in 4<sup>th</sup> year maintenance. Around, Rs 321 lakh was spent for Nursery management at 12 nurseries where about 12 lakh seedlings were raised. At present most of the 18-month seedling have been planted out in the field.

The infrastructure developed includes - forest guard quarter, Cause Way, Culvert, and maintenance of forest road. The constructions are good and utilized properly.

#### 6.2.6 (C1.5) Update on e-green portal

The portal is updated.

#### 6.2.1 (C1.5) Other Observations

There are no observations for this section.

## 6.2.8 (C1.5) Field Survey Images

#### **C1.6 Mahanadi Wildlife Division**

#### 6.2.1 (C1.6) Overall Physical and Financial Progress Analysis

In the CAMPA APO 2022-23 the target under forestry sector was Rs. 171.75 lakh and under Wildlife management it was Rs. 277.54 lakh. Both amounts have been fully utilized. The SMC target of 350 ha. has also been fully achieved. The department has executed some soil and moisture conservation activities like RCC check dam, LBCD, WLBCD, sub-surface dyke in the plantation areas as well as at assigned forest areas. Two sites out of 4 sites were visited and it is observed that soil and moisture conservation measures undertaken were found effective and functional to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest (excess) water.

## 6.2.2 (C1.6) Finding on activities under Compensatory Afforestation

No activity was observed under this category in this division.

## 6.2.3 (C1.6) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C1.6) Finding on the activities under Integrated Wildlife Management

Under wildlife management the major assets created include anti-poaching barrack, maintenance of forest road, streamlining of communication facilities etc. Other activities like wildlife protection squad, maintenance of boundary of protected area, monitoring of assessment and protection wildlife habitat, improvement of wildlife habitat tracker engagement, forest fire prevention and control operation. Supply of anti-depredation equipment on use basis to primary response team, publicity and awareness programme, training to primary response team, transportation and fixing charges of anti-depredation squad, cost of vehicle/POL/maintenance, solar fencing and its maintenance, engagement of fire watchers, habit improvement etc. was also done.

The infrastructure developed such as the constructed forest guard quarter, causeway, and culvert are of good and are being utilized properly.

## 6.2.5 (C1.6) Finding on the activities under NPV fund (A) and NPV fund (B)

No activity has been observed under the category in this division.

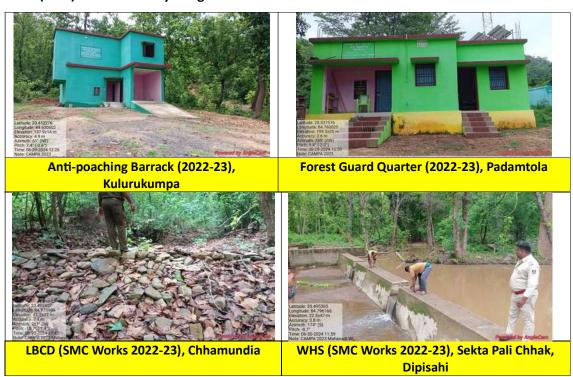

#### 6.2.6 (C1.6) Update on e-green portal

All details of work and expenditure have been updated.

#### 6.2.7 (C1.6) Other Observations

There are no observations for this section.

#### 6.2.8 (C1.6) Field Survey Images

#### **C1.7 Satakosia Wildlife Division**

#### 6.2.1 (C1.7) Over all Physical and Financial Progress Analysis

No.	Sector	Allocation	Expenditure	Percentage
		(Rs. In lakh)	(Rs. In lakh)	
1	Forestry	299.6975	217.4679	72.5
2	Wildlife	6750.39	6705.51	99
	Total	7050.08	6922.98	98.2

The physical target of SMC was 400 ha. of which the achievement is 255 ha. or 64% of the target. The division has executed some soil and moisture conservation activities like RCC check dam, LBCD, WLBCD were prepared in the plantation areas as well as at specific points in the forest area.

One site out of 5 sites was visited and it was observed that soil and moisture conservation measures undertaken were found effective and functional to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest (excess) water.

#### 6.2.2 (C1.7) Finding on activities under Compensatory Afforestation

No activity was observed under this category in this division.

#### 6.2.3 (C1.7) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

## 6.2.4 (C1.7) Finding on the activities under Integrated Wildlife Management

For wildlife management the major assets created include the fixing of Automatic Weather Station, watch tower, anti-poaching barrack, maintenance of forest road, voluntary relocation of village from protected areas, plantation of fruit bearing and fodder species around water bodies, creation, and maintenance of salt licks, stretching of communication facilities etc.

Other activities mainly engagement of wildlife protection squad, maintenance of boundary of protected area, monitoring of assessment and protection wildlife habitat, improvement of wildlife

habitat tracker engagement, forest fire prevention and control operation, supply of anti-depredation equipment on use basis to primary response team, publicity and awareness programme, training to primary response team, transportation and fixing charges of anti- depredation squad, cost of vehicle/POL /maintenance, solar fencing and its maintenance, engagement of fire watchers, habit improvement etc. have also been done.

#### 6.2.5 (C1.7) Finding on the activities under NPV fund (A) and NPV fund (B)

With an expenditure of Rs. 6.17 lakh about 1 lakh seedlings had been raised at four nurseries and currently most of the plants have been planted out in the field.

## 6.2.6 (C1.7) Update on e-green portal

The portal is updated.

#### 6.2.7 (C1.7) Other Observations

The infrastructure developed includes Range Officer residence, forester quarter, forest guard quarter, causeway, and culvert. The constructions are being utilized properly.

## 6.2.8 (C1.7) Field Survey Images

## 6.2 (C2) CIRCLE BARIPADA

There are 7 forest divisions in Baripada Circle – 3 territorial and 4 wildlife divisions, viz., Balasore WL, Baripada, Karanjia, Keonjhar WL, Rairangpur, Similipal North WL, and Similipal South WL.

Subsequent 5 tables provide information for the Circle, followed by division-wise observations organized under 8 sub-sections. In Baripada Circle total expenditure incurred is around Rs. 67.22 Cr. of which Rs. 49.28 Cr. has been spent by the forest wing, and around Rs. 19.93 Cr. has been spent by the wildlife wing of the forest department.

Table C2.6.1.1: Financial Achievements in Baripada Circle as per the APO (Rs. In lakh)

Name of Division	Forestry Activities (General)	Wildlife Management	Total Expenditure Incurred
Balasore WL	435.83	212.70	648.53
Baripada	1,108.12	104.27	1,212.39
Karanjia	680.65	302.98	983.63
Keonjhar WL	856.15	330.18	1,186.33
Rairangpur	972.98	134.47	1,107.45
Similipal North	551.74	436.88	988.62
Similipal South	323.17	471.49	794.65
Total	4,928.64	1,992.96	6,921.59

Table C2.6.1.2: Study Coverage in Baripada Circle – Plantation CA/PCA/NPV (Creation & Maintenance) including Without Gap, SMC & SSO (Bamboo)

Division	Area Covered (ha)	Evaluated Area in ha.	% of area evaluated	No. of Total Sites	Sample to be Covered	No. of Sites covered	% of Verification
Baripada	1575.00	320.00	20%	31	3	7	23%
Karanjia	2235.00	330.00	15%	57	6	8	14%

Total	445.67	443.93	443.93	100%

In subsequent subsections division-wise observations are presented. The data has been collected from field level and specific to the activities being observed. Thus, this may not add-up to the circle totals.

#### **C2.1** Balasore Wildlife Division

#### 6.2.1 (C2.1) Overall Physical and Financial Progress Analysis

NPV	No of Sites	Physical	Financial
<u>Current Year (2022-23)</u>		(Area in ha.)	(Rs. in Lakh)
ANR @ 200/ha	1	60	9.62
AR(Casuarina) @ 2500/ha	4	40	44.78
2 <sup>nd</sup> Year Maintenance of (2021-22) Plantation			
ANR @ 200/ha	1	50	3.51
AR @ 1600/ha	3	20	6.63
AR Bamboo @ 400/ha	1	10	2.49
Total			12.63
3rd Year Maintenance of (2020-21) Plantation			
ANR @ 200/ha	2	70	4.50
AR @ 1600/ha	2	30	7.88
AR Bamboo @ 400/ha	2	20	3.37
Total			15.75

#### 6.2.2 (C2.1) Finding on activities under Compensatory Afforestation

No activity was observed under the category in this division.

#### 6.2.3 (C2.1) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity was observed under the category in this division.

## 6.2.4 (C2.1) Finding on the Activities Integrated Wildlife Management Plan

This Division has a protected area i.e. Kuldiha Sanctuary. It is affected by migratory elephants. Lot of activities like maintenance of forest road/path, maintenance of fire lines, engagement of firefighting

squads, construction of watch tower, cattle vaccination, animal health camp, invasive weed eradication, construction of watch tower for monitoring the movement of the wild animals and poachers have been undertaken. Total amount of Rs. 212.70 lakh has been spent during financial year 2022-23.

#### 6.2.5 (C2.1) Finding on the Activities under NPV Fund (A) and NPV Fund (B)

**NPV(A):** Total ANR plantation of 60.0 ha. has been taken up at 01 site and an amount of Rs. 62 lakh has been spent for the same. Beside this 40 ha of *Casuarina* plantation has been taken up in AR mode (Block Plantation) at 4 sites at a cost of Rs. 44.78 lakh.

**NPV(B):** Total amount of Rs. 28.38 lakh has been spent towards 2<sup>nd</sup> year, 3<sup>rd</sup> year maintenance of plantation (AR, ANR & Bamboo).

## 6.2.6 (C2.1) Update on e-green Portal

The concerned IT staff is aware of the portal. It was found to be incomplete. The entry of data is ongoing and the same would be completed was the assurance given by the D.E.O. of Division office.

#### 6.2.7 (C2.1) Other Observations

Besides all above mentioned activities, a lot of works have been taken up under SMC and Infrastructure Development activities. LBCD structures have been done along the foot hill side of Kuldiha Sanctuary, where dense green cover has came up due to retaintion of soil moisture for a long time and which also play a natural role for the herbivores. Beside this, 02 nos Forester quarters, 05 nos Forest Guard quarters, maintenance of road over 30 km. inside protected area, 05 culverts and 12 causeways on the forest road have been constructed for better management. Beside this, nice Bamboo plantations have been taken up in this Division. These Bamboo plantations have been taken up in the areas of movement of migratory elephants. Awareness programmes are being conducted regularly in the villages regarding fire protection. Wild life protection, documentation and record keeping at Range level are best to my satisfaction.

#### 6.2.8 (C2.1) Field Survey Images

## **C2.2** Baripada Division

## 6.2.1 (C2.2) Over all Physical and Financial Progress Analysis

#### CA PCA:

	No of Sites	Physical	Financial
		(Area in ha.)	(Rs. in lakh)
1st Year Creation of ANR plantation	1	35	34.72
NPV 1st Year Creation			
AR @ 500/hectare	2	200	67.59
ANR @ 500/hectare	10	200	67.59
ANR @ 200/hectare	3	230	44.74
Total	15	630	179.92
ANR @ 1000/hectare	3	250	21.58
2 <sup>nd</sup> Year Maintenance			
ANR @ 200/hectare	1	260	17.80
AR @ 1600/hectare	1	25	8.29
Bald Hill @ 1600/hectare	1	10	4.31
Total			30.40
3rd Year Maintenance			
AR @ 1600/hectare	2	40	10.51
4th Year Maintenance			
ANR @ 200/hectare	2	500	23.51
AR @ 1600/hectare	1	50	3.36
Total			26.87

#### 6.2.2 (C2.2) Finding on activities under Compensatory Afforestation

Creation of only ANR plantation over an area of 35 ha. No maintenance of any type of plantation was done under the head CA, PCA. Average height plants are excellent and on an average 200 cm and survival is more than 95%.

#### 6.2.3 (C2.2) Finding on activities under catchment Area Treatment (CAT) Plan

No activity was observed under the category in this division.

## 6.2.4 (C2.2) Finding on the activities under Integrated Wildlife Management

Throughout the year the entire division area is heavily affected by the migratory elephants from the bordering states. For these elephants, water bodies have been created. Awareness steps are been

taken up for the villagers which are more affected by the migratory elephants. Regular training camps are organised at Division and Range level for the field staff as well as PA staff.

#### 6.2.5 (C2.2) Finding on the activities under NPV fund (A) and NPV fund (B)

**NPV Fund (A):** In all, ANR of 630 ha. of plantations have been raised at 15 sites and amount of Rs. 179.92 lakh has been spent for the same. Similarly, 25 ha. of AR plantation (1000/hectare) have been taken up with an expenditure of Rs. 21.53 lakh.

**NPV Fund (B):** Total 885 ha. of plantation (both ANR AR & Bald hill) have been taken up in the said Head of Service. Total amount of Rs. 67.78 lakh have been spent.

#### 6.2.6 (C2.2) Update on e-green portal

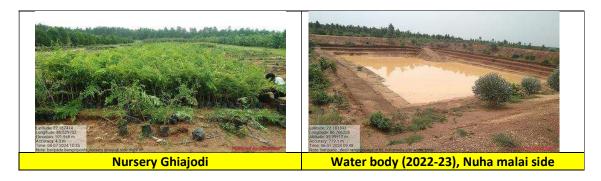

The IT staff are aware of this. But this portal is not being used for updating of information from Range level to Division. This issue needs to be redressed on priority.

#### 6.2.7 (C2.2) Other Observations

- 1. Steps have been taken up for the infrastructure development activities. Total 03 Forester Quarter (@ Rs. 61.17 lakh), 06 Forest Guard Quarter (@ Rs. 97.74 lakh), 02 Seizure Yards (@ Rs. 24.00 lakh) have been constructed.
- 2. Steps have been taken up for fire protection of the entire forest area of this division.
- 3. Steps have been taken up for creating awareness among the villagers and field staff for protection of Forest and Wildlife.
- 4. Record Keeping in the Range Office is appreciable. All the concerned register and related documents have been maintained update.

#### 6.2.8 (C2.2) Field Survey Images

## C2.3 Karanjia Division

## 6.2.1 (C2.3) Overall Physical & Financial Progress Analysis

NPV Plantation		No of Sites	Physical	Financial
1 <sup>st</sup> Year Plantation (2022-23)			(Area in ha.)	Target
				(Rs. in Lakh)
ANR RET/Medicinal Spc @ 200/ha		7	200	38.91

3 <sup>rd</sup> Year Maintenance (2020-21)				
ANR @ 200/ha		14	750	49.17
4 <sup>th</sup> Year Maintenance (2019-20)				
ANR @ 200/ha		8	500	23.51
AR(Block) @ 1600/ha		12	100	6.70
	Total	20	600	30.21

#### 6.2.2 (C2.3) Finding on the activities under Compensatory Afforestation

No activity was observed under the category in this division.

#### 6.2.3 (C2.3) Finding On activities under Catchment area treatment (CAT) Plan

No activity was observed under the category in this division.

#### 6.2.4 (C2.3) Finding on the activities under Integrated Wildlife Management

This Division is situated adjoining to Similipal North Division of Similipal Tiger Reserve and affected by the migratory elephants from adjoining district Keonjhar and adjoining state of Jharkhand. A lot of wildlife management activities are being taken up in this Division, like maintenance of forest road/path, maintenance of fire lines, engagement forest fire control squads, construction of watch tower to keep watch on wild animals, forest fire as well as illegal transport of forest product. Cattle vaccination, animal health camps, awareness programme regarding forest fire and wildlife protection are being organised regularly at field level inviting the local villagers. Total amount of Rs. 302.98 lakh has been spent during the financial year 2022-23, towards different wildlife management activities.

## 6.2.5 (C2.3) Finding on the activities under NPV(A) and NPV(B)

**NPV(A):** ANR plantation of 465 ha. at 15 sites has been taken up. For these activities, total amount of Rs. 90.46 lakh has been spent.

**NPV(B):** Total amount of Rs. 106.76 lakh has been spent towards 2<sup>nd</sup> year, 3<sup>rd</sup> year, and 4<sup>th</sup> maintenance activities of previous plantations (both AR & ANR).

#### 6.2.6 (C2.3) Update on e-green Watch Portal

The concerned IT staff (DEO) of Division office is aware of this portal. But no CAMPA data have been uploaded in this portal, starting from Range level to Division level. This situation need immediate redressal.

#### 6.2.7 (C2.3) Other Observations

Besides all above mentioned activities, a lot of works have been taken up under SMC and Infrastructure Development activities. LBCD structures have been constructed at vulnerable areas taking topographic conditions. Due to construction of SMC, LBCD structures the quantum of soil moisture has increased, consequently the regeneration of local species of plants has been increased to a great extent. Beside this 03 Forest quarters, 05 Forest Guard quarters, 01 seizure yard, 01 watch tower have been constructed. Documentation and Record keeping at Range level is satisfactory.

## 6.2.2 (C2.4) Finding on activities under Compensatory Afforestation

Creation of AR (Block) Plantation (@1000/ha) over an area of 2.0 ha and 2<sup>nd</sup> year, 3rd year, 5th year, 6<sup>th</sup> year, 7<sup>th</sup> year maintenance of plantations has been taken up under the head CA, PCA. Average height of plants is excellent i.e. on average of 135cm to 467cm depending on the age. The survival percentage varies from 70% to 90%.

#### 6.2.3 (C2.4) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity was observed under the category in this division.

#### 6.2.4 (C2.4) Finding on the activities under Integrated Wildlife Management

This is a division with activities of mining. Here wildlife management and protection of forest is important as the Hadgarh Sanctuary comes under this Division which relates to Similipal Tiger Reserve. There is frequent movement of animals, especially elephants in this area. A lot of activities are being carried out from the point of wildlife management. These include maintenance of boundary of protected area, fire line creation and maintenance, cattle vaccination/ awareness and animal health camp, invasive weed eradication in protected area, creation and maintenance of meadows, maintenance of roads/paths, construction of watch tower etc. Total amount of Rs. 330.18 lakh has been spent towards wildlife management activities.

#### 6.2.5 (C2.4) Finding on the activities under NPV fund (A) and NPV fund (B)

**NPV (A):** ANR plantation of 1200 ha. has been taken up at 09 sites and an expense of Rs.233.95 lakh. Similarly, AR plantations of 61 ha. at 11 sites have also been taken up incurring a cost of Rs.71.96 lakh.

**NPV (B):** Amount of Rs.253.87 lakh has been spent towards maintenance of 3000 ha. of ANR plantation of different financial year i.e. 2019-20, 2020-21, 2021-22.

#### 6.2.6 (C2.4) Update on e-green portal

Although the staff is aware of the need to fully update the Details of all activities under CAMPA APO 22-23, but only some information has been uploaded in the portal.

#### 6.2.7 (C2.4) Other Observations

Besides above mentioned activities under infrastructure a lot of development activities are being carried out. Construction of Watch tower (01), Culverts (10), Causeway (19), LBCD(238), have been done with CAMPA funds. Documentation and record keeping at Range level are satisfactory.

#### 6.2.8 (C2.4) Field Survey Images

4th Year Maintenance of (2019-20) Plantation	1	50.0	2.05
Total		1131.00	100.24

#### 6.2.2 (C2.5) Finding on activities under Compensatory Afforestation

Creation of AR plantation (@1600plants/ha.) over an area of 4.78 ha and 2<sup>nd</sup> year maintenance of plantation have been taken up under the head CA/PCA. Average height of plants is excellent i.e. on an average of 150 cm to 200 cm and survival percentage ranges between 85% - 95%.

#### 6.2.3 (C2.5) Finding on activities under catchment Area Treatment (CAT) Plan

No activity under the category was observed in this division.

#### 6.2.4 (C2.5) Finding on the activities under Integrated Wildlife Management

This Division's area is affected by the migratory wild elephants from the adjoining district as well from Jharkhand. This division adjoins Similipal Tiger Reserve and therefore lot of activities are being taken up for wildlife management. Activities like, maintenance of forest roads/path, maintenance of fire line, steps for cattle vaccination, animal health camp, construction of watch tower for monitoring like movement of wild animals, invasive weed eradication, creation, and maintenance of meadows etc are being taken up regularly. For this purpose, total amount of Rs. 134.47 lakh was allocated under CAMPA wildlife management has spent during financial year 2022-23. Regular training camps are being organised at Division level and Range level.

#### 6.2.5 (C2.5) Finding on the activities under NPV fund (A) and NPV fund (B)

**NPV Fund (A):** Total ANR plantation of 1468.00 ha has been taken up at 36 sites and an amount of Rs 331.08 lakh have been spent on the same. Besides this total 63.00 ha. AR plantations have also been taken up in 06 sites and for which Rs. 70.68 lakh has been spent.

**NPV Fund(B):** Total amount of Rs 100.24 lakh has been spent towards 2<sup>nd</sup> year, 3<sup>rd</sup> year and 4<sup>th</sup> year maintenance of plantation (AR and ANR) during the financial year 2022-23.

#### 6.2.6 (C2.5) Update on e-green portal

The IT staff is aware and the data has partially been uploaded. The staff has assured that this would be completed shortly.

#### 6.2.7 (C2.5) Other Observations

Infrastructure development - 01 FR quarter, 01 watch tower, 238 number of LBCD have been constructed. Steps have been taken up for preventing forest fire on the entire forest area of the division. Initiative has been taken for creating awareness among the villagers at field level.

## 6.2.8 (C2.5) Field Survey Images

## C2.6 Similipal North (WL) Division

## 6.2.1 (C2.6) Over all Physical and Financial Progress Analysis

Similipal North Division is one of the two divisions of Similipal Tiger Reserve. As the entire area of this division is a protected area, only development and protective activities are carried out. The activities are detailed as follows:

SI No	Particulars	Expenditure
		(Rs. in lakh)
1	Monitoring change	20.68
2	Forest Protection	3.77
3	Infrastructure Development	528.30
4	Internet Charges for Fire Protection	0.87
	Wildlife Management	436.88

Under infrastructure development the following construction were done:

Particulars	Number/Length	Amount
		( in lakh)
Range Officers Residence	01	24.521
Forester Quarter	05	101.945
Forest Guard Quarter	12	195.480
Seizure Yard	07	84.000
Construction & Maintenance of Forest Road	100 km	69.004
Culvert	03	4.590
Cause way	46	48.760
Creation & Maintenance of Fire line (under WLM)	968 km	30.492
Construction of Watch Tower (under WLM)	01	20.000
Maintenance of Forest Road (under WLM)	130 km	89.700
Creation & Maintenance of Meadow (under WLM)	150.15 ha	37.500
Construction of Anti-poaching Barrack (under WLM)	01	20.00
Total:		725.992

#### 6.2.2 (C2.6) Finding on activities under Compensatory Afforestation

No CA, PCA or any other plantation activities were taken up. As the entire division area is protected area only development and protective activities have been taken up. Protection, assessment and monitoring of RET species and their habitat was done outside the protected area.

#### 6.2.3 (C2.6) Finding on activities under catchment Area Treatment (CAT) Plan

No activity was observed under the category in this division.

#### 6.2.4 (C2.6) Finding on the activities under Integrated Wildlife Management

The following activities have been taken up under Integrated Wildlife Management - protection and anti-depredation activities, maintenance of boundary of Protected Area, rescue and release of wild animals and the protection activities, publicity and awareness programme including training and capacity building, cattle vaccination/ awareness and animal health camp, invasive weed eradication, habitat restoration post natural disaster in *ex-situ* and *in-situ* conservation areas, creation and maintenance of fire lines, construction of watch tower, maintenance of forest road, creation and maintenance of meadows, construction of anti-poaching barrack, installation of VHF base station and maintenance thereof including satellite tracking.

## 6.2.5 (C2.6) Finding on the activities under NPV fund (A) and NPV fund (B)

No activity was observed under the categories in this division.

#### 6.2.6 (C2.6) Update on e-green portal

The IT staff is aware of the same, but no data related to activities of APO 2022-23 has been uploaded.

#### 6.2.7 (C2.6) Other Observations

All constructions under Infrastructure development are as per the approved plan. Documentation and record keeping at Range level are all up-to-date.

## 6.2.8 (C2.6) Field Survey Images

## **C2.7 Similipal South Wildlife Division**

## 6.2.1 (C2.7) Over all Physical and Financial Progress Analysis

Similipal South Division is one of the two divisions of Similipal Tiger Reserve. As the entire area of this division is a Protected Area, only development and protective activities are being carried out. Which are as follows:

## CA, PCA

Under this head all the protection measures have been taken up specially for boundary protection and mobile patrolling. Under infrastructure Development following construction has been done

Туре	Total No.	Amount (Rs. in lakh)
Range Office	01	31.65
Range Officers Residence	01	24.52

Forester Quarter	05	101.95
Forest Guard Quarter	07	114.03
Seizure Yard	02	24.00
	Total:	296.15

Under CAMPA Wildlife Management 02 anti-poaching barracks have been constructed at cost of Rs. 20 lakh. Beside this, steps have been taken for the habitat management and wildlife protection of entire protected area of the division.

#### 6.2.2 (C2.7) Finding on activities under Compensatory Afforestation

As the entire division area is a Protected Area, only development and protection activities have been taken up. Afforestation activities have not been undertaken.

#### 6.2.3 (C2.7) Finding on activities under catchment Area Treatment (CAT) Plan

No activity was observed under the category in this division.

#### 6.2.4 (C2.7) Finding on the activities under Integrated Wildlife Management

The following activities have been taken up under Integrated Wildlife Management during financial year 2022-23.

- (i) Protection and Anti depredation activities.
- (ii) Rescue and release of wild animals.
- (iii) Equipment for monitoring of wild animals.
- (iv) Protection of wildlife and its habitat.
- (v) Maintenance of forest roads.
- (vi) Invasive weed eradication in 17 locations in this division for creation of ideal pasture land for herbivores.
- (vii) Creation and maintenance of meadow.
- (viii) Maintenance of mobile veterinary unit service.
- (ix) Maintenance of boundary of protected area.
- (x) Creation and maintenance of file lines in the entire area of the Division.
- (xi) Procurement of firefighting equipment.

#### 6.2.5 (C2.7) Finding on the activities under NPV fund (A) and NPV fund (B)

No activity was observed under the category in this division.

#### 6.2.6 (C2.7) Update on e-green portal

The IT staff is aware of the same, but no data related to the work under review has been updated.

#### 6.2.7 (C2.7) Other Observations

All constructions under Infrastructure Development are as per the approved plan. Documentation and record keeping at Range level are up to date.

## 6.2.8 (C2.7) Field Survey Images

## 6.2 (C3) Berhampur Circle

There are 7 forest divisions in the Berhampur circle – all are territorial divisions, viz., Balliguda, Berhampur, Boudh, Ghumusur North, Ghumusur South, Parlakhemundi, and Phulbani.

Subsequent 5 tables provide information for the Circle, followed by division-wise observations organized under 8 sub-sections. In Berhampur Circle total expenditure incurred is around Rs. 130.17 Cr. of which Rs. 122.36 Cr. has been spent by the forest wing, and around Rs. 7.8 Cr. has been spent by the wildlife wing of the forest department.

Table C3.6.1.1: Financial Achievements in Berhampur Circle as per the APO (Rs. In lakh)

Name of Division	Forestry Activities	Wildlife	Total Expenditure	
	(General)	Management	Incurred	
Balliguda	2,328.76	94.38	2,423.14	
Berhampur	1,378.00	200.62	1,578.62	
Boudh	1,813.76	206.74	2,020.50	
Ghumusur North	1,366.94	106.57	1,473.51	
Ghumusur South	1,632.50	86.96	1,719.46	
Parlakhemundi	1,366.98	75.23	1,442.21	
Phulbani	2,348.87	10.28	2,359.15	
Total	12,235.81	780.78	13,016.58	

Table C3.6.1.2: Study Coverage in Berhampur Circle – Plantation CA/PCA/NPV (Creation & Maintenance) including Without Gap, SMC & SSO (Bamboo)

Division	Area Covered (ha)	Evaluated Area in ha.	% of area evaluated	No. of Total Sites	Sample to be Covered	No. of Sites covered	% of Verification
Baliguda	17160.00	5710.00	33%	230	23	39	17%

Total	514.37	514.37	514.37	100%

In subsequent subsections division-wise observations are presented. The data has been collected from field level and specific to the activities being observed. Thus, this may not add-up to the circle totals.

## 6.2 (C3.1) Balliguda Division

## 6.2.1 (C3.1) Over all Physical and financial Progress analysis

## **Physical Progress:**

Category	1 <sup>st</sup> Year	2 <sup>nd</sup> Year	3 <sup>rd</sup> Year	4 <sup>th</sup> Year	Total
	(2022-23)	(2021-22)	(2020-21)	(2019-20)	
AR	95	190	80	20	385 ha.
(BHP, Bamboo, Block)					(49 Sites)
ANR with GAP	1875	1800	1580	820	6075 ha.
					(162 Sites)
SMC	21 Sites (	800 ha.)			
SSO Bamboo	12 Coupe	es (6000 ha.)			
Infrastructure	16 Sites (	5 FG Shed, 6 Ro	ad, 5 Causeway)		
	With GAI	P (20 Sites - 100	0 ha.)		3100 ha.
AJY, ANR	Without GAP (42 Sites - 2100 ha.) (62				
	Sites)				
Nursery	(2023, January) Seedlings - 5,12,600 numbers				

Awareness Training - 05 Nos., Fire line - 125 km., Vehicle - 05, Squad - 70 Nos. etc. Fire protection work was done.

## **Financial Progress:**

Allotment (Rs. In lakh)	23.15 Cr.	100%
Expenditure (Rs. In lakh)	22.54 Cr.	97.40%
Surrender (Rs. In lakh)	61.00	2.60%

#### 6.2.2 (C3.1) Finding on activities under Compensatory Afforestation

No activity has been observed under the category in this division.

#### 6.2.3 (C3.1) Finding On activities under Catchment area Treatment (CAT) Plan

No activity has been observed under the category in this division.

## 6.2.4 (C3.1) Finding on the activities under Integrated Wildlife Plan

Under wildlife plan - 5 squads, 3 vehicles and one watch tower constructed in Kotgada Wildlife Sanctuary.

## 6.2.5 (C3.1) Finding on the activities under NPV fund (A) and NPV fund (B)

NPV (A): Creation over 95 ha. AR & 1875 ha. ANR.

NPV (B): Maintenance of 290 ha. AR & 4200 ha. ANR.

## 6.2.6 (C3.1) Update on e-green portal

E- Green portal is updated with the physical and financial achievements and maps.

#### 6.2.7 (C3.1) Other Observations

- (a) Watch tower at interior place done nicely.
- (b) Nurseries at Balliguda and Brahmanigaon are excellent.
- (c) Bald Hill Plantation of Daringbadi, Belghar, Kotgada and K. Nuagaon are good. Pure patch Planting of Jack Fruit and Amla is very nice for tribal economy.
- (d) Record Keeping over all goods. Daringbadi Range is the best in this activity.
- (e) DFO was well involved in all field works and special care taken for control of forest fires.

#### 6.2.8 (C3.1) Field Survey Images

ANR 50 Ha.(2022-23)Plantation, Ulipadar,
Brahmanigaon

Watch Tower (2022-23), Sikijoda, Kotgada

Forest Guard Quarter (2022-23), Jhinjiriguda

## 6.2 (C3.2) Berhampur Division

# 6.2.1 (C3.2) Over all Physical and Financial Progress Analysis Physical

	Activity	1 <sup>st</sup> Year	2 <sup>nd</sup> Year	3 <sup>rd</sup> Year	4 <sup>th</sup> Year	6 <sup>th</sup> Year	Total
1	Creation						
a.	NPV AR	65 ha.					
b.	ANR with GAP- @200 seedlings/ha	765 ha.					
2	Maintenance						
a.	AR			3.792 ha.			
b.	ANR			0.1357 ha.			
C.	Bald Hill Plantation					65	
d.	NPV		160				
e.	NPV ANR						2130
3	SMC	400 ha.					
4	SSO Bamboo	1135 ha.					

#### Financial:

Allotment (Rs in lakh)	14,56.14	
Expenditure (Rs in lakh)	13,77.99	(94.63%)
Surrender (Rs in lakh)	78.14	(5.37%)

#### 6.2.2 (C3.2) Finding on activities under Compensatory Afforestation

No new creation; only AR 3.792 ha., ANR 1357 ha., 3<sup>rd</sup> year maintenance and 65 ha. Bald Hill 6<sup>th</sup> year maintenance has been done. The growth of AR is excellent and survival is 78%.

#### 6.2.3 (C3.2) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C3.2) Finding on the Activities Integrated Wild Life Management Plan

Olive Ridley Turtle protection work was done with boat and motor trawler (@ cost of over Rs. 12 lakh) and one watch tower constructed at Ramaguda under Bramhapur Range at a cost of Rs. 20 lakh.

Blackbuck conservation done with community support in Khallikote Range and the population has increased over 68 numbers in 2022-23.

#### 6.2.5 (C3.2) Finding on the Activities under NPV Fund (A) and NPV Fund (B)

**NPV (A):** AR 65 hectare and ANR with GAP 765 hectare (+200) done nicely in Digapahandi, Samantiapalli and Khallikote Ranges.

NPV (B): Maintenance of plantation is very good in Bramhapur and Samantiapalli Ranges.

Activity	AR (ha.)	ANR (ha.)
2 <sup>nd</sup> Year maintenance	90	630
3 <sup>rd</sup> Year maintenance	40	1000
4 <sup>th</sup> Year maintenance	30	500
Total	160	2130

## 6.2.6 (C3.2) Update on e-green Portal

The E-green watch is updated with details of physical & financial achievements at Division level. No Range officers have done uploading of data.

#### 6.2.7 (C3.2) General Observation

The construction of 08 buildings under infrastructure development through tenders; the buildings are of good quality. The impact of SMC works is visible through siltation and natural germination of plants in the ANR areas. The improvement in the moisture has promoted the germination and growth of medicinal species such as *Andrographis paniculata*, *Hemidesmus indicus* etc.

SSO Bamboo of Daba (*Bambusa arundinacea*) in Samantiapalli Range is very good. Overall record keeping of Samantiapalli and Khallikot Range is very good. Increased inspection by superior officers should be helpful.

## 6.2.8 (C3.2) Field Survey Images

#### 6.2 (C3.3) Boudh Division

#### 6.2.1 (C3.3) Overall Physical and Financial Progress Analysis

#### 6.2.2 (C3.3) Finding on activities under Compensatory Afforestation

CA- ANR with Gap (@ 800 seedlings/ha.) - 230 ha. (PO in 2022-23 for 2023-24)

# 6.2.3 (C3.3) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C3.3) Finding on the Activities Integrated Wildlife Management Plan

Under wildlife only vehicle and squad maintained. No information in detail from Division.

#### 6.2.5 (C3.3) Finding on the Activities under NPV Fund (A) and NPV Fund (B)

NPV (A) - AR-160 ha., ANR-2010 ha.

NPV (B) - Maintenance - 2441 ha. ANR and 123 ha. AR.

#### 6.2.6 (C3.3) Update on e-green Portal

E Green watch portal is updated.

#### 6.2.7 (C3.3) Other Observations

- (a) In place of fencing the narrow trenches dug out around plantation were found to be more effective.
- (b) The M&E, contingency amount have been utilised for livelihood activities of VSS (like Vermi compost pit, mushroom cultivation etc.)
- (c) In Phasi species plantation the special care taken has resulted in the plants growing well due to alluvial soil of Mahanadi River.
- (d) SMC, LBCD structures well maintained and compact with siltation noticed.
- (e) Protection to the forests and wildlife with fire control is quite good.

#### 6.2.8 (C3.3) **Field Survey Images**

Allotment (Rs. In lakh)	13,96.94	
Expenditure (Rs. In lakh)	13,66.93	97.85%
Surrender (Rs. In lakh)	30.01	2.15%

#### 6.2.2 (C3.4) **Finding on activities under Compensatory Afforestation**

Under CA/PCA/ 1.5 Sz/ CATP (2020-21) AR- 3<sup>rd</sup> Year maintenance has been done over 0.44 ha.

Submitted: January 15, 2025

#### 6.2.3 (C3.4) Finding On activities under Catchment area treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C3.4) Finding on the activities under Integrated Wildlife Plan

- (a) Protection vehicle Gajasathi, Elephant corridor and conflict management & squads maintained.
- (b) 05 Veterinary camps have been organised.

#### 6.2.5 (C3.4) Finding on the activities under NPV fund (A) and NPV fund (B)

NPV (A): As mentioned above ANR- 1065 ha. raised (created) during 2022-2023.

**NPV (B):** Maintenance over AR- 120, ANR- 1700 ha. Aside above the following Physical achievement are also on record:

- (a) SMC- 14 Sites- 700 ha.
- (b) SSO Bamboo- 17- 3800 ha.
- (c) Fire line- 65- 25200 m.
- (d) Training to staff- 06 Nos.
- (e) Protection Vehicle- 05 Nos.
- (f) Infrastructure- 06 Buildings, 40 km. road maintenance, 23 Causeway, 05 Culvert
- (g) Nursery- Jan 2023- 4.20 lakh saplings raised.

#### 6.2.6 (C3.4) Update on e-green portal

E- green watch portal updated with physical, financial data and Maps.

#### 6.2.7 (C3.4) Other Observations

- (a) It is seen that in ANR GAP filling plantations raised in GAPS in block model of 2.5 x 2.5 m. spacing.
- (b) Success rate in calcareous soil: In Gallery & Jagannath Prasad Ranges the plantations have over 85 to 90% success in 2<sup>nd</sup> & 3<sup>rd</sup> year.
- (c) Elephant movement is frequent and the vehicles & squads are well utilised for their monitoring and the management of human animal conflict.
- (d) SSO Bamboo in Tarasingi Range is good.
- (e) SMC works in Jagannath Prasad Range is effective. Natural Sal, Sinsa, Rohini, Piasal & Kasi were noticed to have germinated in staggered trenches.
- (f) Wildlife using water holes in WHS & wire mesh structures.
- (g) The permanent Nursery of Mujagada Range at Lalsing is very good.

#### 6.2.3 (C3.5) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

## 6.2.4 (C3.5) Finding on the Activities Integrated Wildlife Management Plan

The following activities have been undertaken:

Veterinary Camp - 08 Gajasathi - 10 VSS

One Poaching Barrack - @ Rs.17 lakh.

#### 6.2.5 (C3.5) Finding on the Activities under NPV Fund (A) and NPV Fund (B)

#### NPV(A): New creation

AR (ha.)	ANR (ha.)	Total (ha.)
30	1660	1690

#### NPV- (B): Maintenance

AR (ha.)	ANR (ha.)	Total (ha.)
169	1975	2144

#### 6.2.6 (C3.5) Update on e-green Portal

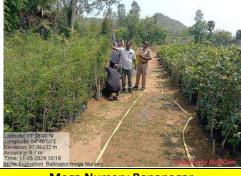

All Physical & Financial details with site wise maps uploaded in the portal.

#### 6.2.7 (C3.5) Other Observations

- 1. Very good AR (Bald Hill) plantation have been raised.
- 2. Under ANR (RET) activities species conserved (Phanaphana- (*Oroxylum indicum*) Cycas, Kataka (*Strychnos potatorum*) Asoca (*Saraca asoca*) & many medicinal species.
- 3. Blackbuck community conservation at Bhetnoi (Aska Range) is excellent.
- 4. SMC works promote Sal regeneration and water hole to Elephant, Sambar etc. are good in Buguda Range.
- 5. Nursery of Badapada, Aska is nice. Visit of higher officer to sites could help in improvement in field works. and
- 6. Record keeping can be improved.

# 6.2.2 (C3.7) Finding on activities under CA

No activity has been observed under the category in this division.

# 6.2.3 (C3.7) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

## 6.2.4 (C3.7) Finding on the activities under integrated Wildlife Management

05 vehicles and 05 protection squad engaged.

### 6.2.5 (C3.7) Finding on activities under NPV Fund (A) and NPV Fund (B)

NPV (A) - Creation of AR- 45 ha. & ANR- 1500 ha.

NPV (B) - Maintenance of 165 ha. AR 4800 ANR+1600 ANR (AJY). Total- 6400 ha. ANR.

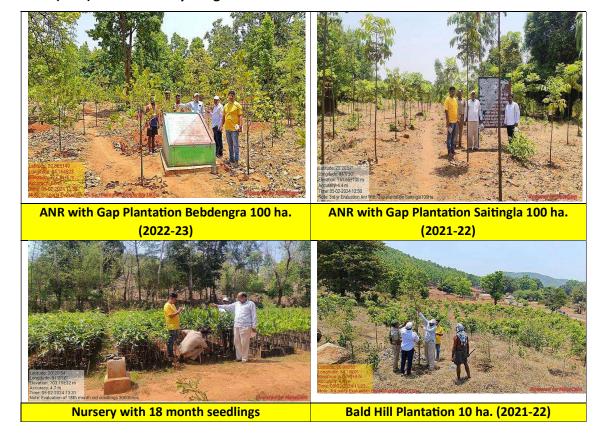

## 6.2.6 (C3.7) Update in e-green portal

E-green watch portal posted at Division office.

## 6.2.7 (C3.7) Other Observations

- (a) Coppice of Sal is vigorous, luxurious, and better grown with acidic soil over the Division.
- (b) The conservation of RET species with supplementing plantation of Sandal (*Santalum album*) is excellent in Phiringia Range.
- (c) All ANR are well maintained.
- (d) Involving VSS community for Forest and Wildlife Conservation under ANR (AJY) is very good.
- (e) SMC works and top to bottom nala plugging by LBCD is nice at many places, particularly at Raikia Range.
- (f) The Bald Hill plantation are overall good, particularly in Phiringia & Tikabali Range are more appriciated.
- (g) In future ANR without GAP for Phulbani and Balliguda Division with RET & medicinal sample plots inside ANR area will be more fruitful. SMC should be done inside these areas.

### 6.2.8 (C3.7) Field Survey Images

# 6.2 (C4) Bhawanipatna Circle

The are 6 forest divisions in Bhawanipatna Circle of which 5 are territorial divisions, and one is wildlife division, viz., Bolangir, Kalahandi North, Kalahandi South, Khariar, Subarnapur, and Sunabeda WL.

Subsequent 5 tables provide information for the Circle, followed by division-wise observations organized under 8 sub-sections. In Bhawanipatna Circle total expenditure incurred is around Rs. 148.83 Cr. of which Rs. 142 Cr. has been spent by the forest wing, and around Rs. 6.78 Cr. has been spent by the wildlife wing of the forest department.

Table C4.6.1.1: Financial Achievements in Bhawanipatna Circle as per the APO (Rs. In lakh)

Name of Division	Forestry Activities (General)	Wildlife Management	Total Expenditure Incurred
Bolangir	3,489.02	144.98	3,634.00
Kalahandi North	2,611.94	81.09	2,693.03
Kalahandi South	3,647.57	39.73	3,687.29
Khariar	1,978.90	47.76	2,026.66
Subarnapur	1,749.29	153.93	1,903.22
Sunabeda WL	728.70	210.52	939.22
Total	14,205.42	678.01	14,883.43

Table C4.6.1.2: Study Coverage in Bhawanipatna Circle – Plantation CA/PCA/NPV (Creation & Maintenance) including Without Gap, SMC & SSO (Bamboo)

Total	348.56	348.56	345.89	99%

In subsequent subsections division-wise observations are presented. The data has been collected from field level and specific to the activities being observed. Thus, this may not add-up to the circle totals.

## 6.2 (C4.1) Bolangir Division

#### 6.2.1 (C4.1) Overall Physical and Financial Progress Analysis

Sector	Allocation	Expenditure	Expenditure %
	(Rs. In lakh)	(Rs. In lakh)	
Forest	3636.44	3489.02	96
Wildlife	166.47	144.98	87
Total	3802.91	3634.00	91.5

The unspent amounts have been refunded to the State CAMPA.

The physical achievement of new plantation, maintenance and SMC activities fully completed including SSO Bamboo, Ama Jangala Yojana (AJY). The department has executed some soil and moisture conservation activities like RCC check dam, WLBCD, LBCD and contour trenches in the plantation area as well as in assigned the forest area. Five sites out of 8 sites were visited and it was observed that SMC measures undertaken were effective and functional to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest water.

### 6.2.2 (C4.1) Finding on activities under Compensatory Afforestation

Under Compensatory Afforestation (CA) or Penal Compensatory Afforestation (PCA), 3<sup>rd</sup> year maintenance of 888 ha. of plantations was done. On average, the condition of the plantations is good.

### 6.2.3 (C4.1) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

### 6.2.4 (C4.1) Finding on the Activities Integrated Wildlife Management Plan

Under wild life management the major works are the creation of water bodies and other activities like wildlife protection squad, tracker engagement, supply of anti-depredation equipment to primary

response team of VSS under Gaja Sathi Scheme, publicity and awareness programme, training to primary response team of VSS (Gaja Sathi), transportation and fixing charges of elephant depredation, cost of vehicle/POL and maintenance, solar fencing its maintenance, engagement of fire watchers, habit improvement etc.

#### 6.2.5 (C4.1) Finding on the Activities under NPV Fund (A) and NPV Fund (B)

Regarding NPV new creation and maintenance works done. Under AR Plantation of 250 ha. area developed through Bald Hill plantation and other indigenous miscellaneous species plantation.

Around, 2500 ha area developed through ANR plantation like medicinal species & other indigenous miscellaneous species plantation. Alongside, 2<sup>nd</sup> year maintenance covered 3060 ha area, 3<sup>rd</sup> year maintenance covered 2324 ha area and 600 ha area was covered in 4th year maintenance. The health of the plants on an average is good. Casualty replacement has also been done.

The local villagers are very much aware that many of their day-to-day requirements are met from the forest produce. So, they contribute towards the protection efforts and hence the protection is very good in most of the verified site.

In 20 nurseries the division raised about 31.88 lakh seedlings. For raising and maintenance of these seedling expenditure of Rs 646.90 lakh was incurred. Most of the 18-month seedlings have been planted.

#### 6.2.6 (C4.1) **Update on e-green Portal**

It was observed that all activities under CAMPA during 2022-23 have been uploaded in the portal.

#### 6.2.7 (C4.1) **Other Observations**

Under infrastructure development the construction of range office, forester quarter, forest guard quarter, causeway and maintenance of forest road has been done. The constructions are of good quality and are being utilized properly.

#### 6.2.8 (C4.1) **Field Survey Images**

**Kadalimunda Nursery** 

# 6.2 (C4.2) Kalahandi North Division

## 6.2.1 (C4.2) Over all Physical and Financial Progress Analysis

Sector	Allocation	Expenditure	Expenditure %
	(Rs. In lakh)	(Rs. In lakh)	
Forest	2683.53	2611.94	97
Wildlife	81.09	81.09	100
Total	2764.62	2693.03	97.41

For forest protection and fire protection/ control operation Rs. 213.46 lakh expenditure has been incurred. The physical targets of new plantation, maintenance and SMC activities were successfully completed against the target including those in the Ama Jangala Yojana (AJY). The department has executed some soil and moisture conservation activities like RCC check dam, loose boulders check dam (LBCD), staggered trenches, wire mesh LBCD were prepared in the plantation area as well as assigned the forest area.

Around, 10 sites out of 26 sites were visited and it was observed that soil and moisture conservation measures undertaken were found effective and functional.

However, in case of regeneration of degraded bamboo forests (SSO Bamboo) 5014 ha area completed against the target of 5300 ha. That is, an achievement of 95%.

## 6.2.2 (C4.2) Finding on activities under Compensatory Afforestation

Under Compensatory Afforestation (CA) or Penal Compensatory Afforestation (PCA) there was no new plantation taken only 2<sup>nd</sup> year maintenance of 337.36 ha plantation was done. On an average, the health of the plant is good. The replacement of casualty has also been done.

### 6.2.3 (C4.2) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

## 6.2.4 (C4.2) Finding on the activities under Integrated Wildlife Management

Under this component no major assets have been created. Mainly wildlife protection squad, tracker engagement, supply of anti-depredation equipment on use basis to primary response team of VSS under Gaja Sathi Scheme, publicity, and awareness programme-training to primary response team of VSS (Gaja Sathi), Transportation and fixing charges of elephant depredation, cost of vehicle/POL /maintenance, solar fencing and its maintenance, engagement of fire watchers, habit improvement etc. has been done.

### 6.2.5 (C4.2) Finding on the activities under NPV fund (A) and NPV fund (B)

In NPV new creation and maintenance works done. Under AR plantation 80 ha. has been developed through Bald hill plantation & Other Indigenous Misc. Species, 1900 ha area developed through ANR plantation like medicinal species & Other Indigenous Misc. Species plantation. Also, 2<sup>nd</sup> year maintenance covered 2710 ha., 3<sup>rd</sup> year maintenance covered 2821 ha. and 845 ha. was covered in 4<sup>th</sup> year maintenance.

The protection efforts of the villagers are very good in most of the verified site. The villagers are very much aware that their day-by-day requirements are met from the forest produces.

Nursery management: In 40 nurseries about 15.90 lakh seedlings have been raised at a cost of Rs. 450.74 lakh. Most of the 18-month seedling have been sent to the field for being planted.

#### 6.2.6 (C4.2) Update on e-green portal

Details of all activities under CAMPA APO 22-23 have been uploaded in the portal.

#### 6.2.7 (C4.2) Other Observations

Infrastructure development: The constructed forester quarter, forest guard quarter, culverts, causeways, and maintenance of forest road are good and utilized properly.

### 6.2.8 (C4.2) Field Survey Images

Bald hill Plantation (2021-22), Gudang

Rangiguda Plantation (2020-21)

## 6.2 (C4.3) Kalahandi South Division

## 6.2.1 (C4.3) Over all Physical and Financial Progress Analysis

Sector	Allocation	Expenditure	Expenditure %
	(Rs. In lakh)	(Rs. In lakh)	
Forest	3647.57	3647.57	100
Wildlife	44.78	39.73	88.72
Total	3692.35	3687.30	99.80

For forest protection and fire protection/control operation expenditure of Rs. 253.39 lakh was incurred. The physical targets of new plantation, maintenance and SMC activities were successfully completed against the target including those in the Ama Jangala Yojana (AJY). For Catchment Area Treatment (CAT) Plan the department has executed some soil and moisture conservation activities like

loose boulders check dam (LBCD), staggered trenches were prepared in the plantation area as well as assigned the forest area. Eight out of 53 sites were visited and it was seen that soil and moisture conservation measures undertaken were effective and functional.

However, in case of regeneration of degraded bamboo forests (SSO Bamboo) 500 ha area treatment had been completed against target of 730.25 ha. Thus 68% of the target was achieved.

### 6.2.2 (C4.3) Finding on activities under Compensatory Afforestation

Under Compensatory Afforestation (CA) or Penal Compensatory Afforestation (PCA) there was P.O of 699 ha., creation of new plantation 1733 ha., 2<sup>nd</sup> year maintenance of 367 ha., 3<sup>rd</sup> year maintenance of 946 ha., 4<sup>th</sup> year maintenance of 51ha. and CA others 1160 ha. plantation.

## 6.2.3 (C4.3) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

## 6.2.4 (C4.3) Finding on the activities under Integrated Wildlife Management

Under wild life management no major assets have been created. Funds have also been used for wildlife protection squad, tracker engagement, supply of anti-depredation equipment on use basis to primary response team of VSS under Gaja Sathi Scheme, publicity and awareness programme, training to primary response team of VSS (Gaja Sathi), transportation and fixing charges of elephant depredation, cost of vehicle/POL /maintenance, solar fencing its maintenance, engagement of fire watchers, habit improvement etc.

#### 6.2.5 (C4.3) Finding on the activities under NPV fund (A) and NPV fund (B)

Under NPV new creation and maintenance works have been done. Under AR Plantation 120 ha. has been developed through Bald hill plantation and Other Indigenous Misc. Species. 2025 ha. area developed through ANR plantation like medicinal species & Other Indigenous Misc. Species plantation.

2<sup>nd</sup> year maintenance covered 1870 ha., 3<sup>rd</sup> year maintenance covered 3025 ha. area and 805 ha. area covered in 4<sup>th</sup> year maintenance. The condition of the plantations on average is good. Casualty replacement has also been done.

About 16 lakh seedlings have been raised in 26 nurseries. For raising and maintenance of seedling Rs 343.57 lakh was spent including AJY. At present most of the 18-month seedling have been planted out in the field.

#### 6.2.6 (C4.3) Update on e-green portal

Details of all activities under CAMPA APO 22-23 have been uploaded in the portal.

#### 6.2.7 (C4.3) Other Observations

Infrastructure development: The constructed forester quarter, forest guard quarter, culverts, causeways, and maintenance of forest road are good and utilized properly.

# 6.2.8 (C4.3) Field Survey Images

# 6.2 (C4.4) Khariar Division

# 6.2.1 (C4.4) Over all Physical and Financial Progress Analysis

No.	Sector	Allocation	Expenditure	Percentage
		(Rs. In lakh)	(Rs. In lakh)	
1	Forestry	1978.90	1978.90	100

2	Wildlife	47.76	45.85	96
	Total	2026.66	2024.75	99

On forest protection and fire protection/ control operation Rs. 49.67 lakh expenditure has been incurred. All physical targets of new plantation, maintenance, SSO Bamboo and SMC activities have been fully achieved including Ama Jangala Yojana (AJY). The department has executed some soil and moisture conservation activities like RCC check dam, loose boulders check dam (LBCD), staggered trenches, wire mesh LBCD were prepared in the plantation area as well as at assigned sites in the forest area.

Nine sites out of 10 sites were visited and it was observed that soil and moisture conservation measures undertaken were found effective and functional to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve or drain water and harvest (excess) water.

#### 6.2.2 (C4.4) Finding on activities under Compensatory Afforestation

Under Compensatory Afforestation (CA) or Penal Compensatory Afforestation (PCA) only of 2 ha plantation area was taken up. The plantation is in good shape.

#### 6.2.3 (C4.4) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

## 6.2.4 (C4.4) Finding on the activities under Integrated Wildlife Management

Under wild life management no major assets have been created. The expenditure has mainly been on wildlife protection squad, tracker engagement, supply of anti-depredation equipment on use basis to primary response team of VSS under Gaja Sathi Scheme, publicity and awareness programme, training to primary response team of VSS (Gaja Sathi), transportation and fixing charges of preventing elephant depredation, cost of vehicle/POL/maintenance, solar fencing and its maintenance, engagement of fire watchers, habit improvement etc.

### 6.2.5 (C4.4) Finding on the activities under NPV fund (A) and NPV fund (B)

From NPV funds the new creation and maintenance works have been taken up. Under AR Plantation 100 ha area developed through Bald hill plantation & Other Indigenous Misc. Species, 1750 ha. area developed through ANR plantation like medicinal species & Other Indigenous Miscellaneous Species plantation.

Also,  $2^{nd}$  year maintenance covered 1425 ha.,  $3^{rd}$  year maintenance covered 1576 ha and 680 ha. area was covered in  $4^{th}$  year maintenance. The health of the plants is on average quite good. The casualty replacement work is also done.

For nursery management in 60 nurseries about 18.14 lakh seedlings have been raised at a cost of Rs. 464.82 lakh including AJY.

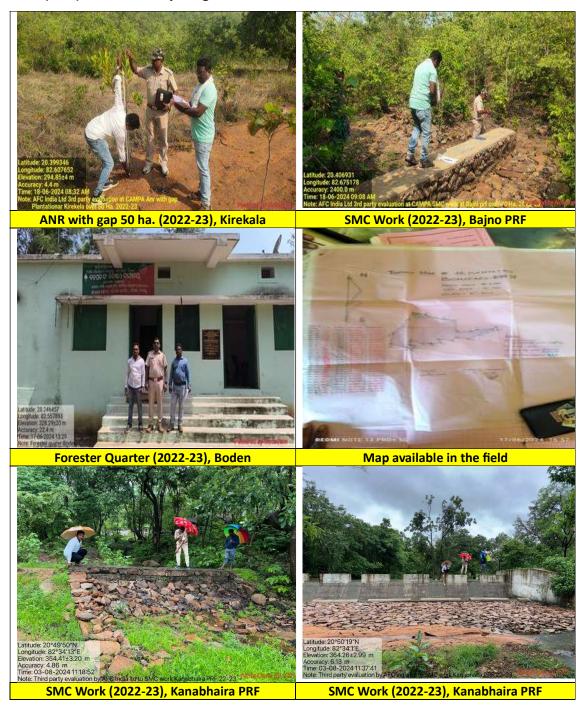

### 6.2.6 (C4.4) Update on e-green portal

The portal is updated.

#### 6.2.7 (C4.4) Other Observations

The infrastructure developed includes staff quarters, causeways, and culverts etc. These are being utilized properly.

# 6.2.8 (C4.4) Field Survey Images

## 6.2 (C4.5) Subarnapur Division

## 6.2.1 (C4.5) Over all Physical and Financial Progress Analysis

No.	Sector	Allocation	Expenditure	Percentage
		(Rs. In lakh)	(Rs. In lakh)	
1	Forestry	1912.10	1749.30	91.50
2	Wildlife	174.52	153.93	88
	Total	2086.62	1903.23	89.75

On forest protection and fire protection/control operations, expenditure of Rs. 167.34 lakh was incurred.

All the targets of new plantation, maintenance and SMC activities have been fully achieved including SSO Bamboo and Ama Jangala Yojana (AJY). Some soil and moisture conservation activities like RCC check dam, LBCD, WLBCD were prepared in the plantation areas as well as at specific points in the forest area in the Division. Two out of 4 sites were visited and it was observed that soil and moisture conservation measures undertaken were found effective and functional to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest (excess) water.

## 6.2.2 (C4.5) Finding on activities under Compensatory Afforestation

From the Compensatory Afforestation (CA) or Penal Compensatory Afforestation (PCA) funds the 3<sup>rd</sup> year maintenance of 360 ha. of plantation area was done.

#### 6.2.3 (C4.5) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C4.5) Finding on the activities under Integrated Wildlife Management

For wild life management major works are SMC, construction of watch tower, staff Barrack etc. Other activities like wildlife protection squad, maintenance of boundary of protected area, monitoring of assessment and protection wildlife habitat, improvement of wildlife habitat tracker engagement, forest fire prevention and control operation, supply of anti-depredation equipment on use basis to primary response team, publicity and awareness programme, training to primary response team, transportation and fixing charges of anti-depredation squad, cost of vehicle/POL /maintenance, solar fencing and its maintenance, engagement of fire watchers, habit improvement etc. have also been done.

### 6.2.5 (C4.5) Finding on the activities under NPV fund (A) and NPV fund (B)

From funds available from NPV head, new creation and maintenance works have been done. Under AR Plantation 255 ha. area developed through Bald Hill plantation and Other Indigenous Misc. Species, 2040 ha. area developed through ANR plantation like medicinal species and Other Indigenous Miscellaneous Species plantation.

Aside this,  $2^{nd}$  year maintenance over 1135 ha.,  $3^{rd}$  year maintenance of 1345 ha. and  $4^{th}$  year maintenance of 600 ha. was done.

At a cost of Rs. 265.00 lakh about 20 lakh seedlings were raised in 20 nurseries and most of the saplings had been planted out in the field at the time of field evaluation visit.

## 6.2.6 (C4.5) Update on e-green portal

The portal is updated.

## 6.2.7 (C4.5) Other Observations

The infrastructure developed includes range officer residence, forester quarter, forest guard quarter, causeway, and culvert. The constructions are being utilized properly.

# 6.2.8 (C4.5) Field Survey Images

## 6.2 (C4.6) Sunabeda Wildlife Division

## 6.2.1 (C4.6) Overall Physical and Financial Progress Analysis

No.	Sector	Allocation	Expenditure	Percentage
		(Rs. In lakh)	(Rs. In lakh)	
1	Forestry	728.70	728.70	100
2	Wildlife	210.52	210.52	100
	Total	939.22	939.22	100

For forest protection and fire protection /control operation Rs. 16.47 lakh was spent. The physical targets of new plantation, maintenance, SSO Bamboo and SMC have been fully achieved including the Ama Jangala Yojana (AJY). The division has executed some soil and moisture conservation activities like RCC check dam, LBCD, WLBCD that were prepared in the plantation areas as well as at specific points in the forest area. Two sites out of 17 sites were visited and it was observed that soil and moisture conservation measures undertaken were found effective and functional to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest (excess) water.

## 6.2.2 (C4.6) Finding on activities under Compensatory Afforestation

No activity was observed under the category in this division.

### 6.2.3 (C4.6) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C4.6) Finding on the activities under Integrated Wildlife Management

Under wild life management the major activities are the construction of watch tower, forest protection and fire protection, engagement of wildlife protection squads, engagement of trackers, supply of anti-depredation equipment on use basis to primary response team of VSS under Gaja Sathi Scheme, publicity and awareness programme-training to primary response team of VSS (Gaja Sathi), transportation and fixing charges of elephant depredation, cost of vehicle/POL /maintenance, solar fencing its maintenance, engagement of fire watchers, habit improvement etc.

### 6.2.5 (C4.6) Finding on the activities under NPV fund (A) and NPV fund (B)

From NPV funds the new creation and maintenance works were done. Under Other Indigenous and miscellaneous Species, 1000 ha area developed through ANR plantation like medicinal species and Other Indigenous and miscellaneous species plantation.

Also, 2<sup>nd</sup> year maintenance covered 970 ha. area, 3<sup>rd</sup> year maintenance covered 830 ha.

In 60 nurseries about 6 lakh seedlings have been raised at a cost of Rs. 147.40 lakh and this includes AJY. Presently most of the 18-month seedling have all been planted.

## 6.2.6 (C4.6) Update on e-green portal

The portal is fully updated.

#### 6.2.7 (C4.6) Other Observations

The infrastructure developed includes forester quarter, forest guard quarter, causeway, and culvert. The constructions are being utilized properly.

## 6.2.8 (C4.6) Field Survey Images

FINAL REPORT
Third Party Evaluation of Projects
CAMPA, Odisha | Financial Years 2022-23
Submitted: January 15, 2025

Watch Tower (2022-23), Gorra

# 6.2 (C5) Bhubaneswar Circle

There are 8 forest divisions in the Bhubaneshwar Circle, of which 3 are territorial divisions, and 5 are wildlife divisions, viz., Bhadrak WL, Chandaka WL, Chilika WL, City Forest, BBSR, Khordha, Nayagarh, Puri WL, and Rajnagar WL.

Subsequent 5 tables provide information for the Circle, followed by division-wise observations organized under 8 sub-sections. In Bhubaneshwar Circle total expenditure incurred is around Rs. 75.17 Cr. of which Rs. 57.9 Cr. has been spent by the forest wing, and around Rs. 17.28 Cr. has been spent by the wildlife wing of the forest department.

Table C5.6.1.1: Financial Achievements in Bhubaneshwar Circle as per the APO (Rs. In lakh)

Name of Division	Forestry Activities	Wildlife	Total Expenditure
	(General)	Management	Incurred
Bhadrak WL	136.12	82.90	219.03
Chandaka WL	827.65	425.99	1,253.64
Chilika WL	192.43	81.44	273.87
City Forest, BBSR	371.85	64.28	436.13
Khordha	1,168.08	138.08	1,306.15
Nayagarh	2,085.40	96.36	2,181.76
Puri Wildlife	632.12	577.57	1,209.69
Rajnagar WL	376.39	260.67	637.06
Total	5,790.05	1,727.28	7,517.34

Table C5.6.1.2: Study Coverage in Bhubaneshwar Circle – Plantation CA/PCA/NPV (Creation & Maintenance) including Without Gap, SMC & SSO (Bamboo)

Division	Area Covered (ha)	Evaluated Area (ha.)	% of area evaluated	No. of Total Sites	Sample to be Covered	No. of Sites covered	% of Verification

Bhadrakh WL	31.65	31.65	31.65	100%
Total	427.91	427.91	427.91	100%

In subsequent subsections division-wise observations are presented. The data has been collected from field level and specific to the activities being observed. Thus, this may not add-up to the circle totals.

## 6.2 (C5.1) Bhadrak Wildlife Division

#### 6.2.1 (C5.1) Overall Physical and Financial Progress Analysis

No.	Sector	Allocation	Expenditure	Percentage
		(Rs. In lakh)	(Rs. In lakh)	
1	Forestry	142.28	136.12	96
2	Wildlife	82.90	82.90	100
	Total	225.18	219.02	98

All physical targets of new plantation, maintenance and SMC activities were fully completed.

#### 6.2.2 (C5.1) Finding on activities under Compensatory Afforestation

No activity has been observed under the category in this division.

### 6.2.3 (C5.1) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C5.1) Finding on the activities under Integrated Wildlife Management

Under Integrated Wildlife Management the major assets created are the anti-poaching barrack. Other activities like engagement of wildlife protection squad, monitoring of assessment and protection wildlife habitat, improvement of wildlife habitat, tracker engagement, protection/support of anti-depredation activities, strengthening of communication facilities for protection of wildlife etc. have been undertaken.

### 6.2.5 (C5.1) Finding on the activities under NPV fund (A) and NPV fund (B)

From the NPV funds, new creation and maintenance works have been done. Under AR Plantation 15 ha. area developed through Mangrove (Hypocotyl) Plantation.

2<sup>nd</sup> year maintenance covered 26 ha. area and 27 ha. area was covered in 3<sup>rd</sup> year maintenance. The casualty replacement has been done and overall, the plantations are in good condition.

In nursery management in 05 nurseries about 2 lakh seedlings were raised. For raising and maintenance of seedling, an amount of Rs. 40.71 lakh was spent.

#### 6.2.6 (C5.1) Update on e-green portal

The portal is updated.

## 6.2.7 (C5.1) Other Observations

The infrastructure developed includes Range Officer residence, forester quarter, forest guard quarter etc. The constructions are being utilized properly.

### 6.2.8 (C5.1) Field Survey Images

## 6.2 (C5.2) Chandaka WL Division

### 6.2.1 (C5.2) Overall Physical and Financial Progress Analysis

No.	Sector	Allocation	Expenditure	Percentage	
		(Rs. In lakh)	(Rs. In lakh)		
1	Forestry	827.66	827.66	100	
2	Wildlife	425.99	425.99	100	
	Total	1253.65	1253.65	100	

During 2022-23 there was provision for Block Plantation 12.71 ha., 267.21 ha. plantation creation and maintenance of 75.09 ha. The expenditure incurred was Rs. 360.04 lakh.

All physical targets have been fully achieved.

- 1. Under SMC work in forest area 500 ha was covered in four sites with an expenditure of Rs 175.00 lakh. The data reflect that 500 ha area covered under SMC works through RCC check dam, loose boulders check dam etc. in four sites. One site was physically verified and it was observed that the measures taken were effective and functional to control runoff and thus preventing loss of soil by surface soil erosion. About 10% siltation is seen in the check dam
- 2. The infrastructure developed includes one forester quarter and three forest guard quarters, watch tower etc. These are being utilized properly.
- 3. The protection of forest through consolidation was done by Geo referencing of notified forest block covering 1084 ha. The expenditure incurred is Rs 3.79 lakh.

#### 6.2.2 (C5.2) Finding on activities under Compensatory Afforestation

Under CA/PCA an amount of Rs. 11.86 lakh has been spent for 29.80 ha area development. Operations like PO for block plantation 12.71 ha, creation of Block Plantation 4.5 ha and maintenance of 2<sup>nd</sup> year plantation 10.72 ha, 5<sup>th</sup> year plantation 1.46 ha and 7<sup>th</sup> year plantation 0.4 ha area have been carried out. Overall condition of plantation is good.

#### 6.2.3 (C5.2) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C5.2) Finding on the activities under Integrated Wildlife Management

For execution of wildlife management plan the various activities undertaken are the construction of watch tower, maintenance of forest road, anti-depredation activities, deployment of vehicles, purchase of equipment for driving wild animals, Transportation and fixing charges of Elephant depredation, awareness programme, training programme for primary response team, cost of vehicle/POL/maintenance etc. In all an amount of Rs. 425.99 lakh have been spent on these activities.

The watch tower at Sundarpur was physically verified - the quality of the tower is very good and purpose of the asset is fulfilled. The maintenance work done on one forest road was also physically verified and the condition of the road was found to be good.

## 6.2.5 (C5.2) Finding on the activities under NPV fund (A) and NPV fund (B)

About 250 ha. has been planted under NPV scheme. AR of Other Indigenous Species @1600 plant/ha was done at four sites and maintenance done over 62.5 ha area of 3<sup>rd</sup> year Fodder & Fruit plantation at four sites. Around, 4 of the 8 plantation sites have been physically verified. Over all condition of the plantations are satisfactory, average survival is 94%.

Around, 6.00 lakh of plant of different species (mainly Amla, Pijuli, Beal, Kanchan, Katha Badam, Bada Chakunda, Amboda, Piasal, Bamboo etc.) were raised under nursery management. The expenditure incurred was Rs. 126.20 lakh. Most of the seedlings have been already planted. The health of the seedlings seen is very good.

#### 6.2.6 (C5.2) Update on e-green portal

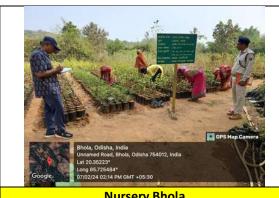

Separate cell has been prepared for this work. More care should be taken for uploading the information on the portal.

# 6.2.7 (C5.2) Field Survey Images

Total	- Rs. 273.87 lakh	

#### 6.2.2 (C5.3) Finding on activities under Compensatory Afforestation

No activity has been observed under the category in this division.

#### 6.2.3 (C5.3) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C5.3) Finding on the Activities Integrated Wildlife Management Plan

Works in the bird sanctuary, Irrawaddy Dolphin area management and other inland herbivores including elephant tracking and corridor management has been done in Rambha (WL) Range. Mostly activities such as engagement of protection squad and anti-degradation work, anti-poaching work and vehicle for protection has been done in this category.

## 6.2.5 (C5.3) Finding on the Activities under NPV Fund (A) and NPV Fund (B)

NPV Fund (A): AR 50 ha. + ANR - 150 ha.

NPV Fund (B): Maintenance - AR- 20 ha. and ANR- 535 ha.

#### 6.2.6 (C5.3) Update on e-green Portal

E-green watch data update is done at Division level and all physical & financial data uploaded along with GPS maps data.

#### 6.2.7 (C5.3) Other Observations

In this division very less work has been taken up under CAMPA. The limited land mass and bird sanctuary management is the limitations.

The coastal shelter belt of *Casuarina* plantations was verified in Chilika and Satapada Range. Inland activities are mostly confined to Rambha Range. Seedlings raised in Rambha over 1 lakh and *Casuarina* 1.375 lakh are good. Record keeping is also very good.

## 6.2.8 (C5.3) Field Survey Images

## 6.2 (C5.4) City Forest Division

#### 6.2.1 (C5.4) Overall Physical and Financial Progress Analysis

Sector	Allocation	Expenditure	Expenditure %
	(Rs. In lakh)	(Rs. In lakh)	

Forest	371.85	371.85	100
Wildlife	69.28	69.28	100
Total	441.13	441.13	100

For forest protection and fire protection/control operation Rs. 91.35 lakh was spent. All the targets of new plantation and maintenance activities have been completed.

#### 6.2.2 (C5.4) Finding on activities under Compensatory Afforestation

No activity has been observed under the category in this division.

## 6.2.3 (C5.4) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

## 6.2.4 (C5.4) Finding on the activities under Integrated Wildlife Management

Under wild life management the main activities have been the protection and anti-depredation activities, engagement of wildlife protection squads, monitoring of assessment and protection wildlife habitat, improvement of wildlife habitat, maintenance of water etc.

## 6.2.5 (C5.4) Finding on the activities under NPV fund (A) and NPV fund (B)

From NPV funds some new creation and maintenance works has been done. Under AR plantation area of 10 ha. has been developed through other indigenous species. 30 ha. area developed through ANR plantation like Other Indigenous Misc. Species plantation. In addition, 2<sup>nd</sup> year maintenance covered 50 ha area.

In nursery management, 08 nurseries raised about 2.18 lakh seedling. Rs 138.30 lakh was spent for raising and maintenance of these seedlings.

#### 6.2.6 (C5.4) Update on e-green portal

Details of all activities under CAMPA APO 22-23 have been uploaded in the portal.

#### 6.2.7 (C5.4) Other Observations

Infrastructure development: The constructed Range office, Range Officer residence, forester quarter, forest guard quarter, culverts, causeways, and maintenance of forest road are good and utilized properly.

## 6.2.8 (C5.4) Field Survey Images

ANR 10 ha. (2022-23) Plantation, Mendhasala

## 6.2 (C5.5) Khurda Division

### 6.2.1 (C5.5) Overall Physical and Financial Progress Analysis

No.	Sector	Allocation	Expenditure	Percentage
		(Rs. In lakh)	(Rs. In lakh)	
1	Forestry	1168.08	1168.08	100
2	Wildlife	138.08	138.08	100
	Total	1306.16	1306.16	100

With the above allotment, the activities undertaken included-

- 1. CA/PCA plantation and maintenance activities 82.68 ha.
- 2. Creation and maintenance under NPV plantation 995 ha.
- 3. Regeneration of degraded bamboo Forests (SSO Bamboo) 2661.223 ha.
- 4. 613.178 ha. area covered through Soil and Moisture Conservation works in forest area. The data reflect that 613.178 ha area has been covered under SMC works through loose boulders check dam. It was observed that the measures taken were effective and functional to control runoff and thus preventing loss of soil by surface soil erosion.
- 5. Infrastructure development: 03 Forester Quarters, 06 Forest Guard Quarters, and 06 causeways were constructed and maintenance of 25 km. Forest Roads was done. The infrastructure created is being utilized properly.
- 6. For forest protection and fire protection and control the sum of Rs. 188.27 lakh was spent on activities like provisioning of mobility by hired vehicle, casual engagement of local youth to

assist regular staff of state, wages for firefighting squads, expenditure for fire vehicle, creation and maintenance of fire line, procurement of fire blower including fuel and others accessories, logistic to the fire protection squad, training on forest fire control and prevention to the frontline forest staff and awareness campaign.

#### 6.2.2 (C5.5) Finding on activities under Compensatory Afforestation

For CA/PCA an amount of Rs.12.99 lakh has been spent for developing plantations over 82.68 ha. This included:

- 1. PO for block plantation 10.58 ha,
- 2. maintenance of 3<sup>rd</sup> year plantation 24.28 ha and
- 3. maintenance of  $5^{th}$  year plantation 47.82 ha.

Over all the condition of plantation is good.

## 6.2.3 (C5.5) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C5.5) Finding on the activities under Integrated Wildlife Management

Anti-depredation activities, deployment of vehicles, purchase of equipment for driving wild animals, awareness programmes etc., were undertaken at a cost of Rs. 138.08 lakh.

## 6.2.5 (C5.5) Finding on the activities under NPV fund (A) and NPV fund (B)

Around, 995 ha area has been planted during the financial year under NPV scheme and maintenance works were done in 1227.5 ha area of 2<sup>nd</sup> year, 3<sup>rd</sup> year and 4<sup>th</sup> year plantation. New plantations were created at 05 sites covering 90 ha. area under AR plantation. The remaining 905 ha was under ANR plantation at 15 sites. Maintenance of previously created plantations was done at 21 sites.

06 of the 41 sites covering 225 ha. have been physically verified. Over all condition of the plantations is satisfactory. The average survival of the six sites is 83%.

With CAMPA funds 08 lakh seedlings of different species (Karanch, Amla, Neem, Simakaya, Jamun, Pranesh, Arjun, Bahara, Sunari, Kath Badam, Pasta Badam, Fanfana, Beal, Mahula, Mango, *Terminalia* etc) were raised. The expenditure incurred is Rs. 123.16 lakh for maintenance of 18 months old seedling. Most of the seedlings have been already planted. The health of the seedlings seen is very good.

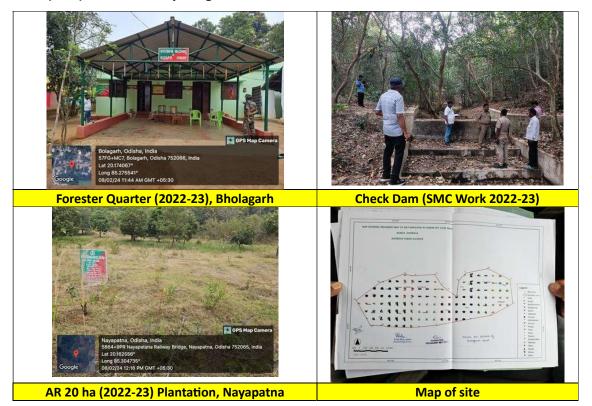

#### 6.2.6 (C5.5) Update on e-green portal

Separate cell has been prepared for this work. More care should be taken for uploading the information on the portal.

#### 6.2.7 (C5.5) Other Observations

No observations are identified.

## 6.2.8 (C5.5) Field Survey Images

## 6.2 (C5.6) Nayagarh Division

## 6.2.1 (C5.6) Overall Physical and Financial Progress Analysis

No.	Sector	Allocation	Expenditure	Percentage
		(Rs. In lakh)	(Rs. In lakh)	
1	Forestry	2110.33	2085.40	99
2	Wildlife	97.93	96.36	98
	Total	2208.26	2181.76	98.50

All physical targets of new plantation, maintenance and SMC activities were fully completed. For forest protection and fire protection/control operations, Rs. 272.72 lakh was spent. All physical targets of new plantation, maintenance of plantations, regeneration of degraded bamboo forests (SSO Bamboo) and SMC were fully completed. The department has executed some soil and moisture conservation activities like loose boulders check dam (LBCD), Gabion check dam, RCC check dam, WHS, retaining wall in the plantation area as well as assigned the forest area.

Four out of 8 such sites were visited and it was observed that soil and moisture conservation measures undertaken were effective and functional to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest (excess) water.

## 6.2.2 (C5.6) Finding on activities under Compensatory Afforestation

Under Compensatory Afforestation (CA) or Penal Compensatory Afforestation (PCA) there was P.O. for 2023-24 of 17.78 ha., 2<sup>nd</sup> year maintenance of 164.434 ha., 3<sup>rd</sup> year maintenance of 209.434 ha.

#### 6.2.3 (C5.6) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

# 6.2.4 (C5.6) 4.1.4 Finding on the activities under Integrated Wildlife Management

Under this component the activities undertake were mainly - protection and anti-depredation activities, wildlife protection squad, monitoring of wildlife and protection wildlife habitat, improvement of wildlife habitat, cost of vehicle/ POL /maintenance, strengthening of communication facilities for protection of wild life, supply of anti-depredation equipment, engagement of fire watchers, construction & maintenance of infrastructure for protection of wildlife etc.

## 6.2.5 (C5.6) Finding on the activities under NPV fund (A) and NPV fund (B)

NPV funds were used for the new creation and maintenance of plantations. Under AR Plantation 61 ha. was developed through Bald Hill plantation and Other Indigenous Misc. Species. 1400 ha. was developed through ANR plantation like Fodder and Fruits & Other Indigenous Misc. Species plantation.

 $2^{nd}$  year maintenance covered 1040 ha area,  $3^{rd}$  year maintenance covered 1166 ha. and 590 ha. area covered in  $4^{th}$  year maintenance.

Under nursery management, 14.40 lakh seedlings were raised in 21 nurseries and for this Rs 467.68 lakh was spent.

## 6.2.6 (C5.6) Update on e-green portal

The portal is updated.

## 6.2.7 (C5.6) Other Observations

The infrastructure developed includes forester quarter, forest guard quarter, Causeway, and Culverts etc. The constructions are being utilized properly.

#### 6.2.8 (C5.6) Field Survey Images

RCC Check Dam (SMC Work 2022-23)

Culvert – damaged (2022-23)

# 6.2 (C5.7) Puri Wildlife Division

### 6.2.1 (C5.7) Overall Physical and Financial Progress Analysis

No.	Sector	Allocation	Expenditure	Percentage
		(Rs. In lakh)	(Rs. In lakh)	
1	Forestry	716.73	632.12	88
2	Wildlife	595.62	577.57	97
	Total	1312.35	1209.69	92.5

For forest protection and fire protection/control operation Rs. 2.11 lakh has been spent. All physical targets of new plantation, maintenance and SMC activities were fully completed.

## 6.2.2 (C5.7) Finding on activities under Compensatory Afforestation

No activity is observed under the category in this division.

#### 6.2.3 (C5.7) Finding on activities under catchment Area Treatment (CAT) Plan

No activity is observed under the category in this division.

#### 6.2.4 (C5.7) Finding on the activities under Integrated Wildlife Management

Under wild life management the main activities were protraction and anti-depredation activities, the engagement of wildlife protection squad, monitoring of assessment and protection wildlife habitat, improvement of wildlife habitat, strengthening of communication facilities for protection of wild life, construction & maintenance of infrastructure for protection of wildlife etc.

### 6.2.5 (C5.7) Finding on the activities under NPV fund (A) and NPV fund (B)

NPV fund have been used foe new creation and maintenance works. AR plantation of 313 ha. has been developed through Mangrove (Hypocotyl) Plantation, other indigenous species and *Casurina*. 226 ha

area developed through ANR plantation of Fodder and Fruits & Other Indigenous Misc. Species plantation.

Also,  $2^{nd}$  year maintenance covered 196.1 ha area,  $3^{rd}$  year maintenance covered 110 ha area and 20 ha area covered in  $4^{th}$  year maintenance.

In 9 nurseries about 2.18 lakh seedlings were raised. For raising and maintenance of these seedlings Rs 57.18 lakh was spent.

## 6.2.6 (C5.7) Update on e-green portal

The portal is updated.

# 6.2.7 (C5.7) Other Observations

The infrastructure developed includes Range Office, Range Officer residence, forester quarter, forest guard quarter, maintenance of forest roads etc. The constructions are being utilized properly.

### 6.2.8 (C5.7) Field Survey Images

### 6.2 (C5.8) Rajnagar Wildlife Division

## 6.2.1 (C5.8) Overall Physical and Financial Progress Analysis

No.	Sector	Allocation	Expenditure	Percentage
		(Rs. In lakh)	(Rs. In lakh)	
1	Forestry	423.03	376.39	90
2	Wildlife	311.88	260.67	83.5
	Total	734.91	637.06	86.75

All physical targets of new plantation, maintenance activities have been fully achieved.

## 6.2.2 (C5.8) Finding on activities under Compensatory Afforestation

From Compensatory Afforestation (CA) or Penal Compensatory Afforestation (PCA) there was  $\mathbf{1}^{st}$  year creation of 63.12 ha. of plantation.

## 6.2.3 (C5.8) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

# 6.2.4 (C5.8) Finding on the activities under Integrated Wildlife Management

Under wild life management mainly activities like wildlife protection squad, monitoring of assessment and protection wildlife habitat, improvement of wildlife habitat tracker engagement, protection of

forest, anti-depredation activities, strengthening of communication facilities for protection of wild life etc. were undertaken.

# 6.2.5 (C5.8) Finding on the activities under NPV fund (A) and NPV fund (B)

From NPV many new creation and maintenance work has been done. AR Plantation of 122 ha. has been developed through Mangrove (Hypocotyl) and *Casaurina* Plantation, 420 ha area developed through ANR plantation like Other Indigenous Misc. Species plantation.

Also, 2<sup>nd</sup> year maintenance covered 380 ha. and 80 ha. was covered in 3<sup>rd</sup> year maintenance. The health of the plants is on an average good. The casualty replacement has also been done.

# 6.2.6 (C5.8) Update on e-green portal

Portal is updated.

# 6.2.7 (C5.8) Other Observations

The infrastructure developed includes, forester quarter, forest guard quarter, culvert and maintenance of roads etc. The constructions are being utilized properly.

# 6.2.8 (C5.8) Field Survey Images

# 6.2 (C6) Koraput Circle

There are 5 forest divisions in Korapur Circle, and all are territorial divisions, viz., Jeypore, Koraput, Malkangiri, Nabarangapur, and Rayagada.

Subsequent 5 tables provide information for the Circle, followed by division-wise observations organized under 8 sub-sections. In Koraput Circle total expenditure incurred is around Rs. 125.19 Cr. of which Rs. 122.85 Cr. has been spent by the forest wing, and around Rs. 2.34 Cr. has been spent by the wildlife wing of the forest department.

Table C6.6.1.1: Financial Achievements in Koraput Circle as per the APO (Rs. In lakh)

Name of Division	Forestry Activities (General)	Wildlife Management	Total Expenditure Incurred
Jeypore	2,211.83	-	2,211.83
Koraput	2,704.27	-	2,704.27
Malkangiri	2,142.10	24.00	2,166.10
Nabarangapur	1,874.12	62.50	1,936.62
Rayagada	3,352.88	147.68	3,500.56
Total	12,285.21	234.18	12,519.39

Table C6.6.1.2: Study Coverage in Koraput Circle – Plantation CA/PCA/NPV (Creation & Maintenance) including Without Gap, SMC & SSO (Bamboo)

Division	Area	Evaluated	% of area	No. of	Sample to	No. of	% of

Koraput	145.03	145.03	145.03	100%
Jeypore	43.69	41.65	40.15	92%
Nabarangpur	105.45	104.21	101.15	96%
Malkangiri	40.09	40.09	40.09	100%
Total	388.01	384.73	380.18	98%

In subsequent subsections division-wise observations are presented. The data has been collected from field level and specific to the activities being observed. Thus, this may not add-up to the circle totals.

# 6.2 (C6.1) Jeypore Division

# 6.2.1 (C6.1) Overall Physical and Financial Progress Analysis

The allocation was Rs. 2394.48 lakh under forestry sector against which the expenditure incurred was Rs. 2211.83 lakh. - achievement of 92%. On forest protection and fire protection/control operation the expenditure incurred was Rs. 189.09 lakh.

The physical targets of new plantation, maintenance of degraded bamboo forests (SSO Bamboo) etc. have been fully attained along with the Ama Jangala Yojana (AJY). In case of SMC, only 700 ha. area was covered against target of 1000 ha. Therefore, the achievement is only 70%.

## 6.2.2 (C6.1) Finding on activities under Compensatory Afforestation

Under Compensatory Afforestation (CA) or Penal Compensatory Afforestation (PCA) new plantation of only 7 ha. was taken up.

### 6.2.2 (C6.1) Finding on activities under Catchment Area Treatment (CAT) Plan

In Catchment Area Treatment the division has executed some soil and moisture conservation activities like loose boulders check dam (LBCD), staggered trenches were prepared in the plantation area as well as assigned the forest area.

In all, 3 out of 5 sites were visited and it was observed that soil and moisture conservation measures undertaken were found effective and functional to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest (excess) water.

#### 6.2.4 (C6.1) Finding on the activities under Integrated Wildlife Management

No activity has been observed under the category in this division.

#### 6.2.5 (C6.1) Finding on the activities under NPV fund (A) and NPV fund (B)

From this sub-head some new creation and some maintenance works done. Under AR plantation 170 ha. area developed through Bald hill plantation & Other Indigenous Misc. Species; 1600 ha area developed through ANR plantation like medicinal species & Other Indigenous Misc. Species plantation.

Also  $2^{nd}$  year maintenance covered 1219 ha area,  $3^{rd}$  year maintenance covered 585 ha area and 600 ha area covered in  $4^{th}$  year maintenance.

In 41 nurseries about 20.33 lakh seedlings have been raise from the funds available for Nursery Management. Rs. 522.35 lakh expenditure incurred including AJY.

#### 6.2.6 (C6.1) Update on e-green portal

Details of all activities under CAMPA APO 22-23 have been uploaded in the portal.

# 6.2.7 (C6.1) Other Observations

Infrastructure development: The constructed forester quarter, forest guard quarter, are good and are being utilized properly.

#### 6.2.8 (C6.1) Field Survey Images

# 6.2 (C6.2) Koraput Division

# 6.2.1 (C6.2) Overall Physical and Financial Progress Analysis

In the CAMPA APO 2022-23 there was an allocation of Rs. 2704.27 lakh from the forestry sector. The entire sum was spent. For forest protection and fire protection/control operation Rs. 224.64 lakh expenditure has been incurred.

All physical targets of new plantation, maintenance, management of degraded bamboo forests (SSO Bamboo) and SMC activities have been fully achieved including Ama Jangala Yojana (AJY). The department has executed some soil and moisture conservation activities like RCC check dam, loose

boulders check dam (LBCD), staggered trenches and percolation pit were prepared in the plantation area as well as assigned the forest area.

Seven sites out of 15 sites were visited and it was seen that soil and moisture conservation measures undertaken were effective and functional to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest (excess) water.

# 6.2.2 (C6.2) Finding on activities under Compensatory Afforestation

Under Compensatory Afforestation (CA) / Penal Compensatory Afforestation (PCA) Tall Tree plantation of 6490 numbers, 4<sup>th</sup> year maintenance of 1079 ha. and 264 ha of 7<sup>th</sup> year plantation maintenance was done.

# 6.2.3 (C6.2) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C6.2) Finding on the activities under Integrated Wildlife Management

No activity has been observed under the category in this division.

## 6.2.5 (C6.2) Finding on the activities under NPV fund (A) and NPV fund (B)

NPV funds were used for new creation and maintenance works. Under AR Plantation 300 ha area developed through Bald hill plantation & Other Indigenous Misc. Species, 1260 ha area developed through ANR plantation like medicinal species & Other Indigenous Misc. Species plantation.

In addition, 2<sup>nd</sup> year maintenance covered 721 ha area, 3<sup>rd</sup> year maintenance covered 1441 ha area and 600 ha area covered in 4<sup>th</sup> year maintenance. The villagers were found to be assisting in protection of the plantations.

Under nursery management, the funds have been used at 40 nurseries for raising about 19.90 lakh seedlings. The expenditure was Rs. 497.30 lakh including AJY.

# 6.2.6 (C6.2) Update on e-green portal

Details of all activities under CAMPA APO 22-23 have been uploaded in the portal.

# 6.2.7 (C6.2) Other Observations

Infrastructure development: The constructed forester quarter, forest guard quarter, culvert and maintenance of forest road are satisfactory and are being utilized properly.

# 6.2.1 (C6.3) Overall Physical and Financial Progress Analysis

No.	Sector	Allocation	Expenditure	Percentage
		(Rs. In lakh)	(Rs. In lakh)	
1	Forestry	2142.10	2142.10	100
2	Wildlife	24.00	24.00	100
	Total	2166.10	2166.10	100

For forest protection and fire protection/control operation expenditure of Rs. 200.20 lakh has been incurred.

The physical targets of new plantation, maintenance, degraded bamboo forests (SSO Bamboo) and SMC activities have been attained in totality including Ama Jangala Yojana (AJY). Some soil and moisture conservation structures that include RCC check dam, loose boulders check dam (LBCD), staggered trenches and percolation pit have been made in the plantation area as well as assigned the forest area.

In all, 9 sites out of 12 sites were visited and it was observed that soil and moisture conservation measures undertaken were effective and functional to control runoff and thus preventing loss of soil by surface soil erosion, reduce soil compaction, improve soil fertility, conserve, or drain water and harvest (excess) water.

## 6.2.2 (C6.3) Finding on activities under Compensatory Afforestation

No activity has been observed under the category in this division.

# 6.2.3 (C6.3) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

### 6.2.4 (C6.3) Finding on the activities under Integrated Wildlife Management

Under wildlife management one watch tower has been built.

### 6.2.5 (C6.3) Finding on the activities under NPV fund (A) and NPV fund (B)

New creation and maintenance works done from NPV funds. Under AR plantation 95 ha. area was developed through Other Indigenous Misc. Species. 1660 ha. area developed through ANR plantation like medicinal species and Other Indigenous Misc. Species plantation.

Also, 2<sup>nd</sup> year maintenance covered 1141 ha., 3<sup>rd</sup> year maintenance covered 916 ha. and 600 ha area was covered in 4<sup>th</sup> year maintenance. The condition of the plantations is generally good.

Nursery management funds were spent on 8 nurseries where about 20.41 lakh seedlings were raised at a cost of Rs. 502.70 lakh including AJY. At present most of the 18-month seedling have been planted out.

#### 6.2.6 (C6.3) Update on e-green portal

Details of all activities under CAMPA APO 22-23 have been uploaded in the portal.

#### 6.2.7 (C6.3) Other Observations

Infrastructure development: The constructed forest guard quarter, culvert and are satisfactory and are being utilized properly.

# 6.2.2 (C6.4) Finding on activities under Compensatory Afforestation

No activity has been observed under the category in this division.

# 6.2.3 (C6.4) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

# 6.2.4 (C6.4) Finding on the activities under Integrated Wildlife Management

Under wildlife management the main activities are wildlife protection squad, tracker engagement, supply of anti-depredation equipment to primary response team, publicity and awareness programme, training to primary response team, transportation and fixing charges, cost of vehicle/POL /maintenance etc.

# 6.2.5 (C6.4) Finding on the activities under NPV fund (A) and NPV fund (B)

Under AR Plantation 50 ha. area developed through Other Indigenous Misc. species plantations. 1160 ha. area developed through ANR plantation like medicinal species & Other Indigenous Misc. Species plantation.

Also,  $2^{nd}$  year maintenance covered 1146 ha.,  $3^{rd}$  year maintenance covered 2220 ha. and 600 ha. was covered in  $4^{th}$  year maintenance. The casualty replacement has been done. The condition of the plantations is generally satisfactory.

In nursery management, in 36 nurseries about 16.50 lakh seedlings were raised. For raising and maintenance of seedling an amount of Rs. 449.14 lakh was spent.

#### 6.2.6 (C6.4) Update on e-green portal

The portal is updated.

#### 6.2.7 (C6.4) Other Observations

The infrastructure developed includes forester quarter, forest guard quarter, culverts etc. The constructions are being utilized properly.

#### a. Forest sector

Allotment (Rs. in Lakh)	Expenditure (Rs. in Lakh)
3352.88	3352.88

No surrender statement and no wildlife wing report was available for Evaluation.

# 6.2.2 (C6.5) Finding on activities under Compensatory Afforestation

Around, 500.313 ha. and 600 tall trees planted.

# 6.2.3 (C6.5) Finding On activities under Catchment area treatment (CAT) Plan

No activity was observed under the category in this division.

# 6.2.4 (C6.5) Finding on the activities under Integrated Wildlife Plan

No information is available.

# 6.2.5 (C6.5) Finding on the activities under NPV fund (A) and NPV fund (B)

NPV (A) Creation - 1830 ha. achieved.

**NPV (B)** Maintenance - 2<sup>nd</sup> year- 7345 ha., 3<sup>rd</sup> year- 3128 ha. and 4<sup>th</sup> year 500 ha., Total 10973 ha.

# 6.2.6 (C6.5) Update on e-green portal

Portal is updated.

# 6.2.7 (C6.5) Other Observations

- 1. Lot of variety of works have been taken up. The CA 2<sup>nd</sup> Year Bald Hill of Rayagada Range (Fr. Kuna Behera) site was very good and visited by Dist. Administration & State level other department officers.
- 2. SMC and ANR plantation work of Gunupur and Muniguda Range are very good.
- 3. Bauxite deposit & Barren hill sites have taken up for plantation in Tikiri & Kashipur Ranges are very good.
- 4. There is scope for improvement in record keeping and updating.

# 6.2.8 (C6.5) Field Survey Images

# 6.2 (C7) Rourkela Circle

There are 5 forest divisions in Rourkela Circle, and all are territorial divisions, viz., Bonai, Deogarh, Keonjhar, Rourkela, and Sundargarh.

Subsequent 5 tables provide information for the Circle, followed by division-wise observations organized under 8 sub-sections. In Rourkela Circle total expenditure incurred is around Rs. 98.32 Cr. of which Rs. 78.6 Cr. has been spent by the forest wing, and around Rs. 19.72 Cr. has been spent by the wildlife wing of the forest department.

Table C7.6.1.1: Financial Achievements in Rourkela Circle as per the APO	(Rs. In lakh)	)
--	---------------	---

Name of Division	Forestry Activities (General)	Wildlife Management	Total Expenditure Incurred
Bonai	1,170.47	580.17	1,750.64

Total	389.69	382.54	382.54	98%

In subsequent subsections division-wise observations are presented. The data has been collected from field level and specific to the activities being observed. Thus, this may not add-up to the circle totals.

## 6.2 (C7.1) Bonai Division

## 6.2.1 (C7.1) Overall Physical and Financial Progress Analysis

The total expenditure from CAMPA APO 2022-23 is Rs. 1750.64 lakh. Of this Rs.1170.47 lakh was spent in general forest activities and the rest amount Rs. 580.17 lakh was spent in wild life management. An amount of Rs. 462.80 lakh has been spent towards plantation activities under CA/PCA and NPV.

Under Ama Jungle Yojana Rs. 35.81 lakh was spent on plantation activities like 2<sup>nd</sup> year maintenance without gap planting with the participation of nearby villagers forming VSS. Rs. 118.44 lakh were spent on SSO of degraded bamboo forest over an area of 4700 ha. in nine forest blocks. On forest protection Rs.163.06 lakh, on fire protection activities Rs.64.42 lakh and in Infrastructure development Rs. 105.94 lakh has been spent.

# 6.2.2 (C7.1) Finding on activities under Compensatory Afforestation

Activities like PO for AR, ANR and 1<sup>st</sup> year creation of AR and Tall tree plantation and maintenance activities of 2<sup>nd</sup> year, 3rd year and 4<sup>th</sup> to 8<sup>th</sup> year has been carried out. Compensatory plantation is very necessary in Bonai Division as there is a lot of mining activity in the area. An amount of Rs. 69.50 lakh has been spent on compensatory activities. Plantations are in good condition.

### 6.2.3 (C7.1) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

# 6.2.4 (C7.1) Finding on the activities under Integrated Wildlife Management

For wildlife management activities Rs. 580.17 lakh has been spent. Activities like anti-depredation work, purchase of anti-depredation equipment, creation of barriers like solar fence and trenches have been done. Payment of compensation amount for crop damage and house damage and human death due to wildlife was also done from this fund.

# 6.2.5 (C7.1) Finding on the activities under NPV fund (A) and NPV fund (B)

Plantations of new areas and their maintenance has been carried out over an area of 2610 ha. at 57 sites in seven Ranges. Creation of AR (other indigenous), ANR@500 plants /ha (Vanya silk and Fodder & Fruit), ANR @200 plants /ha (other indigenous) was carried out over an area of 890 ha. in six ranges at 19 sites.

Similarly, 3<sup>rd</sup> year maintenance ANR @200 plants/ha was taken up in Six sites over an area of 600 ha. Further 4<sup>th</sup> year maintenance of AR @1600 (3 sites) over an area of 40 ha and ANR @200 (13 sites) over an area of 500 ha was also done. In case of 4<sup>th</sup> year plantations, it has been already started merging with the natural forest. The condition plantations is good.

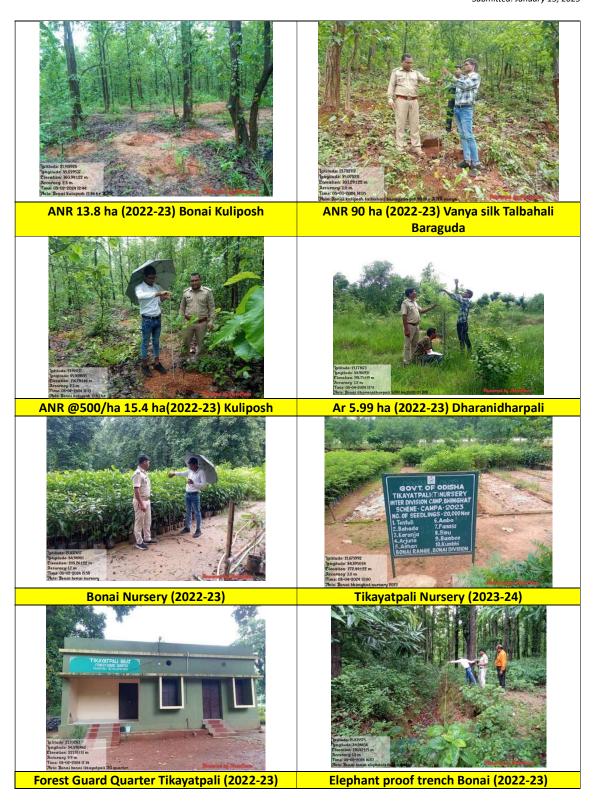

#### 6.2.6 (C7.1) Update on e-green portal

It is maintained at the Division Office.

#### 6.2.7 (C7.1) Other Observations

There are no additional observations.

#### 6.2.8 (C7.1) Field Survey Images

# 6.2 (C7.2) Deogarh Division

# 6.2.1 (C7.2) Overall Physical and Financial Progress Analysis

Total amount of Rs. 1527.26 lakh was spent from the APO 2022-23. Out of which Rs. 273.75 lakh was from the wild life management plan and the rest Rs. 1253.51 lakh was from the general forest part of the allocation.

Towards SSO of degraded bamboo spread over an area of 150 ha. in two forest blocks, the amount of Rs. 63.99 lakh was spent. Further plantation activities like ANR without gap planting and ANR with gap planting has been carried out over an area of 3100 ha. with the participation of nearby villagers by forming one legal body called VSS under AJY (Ama Jungle Yojana).

Around, Rs. 134.03 lakh spent towards forest protection. Fire protection activities like engagement of fire-fighting squads, vehicle, purchase of blowers and awareness meeting with public and staff have been undertaken.

#### 6.2.2 (C7.2) Finding on activities under Compensatory Afforestation

Very limited plantation activities seen in this Division. An amount of Rs. 93.82 lakh spent towards 2<sup>nd</sup> year maintenance of plantations over an area of 658.121 ha in 12 sites. Similarly, 3<sup>rd</sup> year maintenance done over 77.452 ha. area by spending Rs. 4.10 lakh in one site. 5<sup>th</sup> year maintenance done at a site of 35.58 ha. at cost of Rs.2.12 lakh. Total amount spent under CA activities was Rs. 100.03 lakh. The condition of the plantations is good.

#### 6.2.3 (C7.2) Finding on activities under catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

## 6.2.4 (C7.2) Finding on the activities under Integrated Wildlife Management

An amount of Rs.273.75 lakh spent in wildlife management activities. These include purchase of antidepredation activities, construction of barriers like solar fence, awareness campaign and payment of compensation amount towards crop damage, house damage and human death due to attack of wild animals.

# 6.2.5 (C7.2) Finding on the activities under NPV fund (A) and NPV fund (B)

Under NPV fund, plantation activities like AR @1600/ha (bald hill and other indigenous) and ANR (vanyasilk, RET and other Indigenous) has been created in the 1<sup>st</sup> year over an area of 620 ha. Simultaneously, maintenance activities like 3<sup>rd</sup> year and 4<sup>th</sup> year were done over an area of 1270 ha. An amount of Rs. 272.96 lakh has been spent.

#### 6.2.6 (C7.2) Update on e-green portal

Information and data relating to CAMPA activities are being uploaded at division level. There is ample scope for improvement, that is, the task should be performed regularly as a matter of routine.

# 6.2.7 (C7.2) Other Observations

There are no additional observations.

#### 6.2.8 (C7.2) Field Survey Images

# 6.2 (C7.3) Keonjhar Division

# 6.2.1 (C7.3) Overall Physical and Financial Progress Analysis

An amount of Rs. 2155.47 lakh was spent from APO 22-23 under general forest head. From the Wild life Management head, an amount of Rs. 684.68 lakh has been spent. In case of AJY Rs.120.55 lakh was spent at 68 sites by forming VSS in villages. An area of 2650 ha. has been treated under ANR without Gap planting. Under NPV an amount of Rs. 231.08 lakh was spent for AR and ANR activities. Under the forest protection head Rs. 178.92 lakh spent towards the payment of hired vehicle and engagement of squad. Similarly, activities like hired vehicle, engagement of fire response team, creation of fire line and its maintenance, purchase of blower and awareness training to public and staff has been done. Rs.109.93 lakh has been spent for protection of forest from fire. For development of infra-structure, Rs.138.16 lakh was spent on construction of quarters for Forest Guard and Forester, culverts, causeways, and forest roads.

#### 6.2.2 (C7.3) Finding on activities under Compensatory Afforestation

Maximum activities like PO for AR and ANR and its maintenance up to 8<sup>th</sup> year has been carried out under CA. Keonjhar Division is having mining activities. So a good amount of forest area has been diverted for non-forest activities. To compensate the loss of forests, many plantation and related activities have been taken up in the division. In case of PO, an amount of Rs.69.38 lakh was spent towards AR, ANR and tall tree plantation over 457.2862 ha of area in14 sites.

Similarly in 1<sup>st</sup> year creation an amount of Rs. 290.98 lakh has been spent for plantation activities lie ANR, AR, Bald hill plantation and tall tree plantation in 35 sites. Further 2<sup>nd</sup> year activities over 4 sites, 3<sup>rd</sup> year activities in18 sites, 4<sup>th</sup> year in 6 sites, 5<sup>th</sup> year in 6 sites, 6<sup>th</sup> year in one site, 7<sup>th</sup> year at 15 sites and 8<sup>th</sup> year in one sites has been taken up. Overall, an amount of Rs.1002.33 lakh has been utilized toward plantation activities from the CAMPA APO 2022-23. Since all the plantations under CA are being maintained up to 10<sup>th</sup> year, the condition of the plantations is good.

#### 6.2.3 (C7.3) Finding on activities under catchment Area Treatment (CAT) Plan

No activities has been observed under the category in this division.

#### 6.2.4 (C7.3) Finding on the activities under Integrated Wildlife Management

An amount of Rs. 684.68 lakh has been spent in the activities under Wild Life Management Plan. These include anti-depredation activities, anti-depredation equipment, barriers like trenches and solar fencing etc. Additionally, payment of compensation amounts due to crop damage, house damage, killing of domestic animals and death of human beings resulting from conflict with wild animals was also incurred from this fund.

# 6.2.5 (C7.3) Finding on the activities under NPV fund (A) and NPV fund (B)

Plantation activities like 1<sup>st</sup> year creation and 3<sup>rd</sup> year and 4<sup>th</sup> year maintenance were carried over an area of 1745 ha in 36 sites. The activities include ANR Vanya Silk @ 500 plants/ha, other indigenous @200 plants/ha and Bald hill plantation @1600plants/ha . The condition of plantation is good.

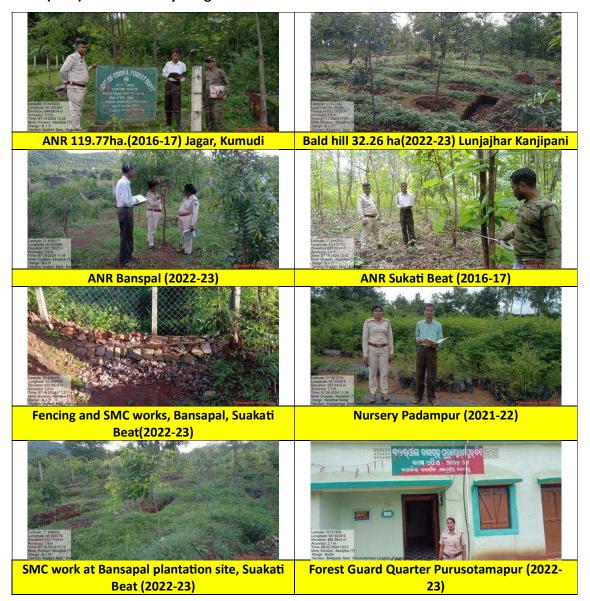

#### 6.2.6 (C7.3) Update on e-green portal

All the related information under the activities of CAMPA APO 22-23 has been uploaded in the e-green portal in the Division office as well as Range Office.

#### 6.2.7 (C7.3) Other Observations

There are no additional observations.

# 6.2.8 (C7.3) Field Survey Images

# 6.2 (C7.4) Rourkela Division

# 6.2.1 (C7.4) Overall Physical and Financial Progress Analysis

An amount Rs.2038.96 lakh was utilized by Rourkela Division from CAMPA APO 2022-23. Out of this expenditure from Wild life head is Rs. 292.91 lakh and Rs. 1746.05 lakh from the Forest Management head. Under Forest Management works like plantations including creation and its maintenance under CA/PCA and NPV has been carried out in the field. Beside this under Ama Jungle Yojana, ANR without Gap planting was taken up over an area of 2360 ha (2<sup>nd</sup> year and 3<sup>rd</sup> year maintenance) with participation of villagers forming VSS at village level. SSO of degraded bamboo over an area of 300 ha. was also taken up at a cost of Rs.7.50 lakh.

#### 6.2.2 (C7.4) Finding on activities under Compensatory Afforestation

Under CA/PCA 516.7985 ha. of area was taken up in 1st year creation. From which, block plantation is 8.22 ha., 0.0225 ha is ANR @200/ ha. and the rest 508.556 ha. was taken up under ANR @400/ha. Other activities are all the 2<sup>nd</sup>, 3<sup>rd</sup>, 4<sup>th</sup>,5<sup>th</sup>, 6<sup>th</sup> and 8<sup>th</sup> year maintenance of plantations. At these maintenance sites, except two sites all are small sized areas. An amount of Rs.476.52 lakh was spent for these plantation activities during CAPMPA APO 20. 22-23. Condition of plantations is good.

#### 6.2.3 (C7.4) Finding on activities under catchment Area Treatment (CAT) Plan

No activities has been observed under the category in this division.

#### 6.2.4 (C7.4) Finding on the activities under Integrated Wildlife Plan

Under State CAMPA Wild life Plan an amount of Rs.292.91 lakh was released and spent on works like anti-depredation activities, purchase of equipment, erection of barriers like solar fencing, trench fencing. Two anti-poaching barracks was also constructed in the field.

#### 6.2.5 (C7.4) Finding on the activities under NPV fund (A) and NPV Fund (B)

Under this scheme, several plantations and their maintenance has been taken up. In this creation, activities like ANR @500 plants/ha., RET/Medicinal @200 plants/ha., other indigenous @200 plants/ha., over 1600 ha. was taken up.

Similarly, maintenance of 2<sup>nd</sup> year, 3<sup>rd</sup> year and 4<sup>th</sup> year plantations over an area of 3239 ha. was taken up. On paper it is different scheme, but in the field, it is only AR. In case of ANR, plantation is being taken up in AR mode. It was also noticed in the field that the species planted are not according to the prescriptions of the scheme except in the Bald Hill plantations. Even there, it is noticed that species are not selected according to the requirements of the sites that is, those species to be preferably planted at the top hills are not planted there. Thus, the aim of taking up site specific plantation that will suit the existing site-specific needs are not fulfilled. However, despite this, the overall condition of plantations is good.

#### 6.2.6 (C7.4) **Update on e-green watch Portal**

All inputs uploaded at range level and site is updated.

#### 6.2.7 (C7.4) **Other Observations**

There are no additional observations.

#### 6.2.8 (C7.4) Field Survey Images

ANR 20 ha Birsa Baribeda (2021-22)

ANR 33.7 ha Champajharan (2020-21)

# 6.2 (C7.5) Sundergarh Division

# 6.2.1 (C7.5) Overall physical and financial progress analysis

In case of forestry sector (general) target of Rs. 1535.48 lakh has been achieved. Similarly in case of wildlife wings the total target of Rs. 140.05 lakh has been achieved. All targets allotted to the division have been achieve fully with a slight variation in financial target An amount of Rs.50.68 lakh has been

refunded under CAMPA APO 2022-23(forest Wings). As per records an amount of Rs. 5 lakh and Rs. 1.75 lakh has been refunded under IWLMP and NPV (Wildlife) respectively.

As per records, during 22-23 there was different type of ANR (other indigenous, RET) and its maintenance, AR etc. under CA, PCA and NPV. SSO (Bamboo) target has been achieved.

## 6.2.2 (C7.5) Finding on activities under Compensatory Afforestation

Sundergarh Division is situated mainly in IB Valley. There is heavy underground coal stock in Gopalpur Range and Hemgiri Range of the Division. At present coal mines are in operation by M/S- OPGC, NTPC, and MCL. In future this may increase. As a result, huge quantities of forest area will be diverted for non-forestry purpose and accordingly CA plantations will be raised to compensate the loss either in Sundergarh Division or in any place in Odisha as per the availability of suitable land. In Sundergarh Division CA/PCA plantations has been raised over 78 sites with an expenditure of Rs.210.97 lakh. Overall, the condition of plantation is good.

## 6.2.3 (C7.5) Funding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C7.5) Finding on the activities under integrated Wildlife Management

Sundergarh division is prone to human animal conflict. So, vehicles, trackers, squad members were deployed for the purpose. Compensation was distributed was provided on urgent basis to mitigate agitation by local populations.

#### 6.2.5 (C7.5) Finding on activities under NPV Fund (A) and NPV Fund (B)

A number of plantations have been raised under NPV like creation, maintenance etc. An amount of Rs. 898.23 lakh has been spent towards creation of AR, ANR and its maintenance in 83 no of sites. One Bald Hill plantation has been successfully raised in Sundergarh Range and the growth is satisfactory.

Visited one AR plantation in Hemgiri Range where bamboo is the predominant crop and now the area looks like a bamboo plantation. Growth is excellent. Also, Hemgiri Range is famous for its bamboo plantation.

Whatever be the type of plantation in the scheme, it is in AR mode in the field. But in case of ANR, wherever there is shades, growth of the saplings is not satisfactory. It was found that in case of ANR (RET species/medicinal), proper care was not taken in the selection of species especially in RET. Species must be selected as per the scheme and purpose. Also, appropriate species should be raised in the nursery as per the scheme – this reflects an inconsistency in planning for the plantation.

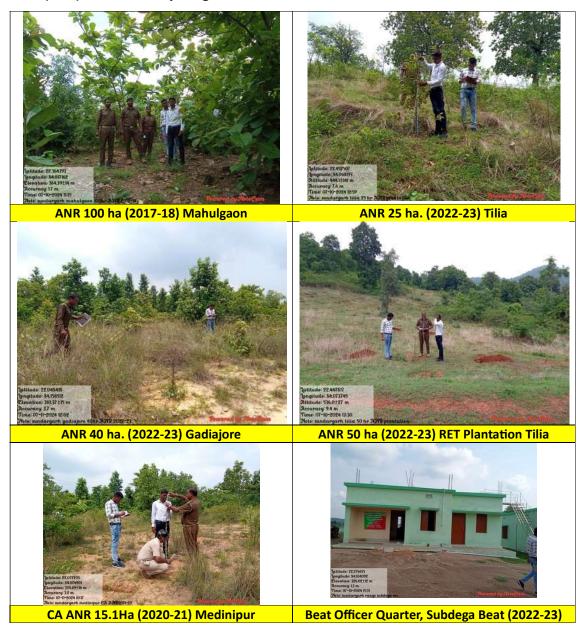

## 6.2.6 (C7.5) Update in e-green portal

It was observed that details of all activities under CAMPA 22-23 have been uploaded in the portal. Print out copy has been provided from the office.

# 6.2.7 (C7.5) Other Observations

There are no additional observations.

# 6.2.8 (C7.5) Filed Survey Images

# 6.2 (C8) Sambalpur Circle

There are 6 forest divisions in this circle, of which 4 are territorial divisions and 2 are wildlife divisions, viz., Bamara WL, Bargarh, Hirakhud WL, Jharsuguda, Rairakhol, and Sambalpur.

Subsequent 5 tables provide information for the Circle, followed by division-wise observations organized under 8 sub-sections. In Sambalpur Circle total expenditure incurred is around Rs. 83.13 Cr. of which Rs. 71.82 Cr. has been spent by the forest wing, and around Rs. 11.31 Cr. has been spent by the wildlife wing of the forest department.

Table C8.6.1.1: Financial Achievements in Sambalpur Circle as per the APO (Rs. In lakh)

Name of Division	Forestry Activities (General)	Wildlife Management	Total Expenditure Incurred
Bamara WL	1,522.90	320.49	1,843.39
Bargarh	1,424.03	36.38	1,460.41

In subsequent subsections division-wise observations are presented. The data has been collected from field level and specific to the activities being observed. Thus, this may not add-up to the circle totals.

# 6.2 (C8.1) Bamra (WL) Division

## 6.2.1 (C8.1) Overall Physical and Financial Progress Analysis

In Bamra Wildlife Division during 22-23 there was a large target of plantation activities that included ANR (other indigenous, RET) and its maintenance, AR etc. All the targets allotted to the division have been fully achieved with a slight variation in financial target.

In the Forestry sector (general) the achievement has been Rs. 1405.69 lakh against the target of 1405.71 lakh. In case of wildlife management, the total target of Rs. 320.49 lakh has been achieved. The targets for AJY, SSO of Bamboo, SMC have all been achieved. SMC like percolation pits, staggered trenches, LBCD in nalas, wire mesh LBCD were prepared in the plantation area as well as assigned area in ANR plantations. SMC structures are also being prepared in separate blocks of forest area which is good and result oriented.

In Sauntimal PRF where SMC work has been created over an area of 70 ha., was visited. A graded guide bund of 760 m. has been created on the foothills of boundary line along with one diaphragm and LBCD of 4m. and 8m. span with an expenditure of Rs. 24.50 lakh. The four LBCDs has been constructed on the foot of the nalas. The quality of work is excellent. Minimum siltation was observed due to low rainfall. In future water table of this area will be surely increase.

#### 6.2.2 (C8.1) Finding on activities under Compensatory Afforestation

Due to construction of infrastructure, expansion of roads, industrial plants etc., a lot of forest land is being diverted for non-forestry purpose. To compensate the loss, at present more emphasis is being given on Compensatory Afforestation with a maintenance upto 10<sup>th</sup> year. In Bamra (Wildlife) Division, there was no allotment for new creation. Only maintenance of 5<sup>th</sup> year plantation ANR@200 plants/ha over 213.34 ha has been achieved. The condition of plantation is good.

## 6.2.3 (C8.1) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

# 6.2.4 (C8.1) Finding on the Activities Integrated Wildlife Management Plan

In this wildlife division, different works like de-silting of water bodies inside sanctuary area, construction of anti- poaching barrack for use by staff, publicity and awareness programme with signage, cattle vaccination, weed eradication, purchase of anti-depredation equipment and fire-fighting equipment has been carried out. Further, meadows have been developed in the forest area to create more and easy food facilities to the herbivorous like deer, barking deer, sambar etc. It is envisaged that as the wild animals will get plenty of food inside forest area, man animal conflict will reduce as the wild animals will not go to the villages in search of food.

### 6.2.5 (C8.1) Finding on the Activities under NPV Fund (A) and NPV Fund (B)

No new creation has been done during 22-23. But different types ANR and AR maintenance has been carried out. Team visited AR plantations and ANR plantations. Type of plantation is different but practically it is all in AR plantations mode in the field with a space of 2.5 X 2.5 m. between plants. In case of ANR, where there are enough blanks and sunlight, the growth of plants is excellent. It is observed in ANR plantation of Kurmimunda PRF 50 ha of 20 -21 Kuchinda range, the growth and vigor of plants is satisfactory.

Similarly, in case of AR plantations such as in Ramjhali AR 15 ha in Kuchinda Range, and Fatamunda AR in Laidaguna PRF of Jamankira Range, the growth of plants is excellent. It was observed that the top of some plants (neem and amla) has dried - perhaps due to shortage of water during summer season.

#### 6.2.6 (C8.1) Update on e-green Portal

Details of all activities under CAMPA during 22-23 have been uploaded in the portal. Print out copy has been collected from office.

#### 6.2.7 (C8.1) Other Observations

There are no additional observations.

## 6.2.8 (C8.1) Filed Survey Images

ANR 50 ha. without Gap plantation Mahavir Rf (2022-23)

SSO Bamboo Jamankirid (2022-23)

# 6.2 (C8.2) Bargarh Division

# 6.2.1 (C8.2) Overall Physical and Financial Progress Analysis

Under CA/PCA Rs.130.27 lakh was released and an amount of Rs.31.07 lakh was spent.

From the Rs. 199.86 received under NPV, Rs.194.17 lakh was spent on creation and maintenance of plantations and balance of Rs. 5.69 lakh was surrendered.

For SSO Bamboo sum of Rs. 68.04 lakh and for SMC amount of Rs. 77.00 lakh has been spent.

For forest protection including fire management, Rs. 136.99 lakh was spent.

Out of the total expenditure of Rs. 1460.41 lakh, the sum of Rs. 1424.03 lakh was from the Forest wing and Rs. 36.38 lakh was from the wild life management portion.

### 6.2.2 (C8.2) Finding on activities under Compensatory Afforestation

Under CA/PCA an amount of Rs. 31.07 lakh spent towards PO (ANR) of 9.584 ha. From this APO, Rs. 31.07 lakh was spent toward  $2^{nd}$  year,  $3^{rd}$  year and  $7^{th}$  year maintenance of 262.394 ha. The condition of plantation is good.

# 6.2.3 (C8.2) Finding on activities under catchment Area Treatment (CAT) Plan

Under the CAT Plan, SMC structure like LBCD and Check Dams were undertaken 4 forest blocks of 3 ranges namely Bhatli Range, Ghess Range and Paikmal Range over in an area of 220 ha. In all, 201 number of LBCD and 10 number of Check Dams have been constructed. Work is good enough. Already siltation is seen and in future, there will be positive impact with increase in ground water table.

# 6.2.4 (C8.2) Finding on the activities under Integrated Wildlife Management

Amount of Rs. 36.38 lakh has been spent toward deployment of vehicle, anti-depredation activities and purchase anti-depredation equipment, payment of compensation for damage to crops and houses by wild animals.

# 6.2.5 (C8.2) Finding on the activities under NPV fund (A) and NPV fund (B)

Under NPV plantation activities like creation of ANR over 1280 ha. at 21 sites, AR over 20 ha. at 03 sites has been done. Similarly,  $2^{nd}$  year maintenance has been done in 1360 ha. ANR and AR  $3^{rd}$  year maintenance has been done over 1050 ha. and  $4^{th}$  year maintenance over 255 ha. has been carried out.

The choice of species should be strictly followed as per the scheme to fulfill the objectives of taking up the plantation activities. Over all condition of plantation was found to be good.

### 6.2.6 (C8.2) Update on e-green portal

Attention should be given to upgrade the e- green portal.

# 6.2.7 (C8.2) Other Observations

There are no additional observations.

# 6.2.8 (C8.2) Field Survey Images

# 6.2 (C8.3) Hirakud Wildlife Division

# 6.2.1 (C8.3) Overall Physical and financial Progress Analysis

Under the APO of 2022-23 - from the Forest Wing a sum of Rs. 265.04 lakh was released and utilized. Similarly amount of Rs. 296.22 lakh from the Wildlife Wing was released and spent.

Activities like SMC, development and maintenance of forest roads and culverts, causeways have been carried out in the field. With the available funds, Continuous Trench Bund has been constructed along the boundary of Reserve Forest, that act as a SMC structure. It is designed in such a fashion that the outer wall of the trench is perpendicular to the base and the inner side is sloped, so that the animals that happen to fall in the trench will come may get out but cannot go outside the RF due to that perpendicular wall. Also, the dugout earth is stacked on outer side of the trench and this increases the height and it acts like a barrier to the animals outside Reserve Forest and such animals are not able to enter the forest area.

#### 6.2.2 (C8.3) Finding on Activities under Compensatory Plantation

No activity has been observed under the category in this division.

# 6.2.3 (C8.3) Finding on Activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division..

# 6.2.4 (C8.3) Finding on the Activities under Integrated Wildlife Management

Activities like maintenance of meadows, weeds eradication, cattle vaccination, purchase of Fire-fighting equipment, fire line creation and its maintenance, deployment of firefighting squad, purchase of anti-depredation equipment and many other items have been done in this fund.

After relocation of villages from Debrigarh Sanctuary, meadows have been developed near the banks of the Hirakud Reservoir. As a result, many herbivorous animals coming to Dam for water, and graze in the grasslands. During the evaluation many Barking deer and spotted deer were seen grazing the grassland at about 10.30 am to 11.30 am.

Moreover, to see the beauty of nature, watch towers have been constructed with the pillars of palm tree and others wooden materials. No concrete has been utilized. The towers are thatched with local straw.

# 6.2.5 (C8.3) Finding on the Activities under NPV Fund (A) and NPV Fund (B)

No activities.

### 6.2.6 (C8.3) Update on e-green watch Portal

The portal is updated.

# 6.2.7 (C8.3) Other Observations

There are no additional observations.

#### 6.2.8 (C8.3) Field Survey Images

Forest Road Maintenance, Lakhanpur Range
(2022-23)

# 6.2 (C8.4) Jharsuguda Division

# 6.2.1 (C8.4) Overall Physical and Financial Progress analysis

The division was allocated funds as follows:

- 1. Forest wing: Rs.697.07 lakh and
- 2. Wild life Management Plan: Rs.149.11 lakh.

From the above, under CA/PCA plantation activities and maintenance amount of Rs. 124.79 lakh was provided to take up activities over 827.3 ha. Similarly, an amount of Rs. 17.99 lakh was provided for creation and maintenance under NPV and other schemes. Rs. 82.01 lakh provided for construction of Forest Guard and Forester quarters and forest roads etc. For fire protection Rs. 47.25 lakh and Rs. 120.65 lakh for forest protection have also been allotted and spent. Works like engagement of fire squad, fire vehicle, creation of fire line and purchase of blower has been done from the fire head.

#### 6.2.2 (C8.4) Finding on activities under Compensatory Afforestation

In Jharsuguda District big plants like Vedant Aluminum Ltd, OPGC power plant, in Brajarajnagar coal mines are being established. So much more importance has been given for plantation activities under CA/PCA. Amount of Rs. 124.79 lakh has been spent in these plantation programmes. Operations like PO, 1<sup>st</sup> year creation, 2<sup>nd</sup> year, 3<sup>rd</sup> year, 4<sup>th</sup> year, 5<sup>th</sup> year and 7<sup>th</sup> year maintenance have been carried out.

CA plantation at Kechobahal 17.3735 ha of 22-23 was visited. The boundary has been secured with a trench. Growth of plantation is excellent. Over all condition of the plantation is good.

#### 6.2.3 (C8.4) Finding On activities under Catchment area treatment (CAT) Plan

Several activities were planned under the CAT plan, but the study team could not observe any activity under the category in this division.

# 6.2.4 (C8.4) Finding on the activities under Integrated Wildlife Plan

Works like anti-depredation activities, deployment of vehicles, and purchase of equipment for driving wild animals and payment of compensation amount for crop damage and house damage has been incurred in this head. An amount of Rs. 149.11 lakh has been spent on these activities.

#### 6.2.5 (C8.4) Finding on the activities under NPV fund (A) and NPV fund (B)

Area of nearly 1450 ha. was treated under NPV scheme. Of this 100 ha was AR and rest 1350 ha. was ANR. An amount of Rs. 174.99 lakh has been spent under NPV for activities like creation and maintenance. Overall condition of the plantations is good.

# 6.2.6 (C8.4) Update on e-green portal

Separate cell has been prepared for this work. More care should be taken for uploading the information on the portal. One print copy has been provided by them for reference.

# 6.2.7 (C8.4) Other Observations

There are no additional observations.

# 6.2.8 (C8.4) Field Survey Images

# 6.2 (C8.5) Redhakhol Division

# 6.2.1 (C8.5) Overall Physical and Financial Progress Analysis

In the APO 2022-23, the total sum of Rs. 1939.56 lakh has been spent – of this Rs.1740.67 lakh was from the Forest wings and Rs. 198.88 lakh from the Wildlife Management head. Under Forest wings works like plantations and maintenance, Subsidiary Silvicultural Operations of Bamboo, SMC, Forest protection, Fire management etc. have being carried out. Amounts of Rs.76.90 lakh and Rs.215.98 lakh have been spent on forest fire mitigation and forest protection respectively.

With the available funds, SMC structures like LBCD were constructed in 17 Forest Blocks at an expenditure of Rs. 350 lakh in all Ranges of the Division. Quality of work is good. Around, 56 nos. of GBCD have been prepared in Hatidhara RF (Comp.11), Kholgarh RF (Comp.26) and Kholgarh RF (Comp.36).

# 6.2.2 (C8.5) Finding on activities under Compensatory Afforestation

Not many activities under CA/PCA. Only 139 ha. of 2<sup>nd</sup> year maintenance and 7.08 ha. of 7<sup>th</sup> year maintenance has been carried out in this head. Total amount of Rs.14.3 lakh has been spent from CAMPA APO 2022-23.

# 6.2.3 (C8.5) Finding On activities under Catchment Area Treatment (CAT) Plan

No activity was observed under the category in this division.

## 6.2.4 (C8.5) Finding on the activities under Integrated Wildlife Plan

An amount of Rs. 198.88 lakh has been spent towards works like anti-depredation activities, purchase of anti-depredation equipment, payment of compensation for crop damage and house damage and human death due to human-animal conflict.

#### 6.2.5 (C8.5) Finding on the activities under NPV fund (A) and NPV fund (B)

An amount of Rs. 430.34 lakh has been spent in this head. Activities like creation under RET and other indigenous species, maintenance work of the 2<sup>nd</sup> year, 3<sup>rd</sup> year and 4<sup>th</sup> year has been carried out. At one site of Naktideul Range Kholgarh RF, the plantation done is showing very good growth and height. But at RET plantation in Kholgarh RF it was found that it had been raised as per usual ANR with no RET species to be seen in this plantation.

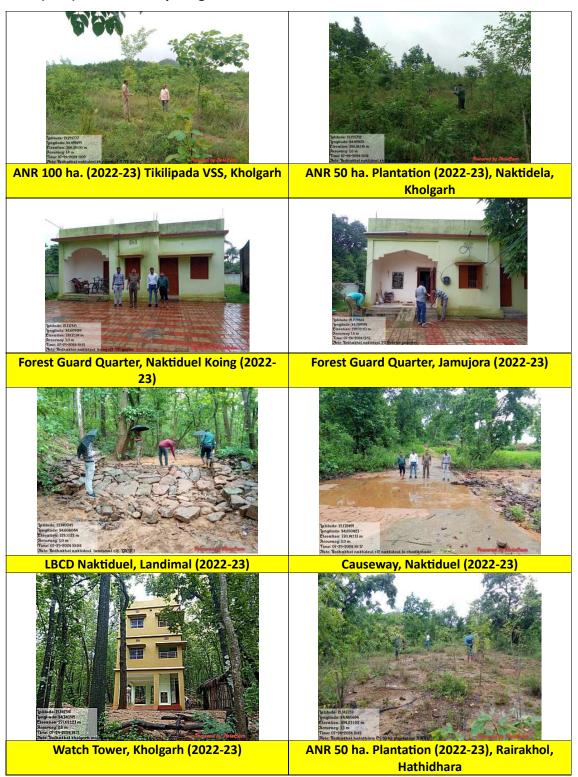

#### 6.2.6 (C8.5) Update on e-green portal

All the data relating to CAMPA is being uploaded at the concerned Range Office. The Data Entry Operators are uploading data of their own. In the Division there is no cell exclusively for the portal. Print copies have been collected by from Range Offices.

### 6.2.7 (C8.5) Other Observations

There are no additional observations.

#### 6.2.8 (C8.5) Field Survey Images

#### 6.2 (C8.6) Sambalpur Division

#### 6.2.1 (C8.6) Overall Physical and Financial Progress Analysis

Plantations and their maintenance have been carried out under NPV as well as CA/PCA. Under CA/PCA an amount of Rs. 278.71 lakh has been spent in PO, creation, and its maintenance. Similarly, an amount of Rs. 279.07 lakh has been spent under NPV toward creation, its maintenance. In SSO and SMC amounts of Rs. 60.47 lakh and Rs. 208.95 lakh respectively have been spent. Besides the above, funds also spent in forest protection, Forest Fire and construction of infrastructure like Range Office, residence, forest road, causeways and culverts.

#### 6.2.2 (C8.6) Finding on activities under Compensatory Afforestation

Compensatory plantation is raised to compensate the loss due to diversion of forest land for non-forestry purpose. Accordingly, to have a successful plantation maintenance for 10<sup>th</sup> year has been allotted in the cost norms. Moreover, funds have also been provided for watch and ward. A site at Basiapara-Birsingarh of area 55 ha ANR @400 plants /ha raised during 2020-21 was visited. Seedlings of 18 months were utilized in the plantation at the site. The progress and growth is of medium quality. More care must be taken to improve the condition of the plantation.

#### 6.2.3 (C8.6) Finding on activities under Catchment Area Treatment (CAT) Plan

No activity has been observed under the category in this division.

#### 6.2.4 (C8.6) Finding on the Activities Integrated Wildlife Management Plan

Amount of Rs. 130.08 lakh has been spent on wild life management. Works like forest protection and fire protection has been carried out. Further anti-depredation work, payment of compensation for loss due to crop damage and house damage by wild animals etc. has been done from this fund.

#### 6.2.5 (C8.6) Finding on the Activities under NPV Fund (A) and NPV Fund (B)

Under this head an amount of Rs. 279.07 lakh has been spent toward the creation of 910 ha. of ANR @200 plants/ha and one Bald Hill Plantation of 15 ha @1600/ha. Similarly, Rs. 67.15 lakh has been spent in maintenance of previous plantation up to 4<sup>th</sup> year.

#### 6.2.6 (C8.6) Update on e-green Portal

E-green portal is being updated in the division office. Print copy of their updating has been provided by the office. Care should be taken to ensure timely upload of the data.

#### 6.2.7 (C8.6) Other Observations

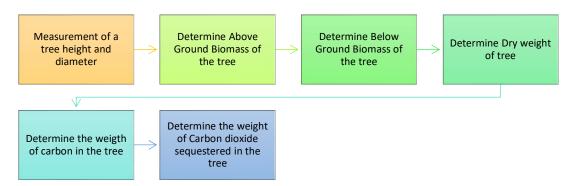

Ther are not additional observations.

#### 6.2.8 (C8.6) Field Survey Images

#### 6.3 CO2 Sequestration of the Plantations under CAMPA

CO<sub>2</sub> sequestration from the plants planted in the plantation area has been attempted to calculate<sup>1</sup> under the evaluation. The process of calculation includes following steps:

As we know that the ecosystems of forests are dynamic and complex. These involves crucial ecological process thereby unfolding significant implications on the carbon balance worldwide. This capability is not merely a passive feature of these ecosystems but a fundamental aspect of the photosynthetic process, wherein trees and plants convert CO<sub>2</sub> and sunlight into energy, essential for their growth and sustenance. The role of CO<sub>2</sub> uptake in forests extends far beyond mere carbon sequestration and has influence on biomass accumulation. Distribution of biomass is central to understanding how trees store carbon. The CO<sub>2</sub> absorbed from the atmosphere is assimilated into both AGB and BGB. As a tree matures, its capacity to sequester carbon increases, making older trees more efficient at absorbing CO<sub>2</sub>. This relationship highlights the significance of forest conservation and the role mature trees play in mitigating climate change. By understanding and supporting these natural processes, capacity of forests to act as carbon sinks, thereby contributing to global efforts to balance our planet's carbon cycle and combat the escalating challenges of climate change. Trees biomass comprises of Above-Ground Biomass (AGB) and Below-Ground Biomass (BGB). AGB include parts of the tree that are visible above the soil line viz., trunk, branches, leaves, and any fruits or flowers. Whereas BGB consists of the roots, which, though less visible, are equally crucial for the tree's stability and nutrient uptake.

To determine the amount of  $CO_2$  absorbed by trees, two critical measurements are taken direction which includes its diameter, measured in cm, and its height, measured in meters. These measurements are essential for calculating both the Above-Ground Biomass (AGB) and Below-Ground Biomass (BGB). The AGB is calculated by the formula  $0.25 \times D$  (Diameter in feet)  $\times H$  (Height in inch). The BGB, which comprises the tree's root system, accounts for approximately 20% of the AGB. Therefore, BGB can be calculated as  $0.2 \times AGB$ . So, total Biomass comes out to AGB+BGB. On average, a tree consists of 72.5% dry matter and 27.5% moisture content. To calculate the tree's dry weight, we could multiply the total weight of the tree by 72.5% i.e 0.725 means Total Dry Weight (TDW) = TB  $\times 0.725$ . Carbon occupies 50% of the total dry weight. Therefore, Total Carbon (TC) = TDW  $\times 0.5$ .

With the value of total carbon, we can calculate the value of  $CO_2$  equivalent sequestered on a tree.  $CO_2$  has one molecule of Carbon and two molecules of Oxygen. Therefore, to determine the weight of carbon dioxide sequestered in the tree, multiply the weight of carbon in the tree by 3.67.

 $CO_2$  weight =  $TC \times 3.67$ . It is worth noting that the  $CO_2$  weight above represents the  $CO_2$  sequestered in the entire lifetime of the tree. To ascertain the annual or yearly rate of  $CO_2$  sequestration, divide the total weight of  $CO_2$  absorbed by the tree's age. This is the simplest way to calculate how much a tree can sequester. It may not be the most accurate but it does gives a closer look on the same.

<sup>&</sup>lt;sup>1</sup> Method adopted from an article of Bas Fransen at <a href="https://www.ecomatcher.com/how-to-calculate-co2-sequestration/">https://www.ecomatcher.com/how-to-calculate-co2-sequestration/</a>

Based on data collected from the concerned officials of the department and field survey. An estimated carbon dioxide sequestered from the plantations under CAMPA in the year under references indicate that out of total 28998.71 ha. the  $CO_2$  weight is estimated as 150606.63 tonnes. The overall average comes out to 5.19 tonnes per ha. It is based on total number of plants found and their average height and girth which varies model-wise, site-wise and species wise. Circle-wise total planted area, total  $CO_2$  sequestration and average  $CO_2$  sequestration is given in the table below:

SI. No	Name of Circle	Area covered under Survey (ha.)	CO <sub>2</sub> weight in Tonnes	Per Ha. CO <sub>2</sub> weight in Tonnes
1	Behrampur	4397.69	29734.07	6.76
2	Baripada	3006.92	18063.89	6.01
3	Sambhalpur	1926.37	884.34	0.46
4	Rourkela	3373.91	10551.09	3.13
5	Angul	3970.40	39697.76	10.00
6	Bhawanipatna	5077.17	8492.51	1.67
7	Koraput	5285.55	22304.26	4.22
8	Bhubaneswar	1960.70	20878.70	10.65
	Total	28998.71	150606.63	5.19

Table 6.9: Circle-wise CO2 Sequestration under CAMPA in Odisha

N.B. Few sites not depicted above

The maximum  $CO_2$  sequestration is reported in Angul circle (39697.76 tonnes) followed by Behrampur circle (29734.07 tonnes) and then Koraput circle (22304.26 tonnes). Good  $CO_2$  sequestration are also reported in Bhubaneswar and Baripada circles. Lowest  $CO_2$  sequestration has been in Sambhalpur circle (884.34 tonnes) followed by Bhawanipatna circle (8492.51 tonnes). Average i.e. per Ha.  $CO_2$  sequestration has been observed in highest in Bhubaneswar circle (10.65 ton per ha.) followed by in Angul circle (10 ton per ha.). Lowest has been reported in case of Sambhalpur circle (0.46 ton per ha.) followed by Bhawanipatna (1.67 ton per ha.). Overall average comes to 5.19 tonnes per ha. The following graphs shows a glimpse of  $CO_2$  sequestered under CAMPA in Odisha for the year under reference.

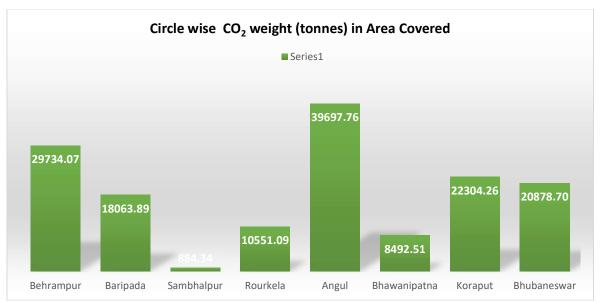

Figure 6.1: Circle wise CO<sub>2</sub> weight (tonnes) in Area Covered

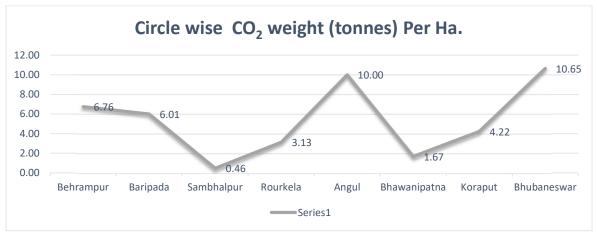

Figure 6.2: Circle wise CO<sub>2</sub> weight (tonnes) per ha.

It is notable that the CO<sub>2</sub> weight calculation has resulted in variations across sites due to plantation models adopted, number of plants planted as per model, and area of the sampled plantation site visa-vis survival percentage, and growth parameters (including girth and height). Model wise distribution of selected plantation sites in different circles across the entire state indicate that under AR plantation model (having different sub categories including block plantation, bald hill plantation, etc.) where 1000 or 1600 plants per ha. were planted, the proportion was highest in Bhubaneshwar (41.82%) circle followed by Berhampur (36.00%) circle and then Koraput (29.58%) circle. On the other hand, the lowest proportion of AR model plantation site selected was in Sambhalpur (12.50%) circle, followed by Rourkela (16.44%) and then Bhawanipatna (27.18%) circle.

Likewise, under ANR plantation model wherein either 200 plants/ha. or somewhere 500 plants/ha. have been planted, highest proportion of such sites is in Sambhalpur circle (82.50%) followed by Rourkela (72.60%) and then Baripada (68.63%) circle. Whereas under ANR model lowest proportion has been recorded in Bhubaneswar (40.00%) circle, followed by Berhampur (49.60%) circle and then Angul (55.00%) circle. A percentage wise and circle wise distribution of sites selected under plantations during evaluation is given in the table below:

SI.	Circle	AR	RET with	Casuarina	AR	ANR	ANR	Avenue	Miyawaki	Mangrove	Other	Total
No.		plantation	Gap @	plantation	Bamboo	plantation	fodder	plantation	Plantation	plantation		%
		@	300	@ 2500	plantation	with gap	and	@ 250	@ 8000	@4445		,-
		1000/1600	plants/ha.	plants per	400	@ 200 /	fruit	plants per	plants per	plants per		
		plants / ha		ha.	plants per	500	species	ha.	ha.	ha.

Table 6.10: Model-wise and circle wise distribution of number of sampled sites (percentage wise)

It is pertinent to mention that under Miyawaki plantation model where in total 8000 plants were planted, under Mangrove plantation total plants planted were 4445 plants per ha. and Casuarina plantation model where in 2500 plants were planted per ha., the CO2 weight have shown variations in the results also. Also, total plantation area in the selected site has also been a major factor in total CO2 weight results.

In accordance to above, a list of plantation model wise distribution of number of sites selected in the sampled area is given below:

Table 6.11: Model-wise and circle wise distribution of number of sampled sites (percentage wise)

SI.	Circle	AR	RET with	Casuarina	AR	ANR	ANR	Avenue	Miyawaki	Mangrove	Other	Total
No.		plantation	Gap @	plantation	Bamboo	plantation	fodder	plantation	Plantation	plantation		
		@	300	@ 2500	plantation	with gap	and	@ 250	@ 8000	@4445		
		1000/1600	plants/ha.	plants per	400	@ 200 /	fruit	plants per	plants per	plants per		
		plants / ha		ha.	plants per	500	species	ha.	ha.	ha.		
		including			ha.	plants per	@ 500					
		block, bald				ha.	plants					
		hill, etc.					per ha.					
1	Berhampur	45	5	2	9	62	2	0	0	0	0	125
2	Baripada	14	1	0	1	35	0	0	0	0	0	51
3	Sambhalpur	5	0	0	1	33	1	0	0	0	0	40
4	Rourkela	12	0	0	0	53	5	3	0	0	0	73
5	Angul	23	0	0	5	44	4	2	0	0	2	80
6	Bhawanipatna	28	2	0	3	69	1	0	0	0	0	103
7	Koraput	42	4	0	2	87	0	3	4	0	0	142
8	Bhubaneswar	23	0	8	0	22	0	0	0	2	0	55

As already mentioned above, the main reason for low  $CO_2$  weight in Sambhalpur circle has been that the majority of sites fall in the selected sample were under ANR plantation (82.50%) wherein only 200 plants were planted followed by AR plantation model (12.50%) where in around 1600 or 1000 plants have been planted. Similarly, the maximum per ha.  $CO_2$  weight has been calculated in Bhubaneswar circle where in under ANR plantation model 40.00% sites were selected whereas under AR plantation model 41.82% sites fall. The maximum average weight of  $CO_2$  has been recorded in Bhubaneswar circle @10.65 tonnes per ha. whereas minimum in Sambhalpur circle @ 0.46 ton per ha.

Likewise, a selected comparison of three divisions including Angul, Kalahandi South and Kalahandi North has been done and depicted in the table below:

Table 6.12: Number of sites selected in selected three divisions

SI. No.	Division	ANR plantation model (200 /500 plants per ha.)	%	AR plantation model (1600/1000 plants per ha.)	%	RET with Gap plants	%	Bamboo	%	Total sites selected	%	Average CO <sub>2</sub> weight in tonnes per ha.
1	Angul	15	88.24	1	5.88	0	0.00	1	5.88	17	100.00	1.07
2	Kalahandi South	9	56.25	6	37.50	1	6.25	0	0.00	16	100.00	3.97
3	Kalahandi North	14	87.50	2	12.50	0	0.00	0	0.00	16	100.00	1.27

In Angul division out of total 17 selected sites, 15 were (88.24%) were under ANR model. Likewise in Kalahandi north out of total 16 selected plantation sites, 14 (87.50%) were under ANR model, whereas in Kalahandi South division, 9 (56.25%) were under ANR plantation model sites and 6 (37.50%) were under AR plantation model. Accordingly, out of these three divisions,  $CO_2$  weight has been maximum in Kalahandi south division that was 3.97 tonnes/ha., followed by Kalahandi north division @ 1.27 tonnes per ha. and minimum in Angul division @ 1.07 tonnes/ha. Site wise details of  $CO_2$  calculated are given in the **Annexure 4** of this report.

The above indicates that the plantations undertaken under the CAMPA in different circles in Odisha have yielded environmental benefits also including Carbon sequestration. These plantations would surely yield better results in future for which proper protection measures need to be ensured including social as well as physical fencings. Such environmental benefits need to be captured more scientifically using appropriate tools and techniques and should be documented at a regular time of interval. It is anticipated that as the trees would grow the environmental benefits are bound to multiply further.

The CO<sub>2</sub> sequestered benefits are calculated based on plantations undertaken in the plantation areas. There would be more Carbon sequestered if protection provided to the natural growing plants/trees and carbon restored in the soils are considered. The Carbon sequestration of the naturally grown plants/trees in the plantation sites/areas would surely add on its weight. Greater impact would be in the ANR sites wherein naturally grown plants/trees have already been existing. It is recommended that these aspects would need further examination. Refer **Annex 2 Change Detection of Activity through Satellite Imageries**.

#### **6.4 Biodiversity Index**

Rich biodiversity is an indicator of a healthy ecosystem. It also provides a wide range of goods and services that are essential for the sustenance of the biota. Conservation and sustainable use of biodiversity is an indicator of sustainable development. Unfortunately, increasing anthropogenic activities and over-exploitation of the resources existing in an ecosystem have destroyed its homeostasis and altered the habitat of the native species. This has threatened the survival of endemic species making them endangered. Similarly, destruction of wildlife habitats has remained the leading threat to biodiversity.

The species diversity of planted plants has been determined with the Shannon-Wiener diversity index (Shannon & Wiener, 1963). The Concentration of Dominance (CD) was also calculated to evaluate the level of dominance of a species within a community and was expressed by Simpson's index (Simpson, 1949). Diversity parameters such as species richness, diversity index (H') and concentration of dominance (Cd) varied in different plantation sites and models. Species richness, which refers to the number of different species in a given area generally ranged from 2 to 26 species per plantation, barring few exceptions, showing floral diversity. Higher species richness indicates a more complex and potentially more stable ecosystem, as it indicates a greater diversity of ecological niches being occupied. The diversity index (H') a measure that combines both the number of species and their relative abundance, ranges from 0.01 to 2.31. A diversity index closer to 1 indicates a more even distribution of the community, where no single species dominates the ecosystem. Conversely, a low diversity index indicates the dominance of one or fewer species, which can lead to lower ecosystem resilience and stability. The dominance concentration, which ranges from 0.0002 to 1.00, reflects the extent to which one or a few species dominate the plantations. A dominance concentration close to 1 indicates that one species overwhelmingly dominates the ecosystem, possibly leading to lower biodiversity and resilience of the ecosystem. Conversely, a lower dominance concentration indicates a more balanced distribution of species, which may contribute to a more stable and resilient ecosystem. The observed variation in species richness, diversity index and dominance concentration illustrate the complex interplay of ecological factors in these plantations. The findings provide a comprehensive view with notable differences in diversity levels among plantation sites.

Overall, plantations were carried out in the Odisha state in total 8 Circles under different models, and showed different biodiversity index. Highest biodiversity is observed under the plantations carried out under ANR model, followed by AR plantation model. Good biodiversity is also observed under Avenue plantation and Bald Hill plantation. Even good biodiversity is shown in case of Miyawaki plantation model. Low biodiversity is observed under bamboo and mangrove plantations. Highest bio diversity of 2.29 is observed in the following sites under ANR model of plantation:

Circle	Division	Range	Site
Behrampur	Parlakhemudi	Mohana	Ustapada
Behrampur	Ghumsur North	Barahkuda	Gallery RF C/16
Bhawanipatna	Khariar	Khariar	Mantritorai
Sambhalpur	Bamara WL	Bamara	Mahavir RF
Rourkela	Rourkela	Banki	South Champajharana
Angul	Cuttak	Dalijora	Anjira

During the field visits to 46 divisions, more than 100 tree species were observed under plantations which includes Amla, Bamboo, Dolichandan, Holoptelea, Karanja, Gambhari, Jack Fruit, Neem, Rosewood, Sissoo, Salia *Bixa oreleana*, Jamun, Mango, Piasal, Arjuna, Mehagani, Cashew, Custard

Apple, Simli, Bahada, Acacia, Kala Sirisa, Pahadi Sissoo, Sunari, Sandal Wood, Phanphana, *Mallotus*, Red Sandal, Kamala Gundi, Patuli, Tamarind, Behla, Kusum, Guava/Pijuli, Phasi, Neem, Simaruba, Asana, Mundumudi, Kaitha, Rain Tree, *S. foetida*, Kanchana, Sahaja, Simakayan, Casuarina, *Pithecellobium*, Mahula, Alur, Bali Sissoo, Chakunda, Cassia, Dhala Sirisa, Lembu, Charmja, Gangasiuli, Katha Badam, Ram Phal, Kala Bhalia, Harida, *Holoptelia*, Baula, Bada Chakunda, Radhachuda, Bandham, Sal, Kasi, Bahawa, Mitikina, Beera, M. Kendu, Dimiri, Bahala Kumbhi, Panasa, Barakoli, Jhaun, Aswastha, Bara, Tentuli, Chhatran, Sana Chakunda, Krushna Chuda, Sidha, Subabul, Churla, Dahal Sirish, Ankul, Pista Badam, Mangium, Bija, Bada Chakunda, Dhaura, Paladhua, Mundi, Ashoka, Dhaurmja, Pipal, Kumbi, Bandhan, Atta, Ambada, Nidrabati, Reetha, Jeutha, Bhalia, Boula, Seman, Banian, Dalimba, Barakoli, Dharm, Khirni, Bahal, Kuler, Shija, Bordi, Nageswar, Panasa, Haldu, Thelka, Imli, Paladhua, Osta, Bana Bhalia, Muchukunda, Tut/Mulberry, Kumbhi, Silver Oak, Maha Bodhi, Rai, Seduka, Bandari, Kalichua, Sinduka, Dalimba, Somakarya, Henjal, Pireli, Pane Jambhari and Jangal Jalebi.

A brief description of circle wise biodiversity observed is given below. Refer **Annex 4: Diversity Index** and **Carbon Analysis** 

#### **Behrampur Circle**

Biodiversity in the Behrampur Circle displayed considerable variation, ranging from 0 to 2.29. The Ghumsur North and Parlakhmudi divisions recorded the highest index at Gallery RF C/16 and Ustapada sites, respectively with a value of 2.29 each. The Phulbani Division also demonstrated good biodiversity across all plantations, each exhibiting indices above 1. Likewise, the Ghumsur South and Behrampur Divisions exhibited notable species richness, with many plantations exceeding a diversity index of 1. Also the Parlakhemundi Division recorded high indexes at the Kurlunda plantation (2.18), while several plantations across divisions, including Sarabadi, Boxipalli Gokharkuda, Dutiasahi UDPF K. Nuagam, Ratnei DPF, Satabahada, and Gohili Lankagarh RF, reported a biodiversity index of 0 due to planting of single species such as *Phasi, Casuarina*, and *Salia Bamboo*.

#### **Baripada Circle**

The Baripada Circle presented a range of biodiversity indices, from 0 to 2.28, with the Tameipal plantation in the Keonjhar WL Division achieving the highest index at 2.28. The Baripada Division exhibited diversity values between 1.01 and 2.21, indicating moderate species richness across its plantations. Two plantations in the Balasore Division recorded a biodiversity index of 0, attributable to single plantations of *Bamboo* and *Jhaun*. Meanwhile, the Karanjia Division displayed strong biodiversity, with indices ranging from 1.06 to 2.15. In the Rairangpur and Keonjhar WL Divisions, several plantations recorded values exceeding 2, underscoring the richness of species in these regions.

#### Sambalpur Circle

Biodiversity index in the Sambalpur Circle ranged from 0 to 2.29, reflecting varying levels of species diversity. The Sambalpur Division performed well, with diversity values ranging between 1.03 and 2.27, indicative of robust biodiversity across many sites. In contrast, the Dechuan plantation in the Bargarh Division recorded a biodiversity index of 0, attributed to the presence of only *Bamboo*. Other divisions such as Rariakhol, Jharsuguda, and Bamara WL exhibited strong species richness, with most plantations maintaining biodiversity indices above 1. The Mahavir RF plantation in the Bamara WL Division posted the highest index in the circle at 2.29.

#### **Rourkela Circle**

The Rourkela Circle demonstrated a relatively high range of biodiversity, with indices falling between 0.70 and 2.29. Notably, no plantations in this circle reported an index of 0, signaling the absence of single plantations. The Sundargarh and Rourkela Divisions were prominent for their high biodiversity, with the lowest recorded indices being 1.2 and 1.09, respectively. However, certain areas within the Bonai, Keonjhar, and Deogarh Divisions revealed lower levels of biodiversity, underscoring the variability within the circle.

#### **Angul Circle**

In the Angul Circle, biodiversity indices spanned from 0 to 2.29, indicating both rich and poor species diversity across different plantations. The Angul and Athamallik Divisions displayed a wide range of diversity, with certain plantations showing high richness while others exhibited minimal diversity. The Cuttack Division predominantly showed strong biodiversity (Anjira site showing highest of 2.29), with indices above 1.5 in most locations, though a few sites recorded lower values. The Dhenkanal Division had three sites with biodiversity indices below 1, reflecting poorer species richness. Conversely, in the Athagarh Division, all but one plantation exhibited significant species diversity, although seven plantations reported a biodiversity index of 0 due to single planting of species like *Arjuna* and *Bamboo*.

#### **Bhawanipatna Circle**

The Bhawanipatna Circle showed varying levels of biodiversity, with indices ranging from 0 to 2.29. The Sunabeda WL Division displayed strong biodiversity, with values exceeding 1.5 in many plantations. The Bolangir Division, however, had a few sites with poor species diversity. In contrast, the Khariar and Subarnapur Divisions generally exhibited significant biodiversity, although a few locations recorded lower values. The Kalahandi South and North Divisions emerged as the richest in terms of biodiversity, with the majority of sites showing high indices, except for one plantation that recorded a value of 0.7, primarily due to singles of *Phasi, Bamboo*, and *Arjuna*.

#### **Koraput Circle**

Biodiversity across the Koraput Circle was generally strong, with indices ranging from 0 to 2.27. The Rayagada Division stood out with consistently high biodiversity across its plantations. Only two out of 18 sites in the Malkangiri Division exhibited poor species richness. Similarly, the Koraput, Jeypore, and Nabarangapur Divisions reported considerable biodiversity, although a few plantations showed lower indices.

#### **Bhubaneswar Circle**

In the Bhubaneswar Circle, biodiversity values were generally high, with City Forest, Bhubaneswar (BBSR), showing indices between 1.5 and 2.1. However, certain areas in the Rajnagar WL and Bhadrak WL Divisions had low biodiversity due to single plantations of *Casuarina*, Rai, and Jhaun. The Chilika WL Division demonstrated notable species richness, except for one site where only *Casuarina* was planted. In the Puri WL and Nayagarh Divisions, several sites exhibited poor biodiversity, with indices below 1, while other sites reported values ranging from 1.5 to 2. The Khordha Division had one site with low biodiversity, but most plantations recorded indices between 1.5 and 2.1. The Chandaka WL Division showed strong biodiversity, with indices ranging from 1.75 to 2.1 across most of its sites.

#### 6.5 Impact Analysis of SMC Activities

In this study, Normalize Difference Vegetation Index (NDVI) and normalized difference Soil Moisture Index (NDMI) analysis was carried out on satellite data of November/ December 2023.

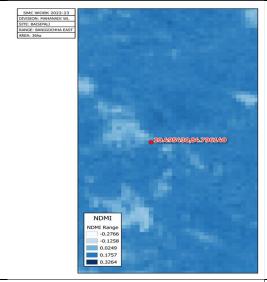

The Normalized Difference Soil Moisture Index is used to determine Soil vegetation water content and monitor droughts. The value range of the NDMI is (-)1 to 1. Negative values of NDMI (values approaching-1) correspond to barren soil devoid of moisture. Values around zero (-0.2 to 0.4) generally correspond to water stress. High, positive values represent high canopy without water stress (approximately 0.4).

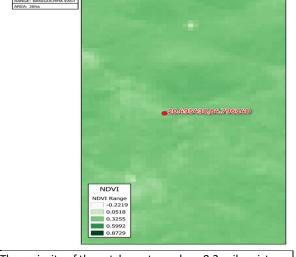

The Normalized Difference Vegetation Index is a simple, but effective index for quantifying green vegetation. It is a measure of the state of vegetation health based on how plants reflect light at certain wavelengths. The value range of the NDVI is -1 to 1. Negative values of NDVI (values approaching -1) correspond to water. Values close to zero (-0. Ito 0\_1) generally correspond to barren areas of rock, sand, or snow Low, positive values represent shrub and grassland (approximately 02 to 04), while high values indicate temperate and tropical rainforests (values approaching 1).

The value of NDVI of sample area on an average is 0.20 (maximum recorded 0.387 & minimum recorded 0.006) and NDMI is 0.16 (maximum recorded 0.398 & minimum recorded 0.026). The Satellite Imageries analysis data indicate that the Soil Moisture Conservation (SMC) activities like construction of RCC Check Dam / water harvesting structure, Loose Boulders Check Dam (LBCD), Graded Earthen Bunds, Staggered Trench, Sub-Surface Dyke etc. are successful and the purpose of the construction is also served. The status of moisture is good. Refer Annex 3: Value of NDVI and Soil Moisture Index estimated through Satellite Imageries Analysis.

Site wise some analysis with images are presented below:

1. Mahanadi Wildlife Division	Angul Circle			
Name of Range: Banigochha East	Catchment Area: 36 ha			
Name of Site: Baisipali RF Current Status: Good				
Activity: Loose Boulders Check Dam (LBCD). Water Harvesting Structure (WHS) and Sub-Surface Dyke				

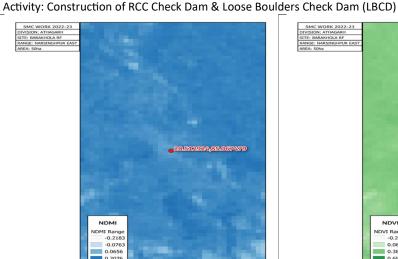

The majority of the catchment area has - 0.1 soil moisture index and some areas even have more than 0.3 value indicating a successful SMC work.

The majority of the catchment area has -0.2 soil moisture index and some areas even have more than 0.5 value indicating a successful SMC work.

2.: Athagarh Division	Angul Circle			
Name of Range: Narsinghpur West	Catchment Area: 100 ha			
Name of Site: Barakhola RF	Current Status: Good

#### 7. Case Studies/ Best Practices

## Case 1: Relocation of Villages from Debigarh WLS – A win-win for the villagers and the wildlife

To provide adequate prey to large carnivores "Wildlife Habitat Management" was taken up intensively during current year to enhance habitat productivity and to increase the density and composition of ungulates inside Debrigarh Wildlife Sanctuary. The Sanctuary is home to approximately 40 species of mammals, 234 species of birds, 41 species of reptiles, 12 species of amphibians and more than 80 species of butterflies. The human habitations within Debrigarh often underwent negative interactions with wild animals due to crop depredation. In 2022 and 2023, 400 families of 4 villages from Debrigarh Sanctuary were relocated and resettled outside the Sanctuary.

In 2023 and 2024 about 500 hectares of land recovered after relocation has been converted to productive grasslands with nutritious fodder for the ungulates. More than 10,000 kg grass seeds of *Heteropogon, Dicanthium, Chloris, Themeda,* wild bajra etc. have been broadcasted during these years beside maintenance of grasslands of these species along with *Vetiveria, Saccharum, Oplismenus* etc. Two "Relief Enclosures", of 2 ha. each have been erected within the grasslands for long-term management.

Regular training of frontline staff has been carried out round the year for seasonal maintenance of meadows along with sessions on identification and propagation techniques. At Debrigarh 6 kinds of habitat i.e. grazing, browsing, resting, hiding, breeding and nestling has been curated systematically for the herbivores in the meadows.

It has been observed that the movement of carnivores has become more frequent in these locations now due to gathering of ungulates. Spatial separation of human beings and the animals by relocation of villages from Debrigarh Sanctuary has brought good results for both animals and humans.

View of grasslands developed in the lands vacated by villagers

On one hand, the creation of grassland in the relocated space is providing better habitat for the ungulates and consequently better conditions for the carnivores. This has also checked the animal movement to adjoining human habitations and cultivated areas thereby reducing the incidents of man-animal conflict.

On the other hand, the villagers who had lived inside forest without electricity, health services, road connectivity, education, deprived of all basic facilities of life have now got an opportunity to lead healthy, happy and better lives post relocation, fulfilling their social as well as economical

needs. All 400 families have already received Rs. 15 lakh compensation (each family is also drawing monthly interest money from their fixed deposits), 10 decimal patta land and now they are constructing their own 'Biju Pucca Ghars' while residing in the relocation colonies created by Forest Department outside the Sanctuary. Permanent Community halls are used for their social functions and during day time school is operational. Thus this is a win-win situation for the villagers and the wild animals.

# Case 2: A plantation for Green Cover and Soil Water Conservation - Aska Range of Ghumusur South Forest Division

Scheme – CAMPA APO-2022-23 – NPV Plantation Type – Bald Hill Plantation – Area-10 Hct Status – SULIAGUDA DPF Site – KENDUPALLI GPS – N-19.38.40.1 E-84.33.15.7

This is the tale of the conversion of a degraded patch of DPF having very eroded soil with calcareous deposits into a patch of green forests with improvement in soil and water conservation.

The appropriateness of the species planted, that includes neem (*Azadirachta indica*), karanja (*Pongamia pinnata*), gambhar (*Gmelina arborea*), sissoo (*Dalbergia sissoo*), rosewood (*Dalbergia latifolia*), bamboo, red sander (*Pterocarpus santalinus*) and amla (*Emblica officinalis*) is reflected in the high survival of 99.8%. The saplings are showing excellent growth with neem having reached average height of 3.0 m., amla 2.7 m., sissoo 2.9 m., karanja 2.1 m., rosewood 2 m. and bamboo (salia) 3.8 m. The average girth is above 18 cm. Secondary growth is noticed on bark surface of all species. This is associated with the digging of 6000 staggered trenches for Soil Moisture Conservation.

The entire effort is recorded in a well maintained plot wise pitting register and plot wise grid line for species planted.

The Green Fence of Bamboo and Agave planted in quincunx pattern has developed into a green boundary fence that is able to keep cattle and other domesticated animals out of the planted area.

The adjoining agricultural fields already enjoy improved water flow for longer periods. Thus the agriculture and thereby the local economy is already being impacted in a positive way.

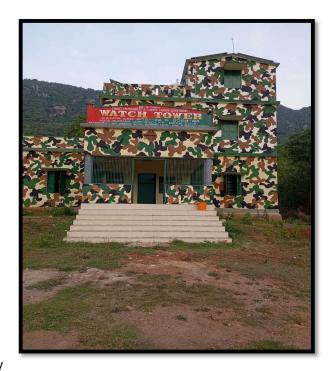

Thus, the aims and objectives of raising plantation to cover a Bald Hill and turning it into a wooded patch of greenery with multiple benefits for public utility and humanity are admirably met with at this site. This has become possible due to the all-out efforts of the staff with timely and proper intervention of all planting and post planting activities.

#### **Case 3: A Towering Structure for Forest and Wildlife Conservation**

Division – Parlakhemundi Range – Mohendra Section – Garabandha Scheme – CAMPA APO- 2021-22/ 2022-23 Work – Watch Tower Site – Durgaon UDPF

The remote forests of Durgaon have moderate forest growth, but are excellent habitat for wildlife species like sambar (Rusa unicolor), spotted deer (Axis axis), porcupine (Erethizon dorsatum), leopard (Panthera pardus), star tortoise (Geochelone elegans), barking deer (Muntiacus muntjak), king cobra (Ophiophagus hannah), etc. It is covered with RET species like red sander (Pterocarpus santalinus), Kataka (Strichnox patatoram) & Piasal (Pterocarpus marsupium).

The well-constructed Watchtower with camouflage colouring within this forest is a masterstroke. It will help to greatly enhance the protection of this exceedingly valuable patch of forest. The composite building with accommodation for staff and extended viewing tower will greatly enhance the ability

of the staff to provide protective cover to these wild resources rich area. Visiting officials and tourists alike will be able to see and enjoy the natural wonders of the forests.

#### Case 4: Control of Podu Cultivation by motivating Tribal villagers

Scheme CAMPA APO: 2022-23

Component: Bald Hill Plantation – 10 ha.

Circle: Brahmapur Division: Balliguda Range: Belgarh Site: Pikusi

The Belgarh and Kotgada ranges of the Balliguda Forest Division have large tracts of land under 'podu' or shifting cultivation. Lying near the Kotgada Wildlife Sanctuary, these areas are a constant source of threat to the conservation of the Sanctuary with fires resulting from crop residue burning that often spread into the protected area alongside a variety of other biotic pressures.

Using the CAMPA funds the staff of Belgarh Range decided to raise a plantation on a patch of land that was under podu. The first challenge was in convincing the local tribal villagers is abandoning the practice of podu and in converting it into a patch of forest with growth of multiple variety of trees. After overcoming the first and the biggest hurdle of convincing the farmers and getting their whole hearted cooperation, the department embarked on raising a Bald Hill Plantation consisting of multiple species that included sissoo (*Dalbergia sissoo*), neem (*Azadirachta indica*), Baheda (*Terminalia bellirica*), peepul (*Ficus religiosa*), amla (*Emblica officinalis*), karanja (*Pongamia pinnata*), jamun (*Syzygium cumini*), phasi (*Anogeissus acuminata*) and bamboo. The objective was to raise a multi-species multi-tiered and forested area from which the villagers would be able to derive multiple benefits. The issue of soil moisture conservation has been addressed through contour bunding and staggered trenches.

The success of the plantation is evident from the fact that the survival of the plantation is 98% and the average height of the saplings is about 3 m. The image above shows the height of the saplings clearly along the tree line on the ridge.

The plantation site has been visited by many senior forest officials including the Regional Chief Conservator of Forests, the Divisional Forest Officer, the Assistant Conservator of Forests and the local Range Officer along with local elected members of the community and staff of NGO's and all of them have contributed to greening of the area by planting a tree each. The trees so planted have been marked by circling with bricks and a colourful entry gate to the plantation has also been erected.

In the short span of time since the plantation was raised, there are reports of reduced incidents of fire damage to the Sanctuary during the fire season. Thus, the benefits from the plantation have started to flow and as it takes the shape of a wooded area, there is bound to be a reduction in soil erosion, improvement in soil moisture levels and improvement in the soil quality besides the numerous benefits that will accrue from the multiple species that have been planted. Evidently, a job well done.

# Case 5: A Shelterbelt Plantation from the Costal Belt – Satapada Range of Chilika Wildlife Division

Scheme – CAMPA APO-2022-23 – NPV (1) Scheme Type – Shelterbelt Plantation – Area-30 Ha. Location – Rambhartia PRF Site – Manikapatna

Over the years, large sections of the coastal plantations have been heavily damaged by the cyclones named 'HUDHUD', 'PHAILIN' and 'TITILI'. The loss of these shelter belts have had grave implication for the farmers in the adjoining regions as the sand from the coast was blown onto the agricultural fields by the oceanic winds making farming a difficult proposition.

To make up for the loss of the valuable shelterbelts, under the provisions CAMPA 2022-23, a plantation of *Casurina equisetifolia* has been done over an area of 30 ha in Rambhartia PRF in Satpada Range.

The plantation is a successful one with a survival of 99.3% and shows uniform growth of upto 2 m. Most of the saplings have acquired a bushy shape with many lateral branches. Even in the short span of time since the plantation has been raised, it has started functioning like a wind break with shelterbelt effect. The watering holes that had been dug to provide water to the saplings are now being used by the wild animals that have started occupying the restored habitat. These include deer, mongoose, porcupine, jackal and lizards.

Third Party Evaluation of Projects CAMPA, Odisha | Financial Years 2022-23 Submitted: January 15, 2025

Thus, the palisade developed along the coast over a length of about 4 km has started providing the inland side protection from sand laden winds from the seaward side. Species like *Ipomoea biloba* have started creeping along the ground improving the ground cover and binding the soil.

In addition, the plantation activity has provided a source of income to the local villagers who had been deprived of livelihood due to the area being in the sector that is declared a no fishing zone for the conservation of Oliver Ridley Turtles.

Thus, the plantation has started providing many ecosystem and economic services in a very short period, and these are bound to increase manifold as the plantation develops fully.

#### 8. SSO Bamboo

Under the CAMPA APO 2022-23, SSO Bamboo activities were taken in 27 divisions covering 76464.72 ha area where expenditure incurred Rs. 1,944.46 lakh. Activities are mainly removal of all dead and dry clump, high stumps and hanging branches and clean up to arm's reach, Removal of climber's damaging the clumps, General tyding up of the clumps, Soil mounding in the clumps for better regeneration of the clumps, Stone mounding in downhill side of bamboo clumps keeping distance upto 50 cm and above, Removal of all mal formed, twisted, Insect attacked than and top broken bamboos etc. Table 6.13 below depicts an overview of the work done in the APO.

Table 6.13: Division-wise Physical and Financial Status under SSO of Bamboo

Name of Circle	Name of Division		Degraded bamboo Forests O Bamboo)

	Malkangiri	5000	126.00
	TOTAL	15000	378.00
	<b>Grand Total</b>	76464.723	1944.46

Under the CAMPA APO special focus was given on improving the quality and productivity of the bamboo forests.

Based on the field observations visiting 62 sample SSO bamboo sites across 25 forest divisions falling in 7 Circles, substantiated scrutiny of documents and interactions with the field formations following becomes evident:

- The CAMPA provided necessary funds for improving the existing bamboo forests, which
  otherwise was getting deteriorated due to paucity of funds for undertaking necessary
  silvicultural operations;
- 2) The decongestion and treatment of clumps have resulted in the regeneration of new culms;
- 3) Elimination of dead/ damaged clumps, and opening and turning up of soil has provided water percolation, and in turn promoted growth of new and rigorous clumps;
- 4) Half-moon trenches & Circular trenches have been done effectively and supporting the conservation of soil and water resulting in generation of new culms;
- 5) During the period no fire incidence ware reported in the sample area;
- 6) GPS Coordinates have been updated for all the treated areas. Topo-sheets are also available for the sites;
- 7) Site records and Clumps Registers are well maintained and updated;
- 8) Damages by elephant were observed at some sites. The clumps that were damaged by foraging elephants have been given new lease of life, as the damaged clumps would otherwise have perished;
- 9) Field staff is sufficiently skilled in executing the treatment of bamboo;
- 10) Visible improvement is evident between the treated bamboo areas in comparison to the adjoining untreated bamboo areas. Such practice should be continued in future.

#### 9. Key Suggestions

Based on the field observations, scrutiny of documents and interactions with the field formations including some senior frontline officials, the following recommendations are presented:

- The nursery practices can be further supported by ensuring that only seeds from known good sources are used for raising the saplings. This will ensure the use of only quality planting material. Protocols for identification of plus trees and collection of seeds as per seasonality should be followed rigorously.
- 2. Raising of saplings in nurseries should be aligned with the changing policies and priorities at the national and state levels.
- 3. The plantation models should be decided considering the suitability of species and biodiversity values of the areas.
- 4. The choice of species must be decided considering the requirements of the sites. If suitable stocks are not available in the nearest nursery, then alternative arrangements should be made.
- 5. System for undertaking independent quality checks of the construction works should be adopted by engaging specialized agency, if possible or any other suitable organization.
- 6. The uploading of inputs at the e-green watch portal must be made a matter of routine. The format could be adopted for all departmental plantation and field work activities.
- 7. The mapping of biodiversity recovery and mapping of other success protocols could be made a part of the regular monitoring routines.
- 8. The visit of senior officials and the routine recording of their directions and status of implementation of their directives should be made a part of the activities of the field staff.
- 9. Enhanced people's participation especially in protection and conservation works should be made a regular part of the protocols more so in the protected areas.
- 10. The skill of staff working in nurseries, in wildlife conservation and other such selected sectors should be upgraded with training to promote the acquisition of specialized skills.
- 11. An award and reward system could be considered for the frontline staff for the implementation of CAMPA works.
- 12. The maintenance of plantations could have a concurrent component for measurement of sample plots for monitoring of change so that there is some data available about the effectiveness of the inputs.

# Evaluation of Plantation Works (Use Form 1 and Form 1A)

#### Sampling method and Sampling %

- Range-wise list of plantation sites will be collected from the divisions
- Two Ranges from each division where maximum areas covered under the afforestation activities will be selected
- In each selected Forest Range serial number will be given to all the sites
- 10% of the total sites provided as per the list will be randomly selected utilizing Random Number Table
- 2% of the area will be enumerated for each sampled site by laying plots of size 33m x 33m (approx. 0.1 ha.)
- The plots will be laid randomly on the diagonal starting from one corner of the treatment/ plantation site
- Photograph along with GPS location (using mobile app)

#### **DATA COLLECTION**

- Suitability of location of plantation
- Year of plantation
- Area of the plantation
- Suitability of planted species per agro-climatic conditions
- · Name & Number of species planted
- Spacing of plantation
- Type of planting: AR/Block/ANR/Avenue/Fruit & fodder/ Miyawaki/ RET/ Bamboo/ Bald Hill/ River bank/ Canal-side/Others
- Number of plants planted/ Spacing
- Average height of plants
- · Average collar girth
- Silvicultural operation such as weeding, fencing, fertilizer application etc. and Protection measures etc.
- Maintenance of Plantation Journal/clump register & Nurseries

#### Criteria for Evaluation (based on count in 0.1 ha sample plot)

- Survival %
- Average plant height (in cm)
- Average DBH/ Collar Girth (in cm)
- Average number of seedlings planted
- Status of natural regeneration/coppicing status of stump, if any

**Note:** Score obtained based on the "Scoring of Plantation" based on the criteria like plantation journal & its updation, treatment map, SMC measures, survival%, Height & growth etc.

Page **3** of **15** 

Revision: 1 (February 14, 2024)

# 2. Evaluation of SMC Works (Use Form 2)

#### Sampling method and Sampling %

- Range-wise list of SMC sites will be collected from the divisions
- Two Ranges from each division where maximum set of SMC activities undertaken will be selected
- In each selected Forest Range serial number will be given to all the sites
- 10% of the total sites provided as per the list will be randomly selected utilizing Random Number Table
- Photograph along with GPS location (using mobile app)

#### **Data Collection**

- DPR prepared / Sanction letter
- Types of structure
- No. /volume
- Treatment Map available in Register of SMC
- Numbers per ha
- Extent of Siltation
- Efficacy of the Structures
- Extent of stabilization of gullies
- Comparative enhancement of ground water table
- Comparative assessment of the Vegetation cover in the area
- Status of regeneration
- Record maintenance like MB, GPS location

#### Criteria for Evaluation (based on sample site)

- Quality/suitability of SMC structures
- Staggered trench, Percolation Pit, Contour bund, graded bund, Gully Plugging, WHS, etc.
- Design and number of structures as per Norms/ Specification
- Effectiveness of structures (siltation check and stabilization of erosion/ gullies, improvement in soil moisture regime and regeneration) observation based supported by photograph to be rated in two categories a) Satisfactory, b) Not satisfactory
- Gaps, if any observed, will share with field as well as senior team for taking corrective measures

Revision: 1 (February 14, 2024)

# 3. Evaluation of Infrastructure Works (Use Form 2)

#### Sampling method and Sampling %

- Range-wise list of sites will be collected from the divisions
- 10% of the total sites provided as per the list will be randomly selected utilizing Random Number Table
- Photograph along with GPS location (using mobile app)

#### **Data Collection**

- DPR/ Estimates for the structure
- Types of structure
- · Work Order and Estimated Cost
- Completion status/ Commissioning of structure
- Specification/ norms followed for construction of structure
- Deviations/ cost over-run
- Utilization and maintenance of structure

#### Criteria for Evaluation (based on sample site)

- Completion of structure as per Work Order/ specification
- Any deviation from plan and estimate
- · Usability and utility
- Construction quality (observation based supported by photograph to be rated in two categories – a) Satisfactory, b) Not satisfactory)

Page **5** of **15** 

Revision: 1 (February 14, 2024)

#### 4. Evaluation of Wildlife Management Works

#### Sampling method and Sampling %

- Range-wise list of different wildlife management activities will be collected from the divisions
- Two Ranges from each division where maximum activities taken up will be selected, if any
  activities will be missing in two sampled ranges, alternate range(s) will be selected to cover
  the activities
- In each selected Forest Range serial number will be given to all the sites
- 10% of the total sites provided as per the list will be randomly selected utilizing Random Number Table

#### **Data Collection**

- Protection and Anti-Depredation Activities
- Forest Fire Prevention and Control Operations
- Improvement of Wildlife Habitat
- 3.1 Augmentation of food and water resources
- 3.2 Monitoring assessment and protection of wildlife habitat
- 3.3 Habitat Management
- 3.4 Corridor Management
- 3.5 Management of Special Habitats
- 3.6 Contingency & Overhead Expenditure
- Establishment, operation and maintenance of animal rescue centre and veterinary treatment facilities for wild animals
- Management of biological diversity and biological resources
- Voluntary Relocation of Villages from Protected Areas and Tiger Reserve
- Strengthening of Communication facilities for Protection of Wildlife
- Construction & Maintenance of Infrastructure for Protection of Wildlife
- Research Activities
- Publicity & Awareness Programmes

#### **Criteria for Evaluation** (based on sample site)

- Completion of interventions
- Any deviation from plan and estimate in case of anti-poaching barrack/watch tower/animal rescue center/anti-poaching check gate
- Usability and utility
- Present conditions and utility
- Construction quality (observation based supported by photograph to be rated in two categories – a) Satisfactory, b) Not satisfactory)

Revision: 1 (February 14, 2024)

#### 5. Evaluation of Other Works

### Sampling method and Sampling %

- Range-wise list of other activities carried out will be collected from the divisions
- Two Ranges from each division where maximum activities taken up will be selected, if any activities will be missing in two sampled ranges, alternate range(s) will be selected to cover the activities
- 10% of the total activities provided as per the list will be randomly selected utilizing Random Number Table

**Criteria for Evaluation** (based on sample site)

Activity wise suitable criteria will be applied.
